

COLUMBIA WAY CLASS ENVIRONMENTAL ASSESSMENT STUDY
HIGHWAY 50 TO CALEDON KING TOWNLINE

The Study

The Town of Caledon has identified a need for improvements to Columbia Way between Highway 50 and Caledon King Townline. Subsequently, the Town has initiated a Municipal Class Environmental Assessment (Class EA) for improvements to the road for various users (motorists, pedestrians and cyclists), intersection alternatives, and drainage for the reconstruction of Columbia Way. Within the study limits, Columbia Way will retain the two general-purpose lanes, however various options will be evaluated to enhance safety, improve traffic operations and to better accommodate all users.

The Process

The purpose of the study is to identify a recommended design for Columbia Way that enhances road safety, improve traffic operations and connectivity for all users. In identifying the road improvements, the study will consider technical, aesthetic, and structural requirements; as well as socio-economic; cultural heritage, and natural environment factors.

The project is being completed as a **Schedule “B”** project in accordance with the *Municipal Class Environmental Assessment (October 2000, amended in 2007, 2011 & 2015)*.

Contact
