

The issue of this record drawing is a representation by Turner Fletcher Architects Inc. that the construction, enlargement or alteration of the areas shown unshaded is in general as opposed to precisely conform with the design prepared and provided by Turner Fletcher Architects Inc. It is not a representation that the unshaded area is in conformity with a design that has been prepared or provided by others. The shaded areas are not defined, and Turner Fletcher Architects Inc. shall not be held responsible for the accuracy of the information provided by Loblaws Companies Limited. The respondents to these contract documents, reflecting the significant changes in the work made during construction, are based on data furnished by the contractor to Turner Fletcher Architects Inc. Turner Fletcher Architects Inc. shall not be held responsible for the accuracy or completeness of the information provided by the contractor.

CITY OF CALEDON ZONING BY-LAW NO. 2006-50

Building Height means the vertical distance between the finished grade of the lot on which the building is situated and:

- a) the highest point of the roof surface of a flat or domed roof; or
- b) the deck line of a mansard roof; or
- c) the median level between eaves and ridge of a gable, gambrel or hip roof.
