1 Executive Summary

EXP Services Inc. (EXP) was retained by Airfield Developments Inc. & Airfield II Developments Inc. c/o Smart Centres ("Client") to complete a Phase One Environmental Site Assessment (ESA) of the property located at the northeast intersection of Airport Road and Mayfield Road in Caledon, Ontario (hereinafter referred to as the 'Site' or 'Phase One Property').

This report has been prepared in support of the proposed development of the Site for industrial use.

The subject land is located at the northeast corner of the intersection Airport Road and Mayfield Road. The subject lot is approximately 23.31 acres (9.43 hectares) in area and is currently vacant. The areas surrounding the Site consist of a Falcon Motor Xpress, residential areas, a vacant lot to the east, , and an Esso to the south, Shell, Tim Horton's, and a Farmer's Market to the west, and Grabb-A-Pizza and True Motorway mechanic to the north.

For ease of discussion, the directions referred to in this Phase One ESA report are in reference to project north, which runs parallel to Airport road (as depicted on Figure 2).

It is EXP's understanding that the Site is to be developed for industrial use. This investigation / report was completed in accordance to Ontario Regulation 153/04, as amended (O.Reg. 153/04) to meet requirements during the municipal planning process. A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg. 153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It is noted that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property. However, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

Based on the Phase One ESA findings, the following information is provided in Table 1-1 in support of the Phase One Qualified Person's (QP's) conclusion:

Table 1-1: Areas of Potential Environmental Concern

Area of Potential Environmental Concern (APEC) ¹	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Importation of Fill Material	South portion the Phase One Property	PCA#30 – Importation of Fill Material	On-Site	Metals and Polycyclic Aromatic Hydrocarbons (PAHs)	Soil
APEC 2: Waste Generator to the North	Northern portion of the Phase One Property	PCA "Other" – Waste Generator	Off-site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Groundwater

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0
July 23, 2021*

Area of Potential Environmental Concern (APEC) ¹	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 3: Gasoline Service Station to the West	Western portion of the Phase One Property	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems PCA "Other" – Waste Generator	Off-site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Groundwater
APEC 4: Former AST	Southern portion of the Phase One Property	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	On-Site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Soil

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the PI ESA, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

2 Introduction

EXP Services Inc. (EXP) was retained by Airfield Developments Inc. and Airfield II Developments Inc. c/o Smart Centres (“Client”) to complete a Phase One Environmental Site Assessment (ESA) of the property located at the northeast intersection of Airport Road and Mayfield Road in Caledon, Ontario (hereinafter referred to as the 'Site' or 'Phase One Property').

This report has been prepared in support of the proposed development of the Site for industrial use.

The subject land is located at the northeast corner of the intersection Airport Road and Mayfield Road. The subject lot is approximately 23.31 acres (9.43 hectares) in area and is currently vacant. The areas surrounding the Site consist of a Falcon Motor Xpress to the east, residential areas, a vacant lot, and an Esso to the south, Shell, Tim Horton's, and a Farmer's Market to the west, and Grabb-A-Pizza and True Motorway mechanic to the north.

For ease of discussion, the directions referred to in this Phase One ESA report are in reference to project north, which runs parallel to Airport Road (as depicted on Figure 2).

It is EXP's understanding that the Site is to be developed for industrial use. This investigation / report was completed in accordance to Ontario Regulation 153/04, as amended (O.Reg. 153/04) to meet requirements during the municipal planning process. A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It should be noted that the objective of this review was to identify any environmental concerns associated with the Site.

2.1 Phase One Property Information

Details of the Site are as follows:

Municipal Address	Northeast Corner of the intersection at Airport Road and Mayfield Road, Caledon, ON
Current Land Use	Vacant
Proposed Land Use	Industrial
Legal Description	Part Lot 1 Con 1 Albion Designated as Pt 1 40R-34197
Property Identification Number (PIN)	PIN# 14348-0466 (LT)
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 599720.46 m E 4849653.91 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	GPS
Site Area	23.31 acres (9.43 hectares)
Property Owner, Owner Contact and Address	Airfields Development Inc. & Airfield II Developments Inc. Lilly Wu SmartCentres 3200 Highway 7, Vaughan, Ontario L4k 5Z5

3 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Obtaining an Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250 metre radius of the Site;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
- Obtaining and reviewing a chain of title and assessment rolls for the Site;
- Reviewing available reports previously completed at the Site;
- Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide EXP staff with unrestricted access to all areas of the Site and Site buildings (as required by O.Reg. 153/04, as amended);
- Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
- Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
- Preparing a report to document the findings.

