2010 TREE SEEDLING PROGRAM

The Town of Caledon, in association with the Halton/Peel Woodlands and Wildlife Stewardship, is pleased to offer a native tree/shrub seedling program to landowners interested in reforesting their properties. The purpose of the program is to promote and encourage private reforestation efforts by making affordable native nursery stock accessible to local residents. This program is directed toward residents who own 0.5 hectares (1.2 acres) or greater of land.

A minimum order of seedlings/trees/shrubs as specified in the table below is required. Unfortunately, we are unable to accept applications that do not meet these requirements. Stock is supplied on a first-come basis. Residents interested in obtaining trees are encouraged to submit orders and appropriate payment as quickly as possible. Taxes are included in cost. With the exception of White Birch all nursery stock is dormant bare root material from local tree seed zone 34.
