Re: Draft Plan of Subdivision Submission (Reference PRE 2024-0084)
2nd Submission – FSR Letter of Compliance
Argo Mayfield West III Limited

Carmine,

We confirm that the proposed development, Argo Mayfield West III Limited, as shown on the latest draft plan prepared by GSAI, complies with the recommendations for site servicing, grading, drainage, and stormwater management as described in the *Alloa Tertiary Plan – Phase 1 Functional Servicing Report (FSR)* (September 2024).

Sanitary Servicing

The site is accommodated by the existing 750 mm sanitary trunk sewer on Brisdale Drive. Wastewater generated within the draft plan area will generally flow north to south through local sewers to a proposed 375 mm sewer on Street A (Welsh Avenue). The Street A sewer will connect to the planned 525 / 675 mm regional trunk system on Speersville Avenue (Street E) (Project 29-2199), which discharges to the existing 750 mm stub connection at Brisdale Drive, just north of Mayfield Road.

Water Servicing

Municipal water will be supplied to the Argo Mayfield West III Limited site through Peel Region's lake-based system (Pressure Zone 7W). Water services will extend north from the existing 600 mm watermain on Mayfield Road and east from the existing 600 mm watermain on Chinguacousy Road. The Region's capital program includes two new 400 mm watermains—on Creditview Road (Project 26-1188) and Tim Manley Boulevard (Project 26-1187)—to service the Alloa Phase 1 area, including the subject development. A network of local 300 mm watermains on Speersville Ave, Welsh Avenue, and Alexander Gillespie Avenue will provide looping and security of supply, connecting to both existing and proposed Regional infrastructure.

Stormwater Management

The Argo Mayfield West III draft plan is within the Fletcher's Creek watershed, under CVC jurisdiction. Post-development drainage patterns have been designed to closely match pre-development conditions. Accordingly, stormwater associated with the draft plan is managed within the Fletcher's Creek watershed through SWM Pond 1 (at Mayfield Road). Ponds located adjacent to Mayfield Road are proposed to discharge to culverts to be constructed by the Region as part of the Mayfield Road widening project.

All ponds within the Alloo Secondary Plan are designed to meet applicable requirements for quantity, erosion, and quality control (Enhanced Level 1 – 80% TSS removal).

Supporting Materials

Servicing drawings from the FSR are attached for information. For additional details please refer to the *Alloo Tertiary Plan – Phase 1 Functional Servicing Report (FSR)* (September 2024). Please note that minor variations in lotting and unit counts are not anticipated to impact the servicing plan as described in the FSR. Servicing details will be finalized in consultation with the Town as part of detailed design.