The following sections summarize the information gathered by EXP during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Phase One property and in the Phase One study area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in the O. Reg 153/04, as amended.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses or monitoring.

EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or any of the statements made by others.

EXP personnel who conducted assessment work for this project included Ms. Victoria DePaulo, B.Sc. and Mr. Jason Slidders, L.E.T. An outline of their qualifications is provided in Appendix C.

4 Record Review

4.1 General

4.1.1 Phase One Study Area Determination

The Phase One Study Area consists of properties within a distance of approximately 250 metres from the Site boundaries. The Phase One Study Area is bound by agricultural fields and Falcon Motor Xpress to the east, Airport Road, Tim Horton's, Shell, and a farmer's market to the west, Mayfield Road and residential properties to the south, and agricultural land and True Motorway to the north. The Phase One Study Area and a Surrounding Land Use Plan are shown on Figure 2.

4.1.2 First Developed Use Determination

Based on a review of historical aerial photographs, chain of title information, previous reports, and other records, the Site was used for agricultural purposes starting in the 1820s. It has been used historically as agricultural land since. In the early 2010s, the buildings on Site were demolished. Since then, the Site has been vacant.

4.1.3 Fire Insurance Plans (FIPs)

Based on a search of Goad's *Atlas of the City of Toronto*, there was no coverage for the Site and Phase I Study Area.

4.1.4 Insurance Reports

A search was conducted by OPTA Information Intelligence in 2021 as requested by EXP, to identify any insurance reports that provide coverage of the Site. Based on the search, no reports were available for review.

4.1.5 Chain of Title

The search for the historic chain of titles that comprise of the Site was completed by Dominic Bertucci, an independent Title Researcher, on June 16th, 2021. The completed chain of title is provided in Appendix D, and a list of previous owners and lessors of the Site are summarized in Table II. Airfields Development Inc. and Airfield II Developments Inc. has owned the property since 2016 after purchasing the land from Rita Polsinelli, Annette Giovannone, & Domenic Di Pede.

Based on the information provided in the Corporation Profile Report, the owner of the Site is Airfields Development Inc. as of 2016.

4.1.6 Environmental Reports

The following reports were available for review at the time of this Phase One ESA:

1. A report entitled "Phase I Environmental Site Assessment, 6034 Mayfield Road, Caledon, Ontario" dated December 2010 was prepared by Barenco Inc. for Calloway Real Estate Investment Trust. A review of this report indicated the following:
 - The report was completed following the principles of the Canadian Standards Association (CSA) Z-768 Guideline and in accordance with generally accepted professional practices.
 - According to a review of aerial photographs, the Site and surrounding properties were generally used for agricultural purposes. Apart from a few farmhouses, there were no other structures on the Site.
 - An above-ground storage tank was found during the Site inspection in the basement of one of the Site buildings – assumed to be used for storing fuel oil.
 - Fill material was observed at the back of one of the Site buildings towards the northwest of the property.
2. A report entitled "Phase I Environmental Site Assessment, Northeast Corner of Airport Road and Mayfield Road, Caledon, Ontario" dated July 2011 was prepared by EXP Services Inc. for SmartCentres. A review of this report indicated the following:

