

NOTICE of STUDY COMMENCEMENT

Heart Lake Road Improvements From Mayfield Road Northerly Approximately 1.5 km

The Town of Caledon is initiating a Class Environmental Assessment to investigate various improvements to Heart Lake Road, from Mayfield Road to approximately 100 metres north of the proposed Mayfield West Community Area, a distance of approximately 1.5 km (see map below). Transportation corridor improvements are necessary to meet the projected increase in traffic demand on Heart Lake Road as a result of the development of the Mayfield West Community Area. Philips Engineering Ltd. has been retained by the Town of Caledon to complete the study.

This study will consider, evaluate and detail alternative solutions to address deficiencies with this section of Heart Lake Road. The study will be conducted in compliance with Schedule "C" of the Municipal Engineers Association "Municipal Class Environmental Assessment," (June 2000).

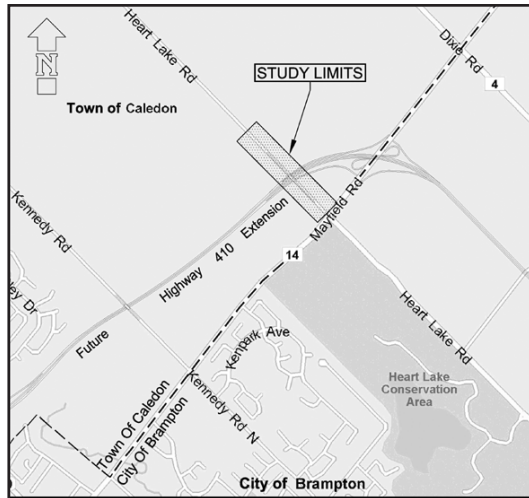

A key component of the study will be consultation with interested stakeholders (public, landowners and regulatory agencies). Two Public Information Centres (PICs) will be held to provide interested parties with an opportunity to review and discuss issues related to the project, including existing conditions, an assessment of alternatives, selection of the preferred alternative and environmental considerations. Details regarding the forthcoming Public Information Centres will be advertised as the study progresses.

We are interested in hearing any comments or concerns that you may have about this study. Comments and information regarding the study are being collected to assist the Town of Caledon in meeting the requirements of the Environmental Assessment Act. This material will be maintained on file for use during the project and may be included in project documentation. With the exception of personal information, all comments will become part of the public record.

If you require further information, or if you have specific comments related to this project, please contact either of the following:

Mr. David Sinke, P. Eng.
Project Engineer - Philips Engineering Ltd.