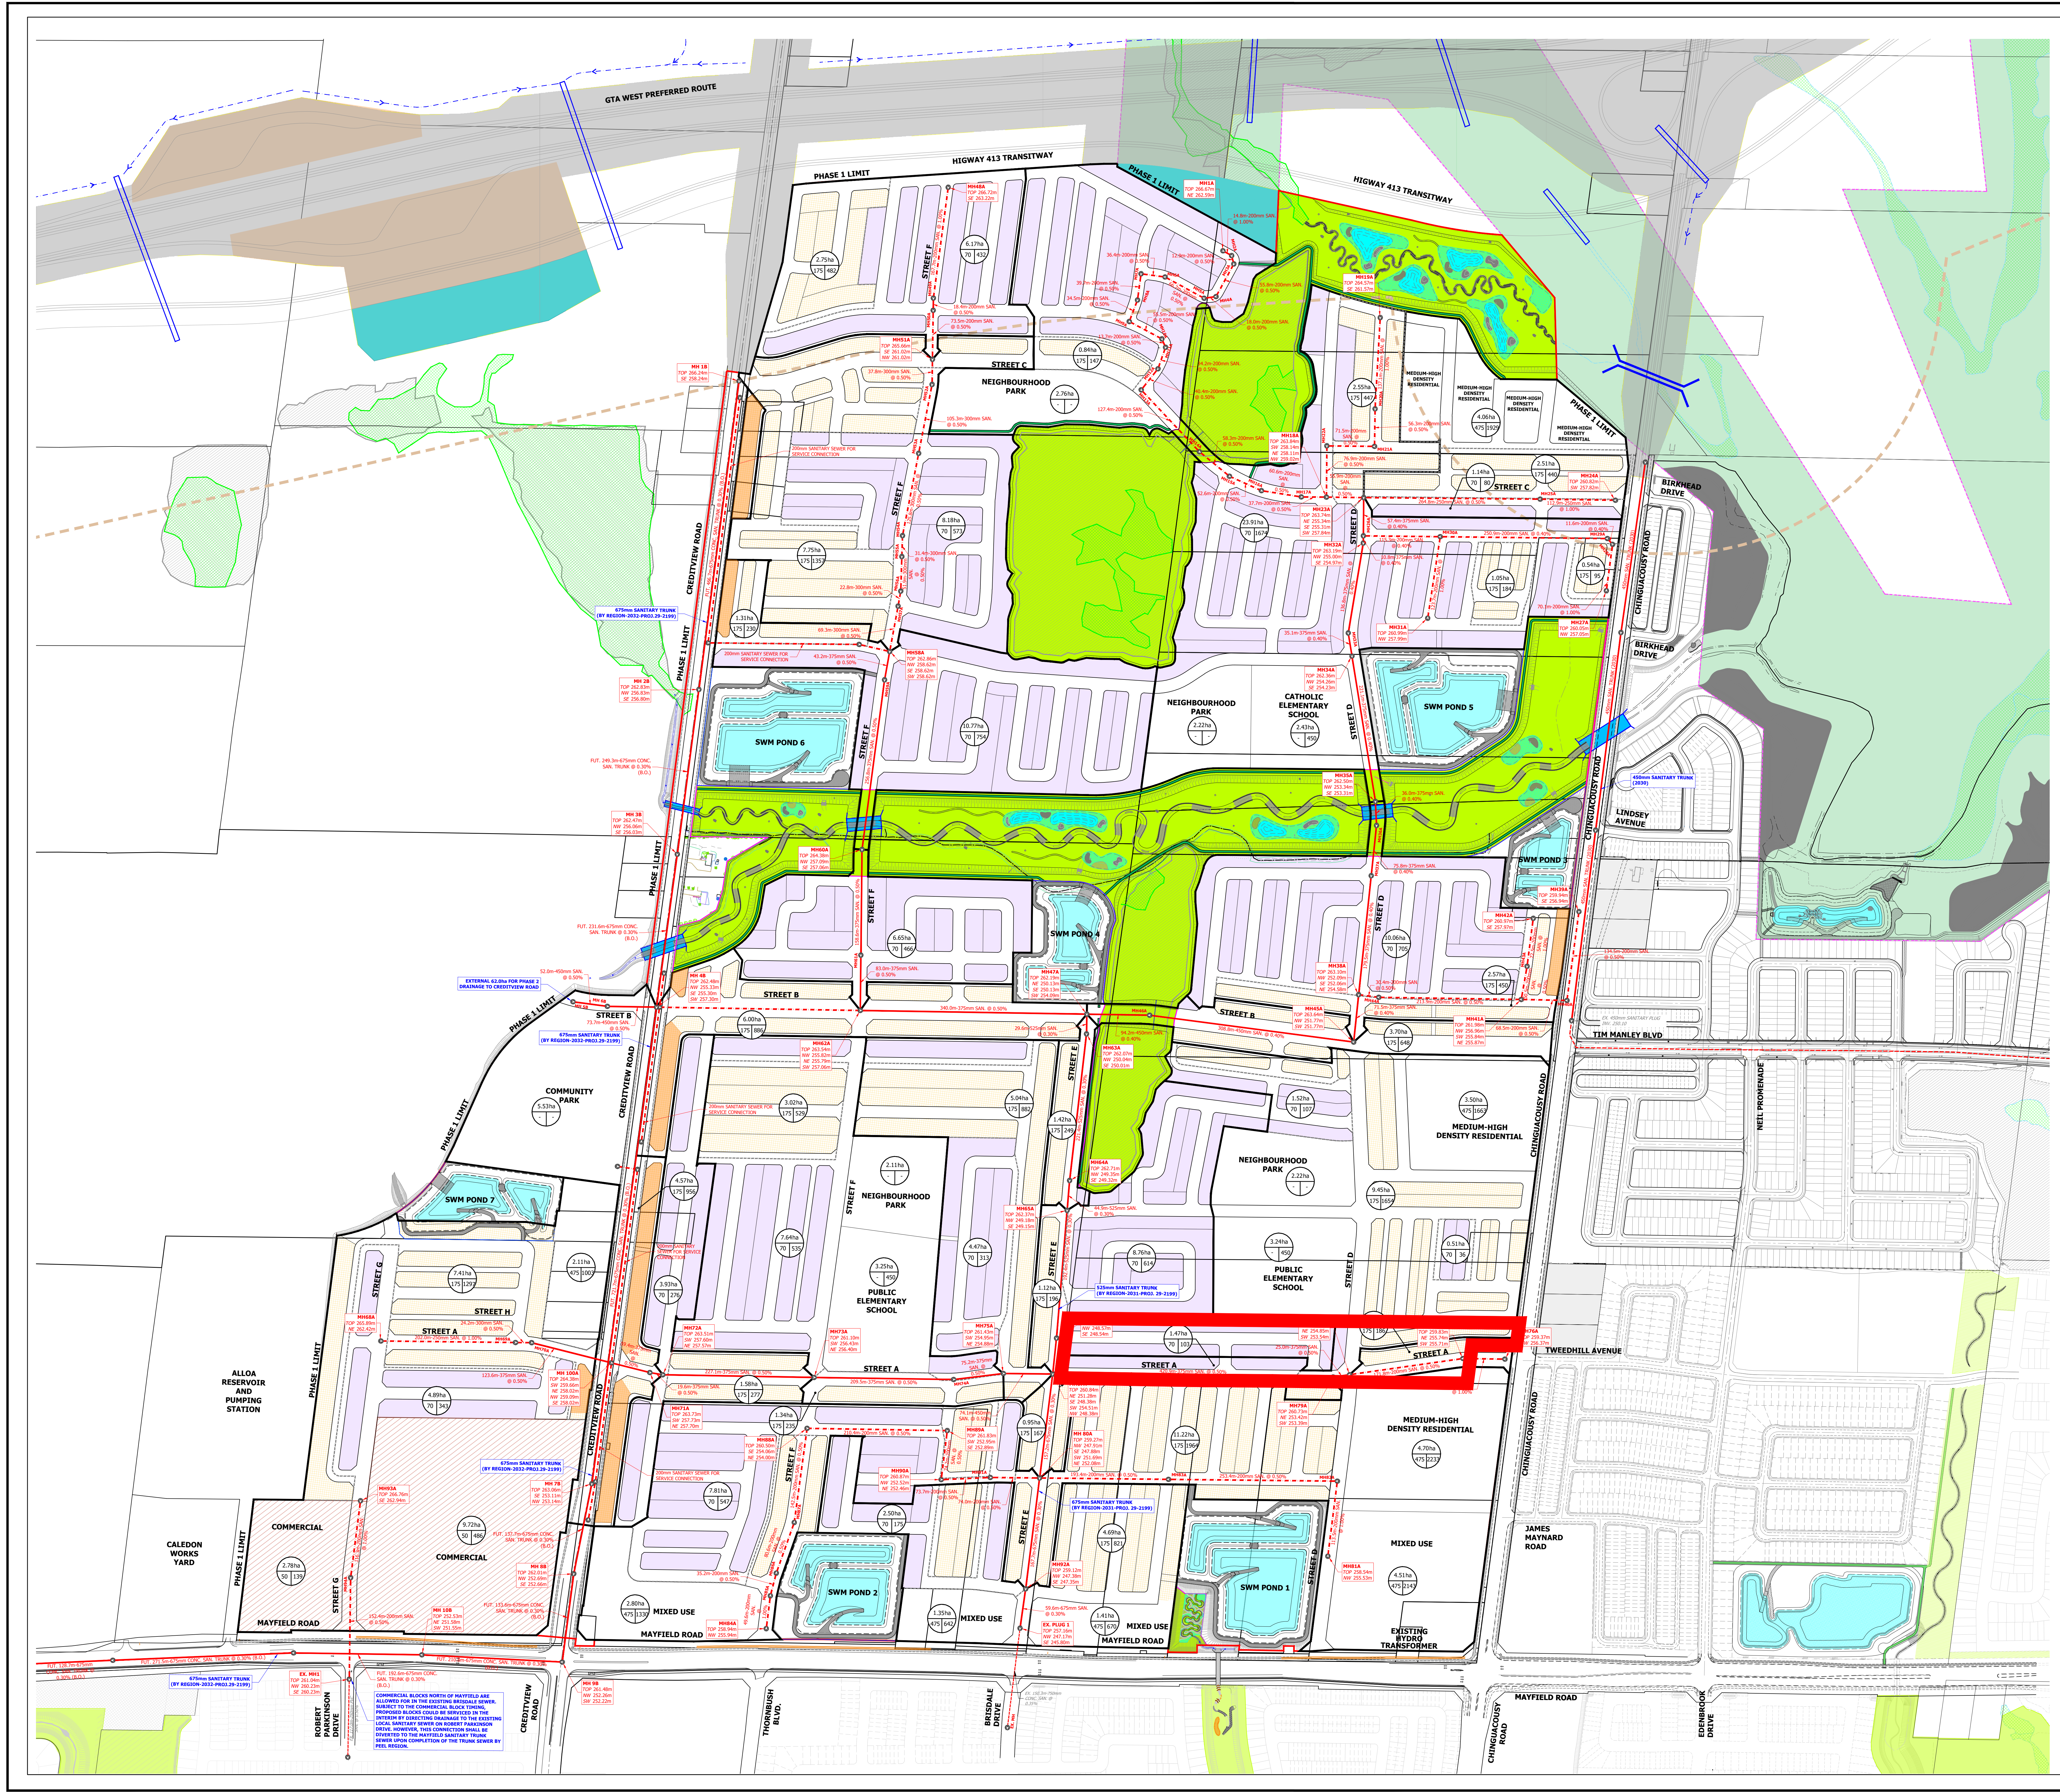

We trust that the enclosed information satisfies the requirements of the Draft Plan application. If you have any questions or concerns, please feel free to contact our office.