- The report was completed following the principles of the Canadian Standards Association (CSA) Z-768-01 (November 2001) Guideline and in accordance with generally accepted professional practices.
 - Based on the Phase I ESA findings, there are multiple potential environmental concerns associated with the Site:
 - An above ground storage tank was observed in the basement of one of the residential buildings on Site.
 - Several fill piles were observed during the Site visit. The fill material is of unknown origin and consistency.
 - Due to the age of the buildings on Site, asbestos, PCB, mercury, and lead containing materials may be present on Site.
 - 12117 Airport Road, north adjacent to the Site, is listed as a private fuel outlet as of 2004. Given the close proximity to the Site and the nature of operations, there is a possibility for the operations to impact the Site.
 - The property located north adjacent to the Site at 12101 Airport Road was occupied by AJ Equipment Sales from 1998 to 2001 which is associated with the hazardous waste of halogenated solvents and petroleum distillates.
 - The property located west of the Site at 12016 Airport Road is occupied by a Shell gas station. It is associated with a 10,000 L gasoline UST and a 7,500 L diesel UST.
 - Based on the conclusions from the Phase I ESA, a Phase II ESA, including borehole drilling, soil and groundwater sampling, and chemical analysis, is recommended.
3. A report entitled "Phase II Environmental Site Assessment, Northeast Corner of Airport Road and Mayfield Road, Caledon, Ontario" dated January 2012 was prepared by EXP Services Inc. for SmartCentres. A review of this report indicated the following:
- The Phase II ESA consisted of advancing three (3) boreholes at the Site which were completed as groundwater monitoring wells.
 - EXP selected the Table 2 Site Condition Standards (SCS) for Industrial/Commercial Property Use with fine-textured soil.
 - The general stratigraphy at the Site consists of silty topsoil, silt and silty clay, overlying silty clay till.
 - The depth to groundwater ranged from 1.83 and 5.52 m bgs. The groundwater below the Site was assessed to flow in a southeasterly direction.
 - Three (3) soil samples were analyzed for PHCs (F1 to F4) including BTEX. All the soil samples collected were below the MOE Table 2 SCS (2011).
 - Three (3) soil samples were also analyzed for metals. The metals in the submitted soil samples were either not detected above the laboratory MDLs or were below the MOE Table 2 SCS (2011).
 - Two (2) soil samples were analyzed for lead. The concentrations of the lead in the submitted soil samples were below the MOE Table 2 SCS (2011).
 - Four (4) groundwater samples were analyzed for PHCs (F1 to F4). PHCs were not detected in the sample.
 - Four (4) groundwater samples were analyzed for VOCs. Acetone was detected in the groundwater sample from MW-2, however the concentration was below the MOE Table 2 SCS. The remaining samples were below the MOE Table 2 SCS (2011).

- Four (4) groundwater samples were analyzed for metals. The metals in the submitted groundwater samples were either not detected above the laboratory MDLs or were below the MOE Table 2 SCS (2011).
 - No evidence of free product (ie, visible film or sheen), or odour was observed during well purging and groundwater sampling.
 - Based on the results of the Phase II ESA, the contaminants of concern noted on the Phase I ESA are below the applicable MOE Table 2 SCS (2011).
4. A report entitled “Soil Removal Monitoring and Confirmatory Soil Sampling, Northeast Corner of Airport Road and Mayfield Road, Caledon, ON” dated February 2015 was prepared by EXP Services Inc. for Airfield Developments Inc. A review of this report indicated the following:
- EXP provided oversight for the removal of approximately 134 metric tonnes (MT) of suspected PAH-impacted soil from the southeast portion of the Site where there was previously a barn structure.
 - The impacted soil was disposed of at GFL Fenmar Soil Facility in North York, ON.
 - During the completion of the excavation, debris containing wood and metal was encountered within the area of excavation and removed for recycling.
 - The final excavation was rectangular in shape with a floor area of approximately 484 m² and extended to a depth of approximately 0.5 m bgs.
 - Upon completion of the excavation, the floors and sidewalls consisted of topsoil overlaying silt with sand and granular fill material overlaying native sandy silt to an approximate depth of 0.5 m bgs.
 - Eleven (11) soil samples were analyzed for PAHs. All soil samples were found to be below the MOECC Table 1 SCS guidelines.
 - Based on the results of the Soil Removal and Confirmatory Soil Sampling program, the concentrations of PAHs in the soil samples collected were in compliance with the applicable MOECC Table 1 SCS.

4.2 Environmental Source Information

4.2.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was completed by Environmental Risk Information Services (ERIS) on June 18th, 2021 (EXP). EXP has confirmed neither the completeness nor the accuracy of other records that were provided. A copy of the ERIS reports are provided in Appendix E.

A summary of the significant findings is provided below:

Location & Proximity to Site	Summary	Database	Associated PCA(s)

4.2.2 Municipal Records

4.2.2.1 Municipal Directories

The available Polk’s Halton/Peel Regions, ON Criss Cross Directories searched the City Directories between 1958 and 2000 and were reviewed by LGI Copy Services Canada, in order to identify the occupancy history of the Site, and properties within the Phase One Study Area during the preparation of the Phase One ESA by EXP in 2021. EXP reviewed the report to identify possible environmental concerns. The partial listing of city directories up until 2000 is provided in Appendix F.

Details of the tenants on-Site and within the Phase One Study Area that appeared to be associated with one or more PCAs as per Table 2, Schedule D of O.Reg.153/04, as amended, are listed as follows:

Address	Tenant	Years of occupancy	Associated PCA(s)
Surrounding Properties			
12101 Airport Road (north adjacent)	AJ Equipment Sales	2000	None, based on the anticipated operations at the property.
5981 Mayfield Road (90 m southwest)	Fal’s Variety Ltd Penny’s Gas Bar	1994-2000 1994-2000	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
6000 Mayfield Road (95 m southwest)	Clint Development Tri Brook Homes	2000 2000	None, based on the anticipated operations at the property.

