Submission #21MCA674: Diana Hutsulak-Alonso on 09/11/2021 at 2021-0533 – 226-CA8385-21 – Stellar Estates – Caledon for Archeoworks Inc..
Submitted by Diana Hutsulak-Alonso.

Overall Daily Conditions included:

Temperature of 7 C.

No precipitation with Light cloud cover.

Stage 2 Pedestrian Survey, Stage 2 Test Pit Survey work was conducted at 15462 Mt Pleasant Rd, Kleinburg. Study area included a ploughed field and small wooded/fallow area..
Soil conditions consisted of Dry, Wet Sand, Loam.

Ploughed field conditions were Weathered that was Disked, Mouldboard with 80% or Greater surface visibility.

Fieldwork Description:

A portion of the field was disturbed by a large dirt pile, as seen in the photos. Field was walked at 5m intervals up until the disturbance. Two small sites were encountered during the pedestrian survey, one indigenous, one historic.

Both sites were intensified at one metre intervals and everything was collected.

Fallow field/small wooded area was test pitted at 5m intervals. This area was mostly long grass and dogwood, with the area along the fence being a more open wooded area. In the lower lying areas we hit the water table at subsoil, however this had no effect on the assessment. They averaged 20-30cm in depth. Soil was a sandy loam throughout both the field and the wooded area.

Finds today consisted of:

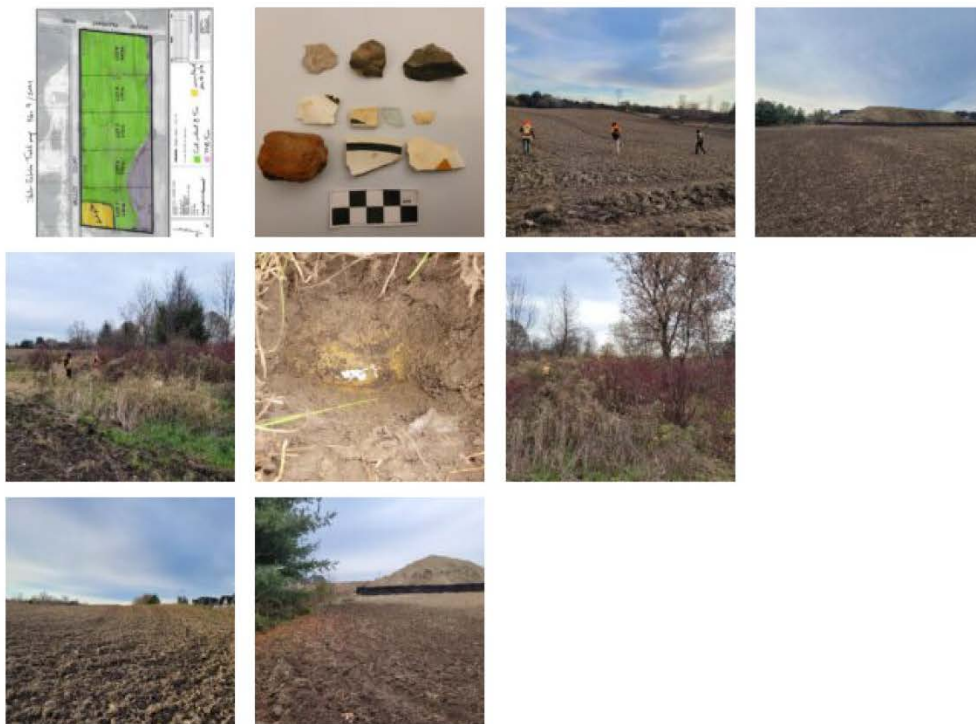

Two separate sites found during fieldwalking. First site designated P1 (Findspots 1-3), consisted of 3 flakes each of which were found approx. 10m apart. Second site designated H1, had 7 total findspots (FS 4-10) consisting of a small historic scatter, found approx 30m from P1.

FS1- Flake, FS2- Flake, FS3 – Flake, FS4 – Brick, FS5 – pane glass, FS6 – Whiteware, FS7- Handpainted whiteware, FS8 – Whiteware, FS9 – Handpainted whiteware, FS10 – Handpainted whiteware

Items of Special Interest:

Three flakes found during pedestrian survey. Please see attached photo.