Regards,
Urbantech® Consulting

- SANITARY MANHOLE ID, PROPOSED GROUND ELEVATION, PROPOSED SEWER OBVERTS
- LOTS REQUIRING EXTERNAL (LOCAL) SANITARY FOR SERVICE CONNECTIONS
- INTERIM COMMERCIAL AREA SERVICED BY ROBERT PARKINSON DRIVE SEWER
- DETACHED
- TOWNHOUSE
- ARGO MAYFIELD WEST III

ALLOA PHASE 1 WASTEWATER SERVICING NOTES:

- ALLOA PHASE 1 LANDS HAVE BEEN ACCOMMODATED FOR WASTEWATER SERVICING IN THE EXISTING 750mm TRUNK SEWER ON BRISDALE DRIVE WITHIN EXISTING MOUNT PLEASANT BLOCK 51-2, AS PER APPROVED BLOCK 51-2 EIR/FSR AND RELEVANT BLOCK 51-2 DETAILED SUBDIVISION DESIGNS. THE DRAINAGE CONTRIBUTION TO BRISDALE TRUNK SEWER COMPREHENSIVE OF ESTIMATED 502.9ha OF EXTERNAL DRAINAGE AND POPULATION OF 25,460 WHICH WOULD GENERATE THE FLOW OF 329.2L/S AT THE UPSTREAM END OF BRISDALE PIPE SYSTEM.
- ESTIMATED PHASE 1 DEVELOPMENT AREA SHOWN ON THIS PLAN (EXCLUDING SWM PONDS AND INWS) COMPRISES OF APPROXIMATELY 255.5ha OF DEVELOPABLE LAND, AND A RESIDENTIAL POPULATION OF 36,105.
- REGION OF PEEL IDENTIFIED NECESSARY SEWER IMPROVEMENTS ON AND SOUTH OF BRISDALE DRIVE WHICH WILL BE TRIGGERED BY THE PLANNED DEVELOPMENTS NORTH OF MAYFIELD ROAD INCLUDING ALLOA PHASE 1. EXTERNAL INFRASTRUCTURE IMPROVEMENTS BY PEEL WILL BE IMPLEMENTED IN CONJUNCTION WITH THE ALLOA PHASE 1 PLANNING APPROVALS AND INITIAL PHASES OF ALLOA DEVELOPMENT.
- THIS PLAN REFLECTS THE ULTIMATE PHASE 1 SERVICING CONCEPT BASED ON THE APPROVED BLOCK 51-2 AND MW2 SUPPORTING STUDIES. HOWEVER, AND SUBJECT TO THE PEEL REGION CONFIRMATION, A PORTION OF ALLOA PHASE 1 LANDS COULD BE PERMANENTLY ACCOMMODATED IN THE EXISTING TIM HANLEY TRUNK SANITARY SEWER WITHIN MW2.
- SHOULD THE COMMERCIAL DEVELOPMENT AT THE NORTH WEST CORNER OF MAYFIELD AND CREDITVIEW ROAD PROCEED WITH CONSTRUCTION AHEAD OF ALLOA PHASE 1 RESIDENTIAL LANDS, THE INTERIM COMMERCIAL BLOCK SERVICING WILL BE EXPLORED TO EXTEND EXISTING 250mm SANITARY OUTLET ON ROBERT PARKINSON DRIVE IN BLOCK 51-2. FOLLOWING COMPLETION OF THE MAYFIELD TRUNK SEWER, THE INTERIM SERVICE CONNECTION WOULD BE DECOMMISSIONED TO THE REGION'S SATISFACTION AND COMMERCIAL DEVELOPMENT FLOWS PERMANENTLY DIVERTED TO THE MAYFIELD OUTFALL.
- IF REQUIRED TO ACCOMMODATE DEVELOPMENT TIMING, ALLOA LANDOWNERS GROUP TO ENTER INTO A FRONT ENDING AGREEMENT WITH PEEL FOR DELIVERY OF NECESSARY REGIONAL INFRASTRUCTURE AHEAD OF THE CAPITAL PROGRAM PLANNING SCHEDULE.