4.2.3 Ontario Ministry of the Environment Records

4.2.3.1 Ministry of the Environment, Conservation and Parks (MECP)

The MECP was contacted through the Freedom of Information and Protection of Privacy Act (FOI) for copies of any records they had pertaining to the Site on June 18th, 2021.

A written response from the MECP typically requires several months. Upon receipt of the response from the MECP, any significant environmental issues identified will be summarized in the report.

Copy of the request is provided in Appendix G.

4.2.3.2 Ministry of the Environment and Climate Change Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary of MECP databases (see section 4.2.1). The databases include the following: Environmental Bill of Rights (EBR), Brownfields Environmental Site Registry, Hazardous Waste Information Network (HWIN) and Waste Disposal Sites.

4.2.4 Technical Standards and Safety Authority

A request was made to the TSSA by email on June 15th, 2021 for information regarding fuel storage at the Site and adjacent properties.

A written response for the TSSA was received on June 15th, 2021. According to a search of their database, the following records were found for the Site and/or for the surrounding properties within the Phase One Study Area:

- 5981 Mayfield Road
 - One (1) active full-service (FS) gasoline station – self serve
 - One (1) active FS cylinder exchange
 - Four (4) active FS liquid fuel tanks
 - Six (6) expired FS liquid fuel tanks
- 12016 Airport Road
 - One (1) active FS cylinder exchange
 - One (1) active FS gasoline station – self serve
 - Two (2) active FS liquid fuel tanks

A copy of the e-mail correspondence with the TSSA is provided in Appendix G.

4.2.5 Record of Site Condition

A Record of Site Condition (RSC) summarizes the environmental conditions of a property as determined by a qualified person (QP) by conducting a Phase I ESA, and where necessary, a Phase II ESA, confirmatory sampling and risk assessment. Upon completion of the necessary environmental Site assessments, an RSC for an assessed property can be filed with the MECP and added to the Environmental Brownfields Site Registry database. This online, publicly available database can be searched to identify properties which may have potential environmental concerns.

Based on a search of the Environmental Brownfields Site Registry database and ERIS Report, the Site was not listed with an RSC. One (1) RSC was filed for the Phase One Study Area, pertinent information as follows:

- An RSC was filed in 2006 for the properties situated 230 m southeast of the Site at an agricultural field. A Phase I ESA was conducted to facilitate a change in land use from agricultural to residential property use.

4.3 Physical Setting Sources

4.3.1 Aerial Photographs

Aerial photographs were obtained in order to review the development and land use history of the Site, as well as to the land in the immediate vicinity of the Site. The aerial photographs were obtained from EXP's aerial photograph archive.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in the table below. Copies of the aerial photographs are included in Appendix H.

Aerial Photography Year	Observations
1954	<ul style="list-style-type: none"> • Due to the nature of the aerial photograph, fine details are hard to discern. • The Site appears to be an agricultural field with a building on the southern portion. • Airport Road and Mayfield Road are oriented similar to present day. • The remainder of the Phase One Study Area appears to consist of agricultural land.
1964	<ul style="list-style-type: none"> • The Site has approximately five (5) buildings on the southern portion. • The property to the south of the Site appears to be developed with farm structures. • The remainder of the Site and Phase One Study Area appears similar to the 1954 aerial photograph.
1974	<ul style="list-style-type: none"> • The Site appears similar to the 1964 aerial photograph. • The properties east and northwest of the Site have been developed with structures. • The property to the southwest of the Site appears to have been developed with multiple small structures. • The remaining properties within the Phase One Study Area appear similar to the 1964 aerial photograph.
1988	<ul style="list-style-type: none"> • The building on the west appears to have been demolished. • The property to the east of the Site appears to have been developed with an additional building. • The residences located southeast to the Site have been removed and the property was a vacant lot. • The property to the west of the Site has been developed with three (3) small structures and paved. • The remaining properties within the Phase One Study Area appear similar to the 1974 aerial photograph.

Aerial Photography Year	Observations
1994	<ul style="list-style-type: none"> The property to the southwest of the Site has been developed The Site and remaining properties within the Phase One Study Area appear similar to the 1988 aerial photograph.
2007	<ul style="list-style-type: none"> The area to the south of the Site appears to be developed with residential buildings The property to the southwest of the Site appears to be further developed with residential buildings. The area to the northwest (approximately 100 m) of the Site has been developed with a large industrial/commercial building. The area to the north of the Site has been developed as industrial storage. The area to the southeast of the Site has been developed with residential buildings. The Site and remaining properties within the Phase One Study Area appear similar to the 1983 aerial photograph.
2020	<ul style="list-style-type: none"> All buildings on the Site have been demolished. The property to the south of the Site has been demolished leaving a vacant lot. The area to the far north of the Site has been developed with a large industrial building. The remaining properties within the Phase One Study Area appear similar to the 2007 aerial photograph.

Based on the reviewed aerial photographs, the following PCAs were identified for the Site.

- The Site structures in the south portion of the Site were noted to be demolished in the late 1980s and early 2010s. This aspect is associated with PCA#30 – Importation of Fill Material.

4.3.2 Topography, Hydrology and Geology

The following physiographic, geological and soil maps were reviewed:

- "Toporama"; Natural Resources Canada. Map 30M11. Scale 1:15,000. 2008.
- Quaternary Geology of Ontario - geology_II.shp [computer file], Ontario: Ontario Geological Survey, 2000.
- Bedrock Geology of Ontario - geology_II.shp [computer file], Ontario: Ontario Geological Survey, 2000.

Based on the review of the above maps, the following information was obtained:

- The Site is approximately 230 m above sea level and is generally flat.
- A tributary of Salt Creek is located along the northern border of the Site and flows in an eastern direction towards the West Humber River which leads into Lake Ontario, which is located approximately 28 km southeast of the Site. Based on local topography and the previous reports, the groundwater flow direction in the area of the Site is anticipated to be southeast towards the West Humber River.
- The Site is dominated by glaciolacustrine deposits or shale, consisting predominantly of clay to silt-textured till.

- The bedrock in the general area forms part of a group belonging to the Queenston Formation. It is composed predominantly of shale, limestone, dolostone, and siltstone.

4.3.3 Fill Materials

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property, and to backfill excavations.

Based on the review of aerial photographs, city directories, and FIPs, multiple buildings once resided on Site. Once demolished, they will likely be infilled with fill material of an unknown quality. The presence of the fill materials was confirmed during the previous environmental investigations at the Site which reported that 484 m² of soil was excavated and backfilled on the southeast portion of the property and extended to a depth of approximately 0.5 m bgs. This is associated with PCA#30 – Importation of Fill Material of Unknown Quality.

4.3.4 Areas of Natural Significance

Based on the review of available resources from the Ministry of Natural Resources and Forestry website on June 18th, 2021, no areas of natural significance were identified at the Site or within 30 m of the Site.

4.3.5 Well Records

4.3.5.1 Water Wells

A search of the water well database was conducted by ERIS of the Site and surrounding Phase One Study Area and Ontario Well Records Database to identify water wells within the Phase One Study Area.

Based on the ERIS database records and Ontario Well Records, six (6) wells were installed on-Site, and nineteen (19) wells were installed on lands within the Phase One Study Area.

4.3.5.2 Oil, Gas, and Salt Wells

A search of the Oil, Gas & Salt Resources Library (2014) was completed by ERIS. According to the ERIS search, no oil, gas or salt wells are located on-Site and or within the Phase One Study Area.

4.4 Site Operating Records

In general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Material Safety Data Sheets (MSDS) for all chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and underground storage tanks (USTs); environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and site plans of the facility showing areas of production and manufacturing.

There were no records of environmental significance available for review at the time of this Phase One ESA.

5 Interviews

Interviews were conducted by EXP staff with the individuals identified to be the most knowledgeable with respect to both the current and historical Site uses. The interviews were conducted during the Site reconnaissance in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the Site, and areas of potential environmental concern. Any information provided during the interviews is presented alongside information from the Site reconnaissance in Section 5.

The following individual was interviewed on June 19th, 2021:

- Ms. Leah Axt, Smart Centres (environmental director with the company since 2011)

6 Site Reconnaissance

6.1 General Requirements

The Phase One Site reconnaissance was conducted on June 11th, 2021, between 10:15 am and 10:45 am by Ms. Victoria DePaulo, BSc. On the day of the Site reconnaissance, the weather was sunny.

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix I.

6.2 Specific Observations at Phase One ESA Property

6.2.1 Site Description and Buildings

The subject lot is approximately 23.31 acres (9.43 hectares) in area and is currently vacant. The areas surrounding the Site consist of a Falcon Motor Xpress to the east, residential areas, a vacant lot, and an Esso to the south, Shell, Tim Horton's, and a Farmer's Market to the west, and Grabb-A-Pizza and True Motorway mechanic to the north. The northern and eastern portions of the Site consist of small, wooded areas and the remainder of the Site consists of grass and shrubs.

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix I.

6.2.2 Heating and Cooling Systems

As the Site contained no building structures at the time of the Site visit, this item is not applicable to the Site.

6.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Location	Site Entry
Natural Gas	On street	Not Applicable (N/A)
Sanitary Sewer	On street	N/A
Storm Sewer	On street	N/A
Water	On street	N/A
Electricity	On street	N/A
Telecommunications	On street	N/A

6.2.4 Sewage and Wastewater Disposal

The Site is currently vacant and not connected to the municipal and storm water system.

6.2.5 Potable Water Sources

The Site is currently vacant and not connected to the municipal water source at the time of the Site visit.

6.2.6 Abandoned and Existing Wells

No abandoned or existing monitoring water wells were observed on the Site during the Site visit.

6.2.7 Site Production and Manufacturing

The Site is currently vacant and as such, there are no on-Site production or manufacturing activities.

6.2.8 Drains, Pits and Sumps

No drains, pits, or sumps were observed on Site during the Site visit.

6.2.9 Storage Tanks

The presence/absence and condition (if present) of underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Site were assessed during the Site Visit.

No evidence of active or inactive USTs or ASTs was observed by EXP during the Site visit.

6.2.10 Water Wells

No potable water wells were observed at the time of the Site visit.

6.2.11 Site Housekeeping

The Site was well maintained, with no evidence of misplaced/excessive waste or spills being observed at the time of the Site visit.

6.2.12 Chemical Storage and Handling and Floor Condition

At the time of the Site visit, no liquid waste was generated or stored on Site.

6.2.13 Areas of Stained Soil, Pavement or Stressed Vegetation

No evidence of staining or stressed vegetation was observed during the Site visit.

6.2.14 Fill and Debris

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property and to backfill excavations.

The Site appeared to be at the same elevation as the adjacent properties. However, based on the observations during the previous subsurface investigations, fill materials are present across the Site.

For a discussion on possible fill materials located beneath the surface at the Site refer to Section 4.3.3.

6.2.15 Air Emissions

Air emissions in Ontario are regulated under the Environmental Protection Act (EPA) and its Regulations (O. Reg. 419/05, O. Reg. 245/11, O. Reg. 1/17). Owners and operators of activities that may discharge a contaminant into the natural environment must seek permissions from the Ministry of Environment, Conservation and Parks (MECP) to carry out these activities. As of October 31, 2011, amendments to the EPA resulted in a two-path environmental approval process, the Environmental Compliance Approval (ECA) and Environmental Activity and Sector Registry (EASR). The EASR allows businesses to register certain activities with the ministry, rather than apply for approvals. The EASR is for common systems and processes, initially for heating systems, standby power systems and automotive refinishing, to which preset rules of operation can be applied. Effective January 3, 2017

additional activities were allowed through the EASR process based on the facility's North American Industry Classification System (NAICS) code but required full assessment for compliance of emissions under O.Reg. 419/05. Unless explicitly exempted, most industrial processes or modification to industrial processes and equipment require an ECA, formerly a Certificate of Approval (Air and Noise).

Based on the Site visit, no operations were observed on-Site that would require MECP approval for air emissions.

6.2.16 Polychlorinated Biphenyls (PCBs)

No evidence of PCB containing equipment was observed on the Site at the time of the Site visit.

6.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is "(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry-cleaning equipment" (O.Reg. 153/04).

Based on the information reviewed on the historical use of the Site, the Site is not classified as an Enhanced Investigation Property.

6.4 Adjacent and Surrounding Properties

A visual reconnaissance of the adjacent properties, and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and document any PCAs that may be contributing to an APEC at the Site.

Based on the visual reconnaissance of adjacent and surrounding properties within the Phase One Study Area, the following properties were identified as having operations that contribute towards a PCA as defined in Table 2 of Schedule D;

Direction	Address	Land Use / Occupant	Associated PCA
North	12101 Airport Rd	True Motorway Grabb-a-pizza	PCA#10 - Commercial Autobody Shops PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
Northwest	12050 Airport Rd	Caledon Sabzi Farm- Farmer's Market	None
East	6086 Mayfield Rd	Falcon Motor Xpress	PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
South	Mayfield Road	Residential	None
Southeast	5981 Mayfield Rd	Esso Petrol Station	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and

Direction	Address	Land Use / Occupant	Associated PCA
			material used to maintain transportation systems
West	Airport Road 12016 Airport Rd	Shell Gas Station Tim Horton's	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems

6.5 Written Description of Investigation

A reconnaissance of the Site was conducted by EXP to examine the exterior and interior of all on-Site buildings and structures, and to examine the exterior portions of the Site. Mechanical equipment (including heating and cooling systems) were documented and characterized, as was any evidence of USTs and ASTs. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and, evidence of fill material.

The reconnaissance of the Site included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

7 Review and Evaluation of Information

7.1 Current and Past Uses

Based on a review of historical aerial photographs, chain of title information, previous reports, and other records, the Site was used for agricultural purposes since the 1820s. The buildings on the Site were demolished in the 2010s. The Site is currently vacant.

The current and past ownership of the Site is summarized in Table II in the Appendices.

7.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area are listed in the Conceptual Site Model (CSM) Appendix J and shown on Figure 2.

7.3 Areas of Potential Environmental Concern (APECs)

Based on the inferred groundwater flow direction is anticipated to be to the south/southeast, the properties within the Phase One Study Area south and southeast of the Site were considered to be hydraulically down-gradient of the Site; and, the properties to the east and west of the Site were considered to be hydraulically trans-gradient to the Site. Furthermore, any PCAs located significantly distant from the Site (>100 m) were considered to be too distant to be contributing to an APEC on the Site.

The following PCAs were considered to contribute to an APEC:

- PCAs identified at the Site; and
- PCAs located on immediately adjacent properties (off-Site), in close proximity, or situated up-gradient to the Site with respect to the anticipated groundwater flow direction;

The APECs identified at the Site are summarized in the CSM (Appendix J) and on Figure 4.

8 Conclusions

8.1 Whether a Phase Two ESA is Required

Based on the results and findings of the Phase One ESA, a Phase Two ESA is required to investigate the following APECs identified on the Phase One Property:

Area of Potential Environmental Concern (APEC) ¹	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Importation of Fill Material	South portion of the Phase One Property	PCA#30 – Importation of Fill Material	On-Site	Metals and Polycyclic Aromatic Hydrocarbons (PAHs)	Soil
APEC 2: Waste Generator to the North	Northern portion of the Phase One Property	PCA “Other” – Waste Generator	Off-Site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Groundwater
APEC 3: Gasoline Service Station to the West	Western portion of the Phase One Property	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems PCA “Other” – Waste Generator	Off-Site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Groundwater
APEC 4: Former AST	Southern portion of the Phase One Property	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	On-Site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Soil

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the PI ESA, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

9 Closure

The findings and conclusions of this report have been supervised and reviewed by the undersigned Qualified Person.

As QPESA, I (Jason Slidders), confirm that I have supervised the carrying out of this Phase One ESA, findings and conclusions of this report.

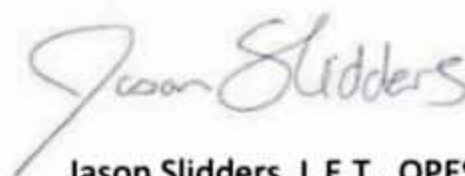

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

EXP Services Inc.

Victoria DePaulo, B.Sc.
Environmental Technician

Appendix A – Liability

LIMITATIONS AND USE OF REPORT

BASIS OF REPORT

The Report is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and EXP's recommendations. Any reduction in the level of services recommended will result in EXP providing qualified opinions regarding the adequacy of the work. EXP can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

RELIANCE ON INFORMATION PROVIDED

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to EXP.

STANDARD OF CARE

This report ("Report") has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

USE OF REPORT

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

REPORT FORMAT

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

Appendix C – Qualifications

Qualifications of Assessors

The records review and Site visit were conducted by Ms. Victoria DePaulo, B.Sc, who has been trained to conduct Phase I and II environmental site assessments (in accordance with the applicable CSA Standards and O.Reg. 153/04). Ms. DePaulo completed a Bachelor of Science Degree in Biology from McMaster University and a post graduate certificate in Environmental Management and Assessment from Niagara College.

This Phase One ESA was reviewed by Jason Slidders, L.E.T. who has over 20 years of experience and is a Senior Project Manager in EXP's Brampton Office and has been with EXP since 2014 (previously with Trow Associates Inc. from 2000 to 2009). Jason obtained his Environmental Technologist Diploma in 1997 from Loyalist College of Applied Arts in Belleville, Ontario. He is an experienced senior specialist, having worked on a variety of environmental assessment, remediation, risk assessment and demolition projects in the past, as well as on numerous hazardous materials and mould assessment and abatement projects. His current responsibilities include the project management, reporting, QA/QC and client liaison with a multitude of clients (private and public sectors). Jason is a Licensed Engineering Technologist (L.E.T.) who manages and coordinates Phase I, II and III Environmental Site Assessments (ESAs), in-situ and ex-situ remediations, risk assessments, demolitions and hazardous materials/designated substances surveys/abatement.

EXP Services Inc. is a full-service consulting and engineering firm and provides a full range of environmental services through the Environmental Services Group. EXP's Environmental Services Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with the Ontario Ministry of the Environment. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:Federal [CDRY](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:Provincial [CFOT](#)

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:Private [CHM](#)

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Apr 30, 2021

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry:

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2021

Environmental Registry:

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Apr 30, 2021

Environmental Compliance Approval:

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Apr 30, 2021

Environmental Effects Monitoring:

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2021

Environmental Issues Inventory System:

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003***National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008***National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2021**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Apr 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Apr 30, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Victoria DePaulo:

RE: ***Freedom of Information and Protection of Privacy Act Request***
Our File # A-2021-02434, Your Reference 20210618112446173

The Ministry is in receipt of your request made pursuant to the *Freedom of Information and Protection of Privacy Act*.

The search will be conducted on the following: Lot 1 Concession 1 Albion, Caledon. If there is any discrepancy please contact us immediately.

You may expect a reply or additional communication as your request is processed. For your information, the Ministry charges for search and preparation time.

Due to the COVID-19 outbreak, requesters may experience some delays with FOI requests at this time.

If you have any questions regarding this matter, please contact Nasreen Salar at or nasreen.salar@ontario.ca.

Yours truly,

Subject: Tank Search for Airport Road and Mayfield Road in Brampton, ON

[CAUTION]: This email originated outside the organisation.

Please do not click links or open attachments unless you recognise the source of this email and know the content is safe.

Good afternoon,

Could you please perform a tank search for the following properties located in Brampton, ON;

1. 5981 Mayfield Rd

2. 5998 Mayfield Rd
3. 12016 Airport Rd
4. 12050 Airport Rd
5. 12101 Airport Rd
6. 11796 Airport Rd
7. 6086 Mayfield Rd

As part of our historical review for a Phase I ESA, we request that the Technical Standards and Safety Authority (TSSA), Safety Fuel Division, review its database to identify to us any records of aboveground/underground storage tanks, spills, incidents, complaints, notices, tanks removals and/or remediation etc. with the TSSA for the above-mentioned properties.

Thank you,

Victoria DePaulo

JUNE 2021

Appendix J – Phase One Conceptual Site Model

Phase One ESA Conceptual Site Model

Northeast Corner of Airport Road and Mayfield Road, Caledon, ON

This section presents the Phase One Conceptual Site Model (P1CSM), as it relates to the Site designated as the Northeast Corner of Airport Road and Mayfield Road, Caledon, ON, providing a narrative and graphical description integrating information related to the areas of potential environmental concern/potential contaminating activities and the presence and distribution of potential contaminants of concern. The P1CSM was completed in accordance with Ontario Regulation 153/04, as amended (O.Reg. 153/04), as defined by the Ontario Ministry Environment, Conservation and Parks (MECP). There is no uncertainty or absence of information noted in the Phase One Environmental Site Assessment.

1.1 Introduction

The Site is located on the Northeast Corner of Airport Road and Mayfield Road, Caledon, Ontario. Details of the Site are as follows:

Table 1: Site Identification Information

Municipal Address	Northeast Corner of the intersection at Airport Road and Mayfield Road, Caledon, ON
Current Land Use	Vacant
Proposed Land Use	Industrial
Legal Description	Part Lot 1 Con 1 Albion Designated as Pt 1 40R-34197
Property Identification Number (PIN)	PIN# 14348-0466 (LT)
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 599720.46 m E 4849653.91 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	GPS
Site Area	23.31 acres (9.43 hectares)
Property Owner, Owner Contact and Address	Airfields Development Inc. & Airfields II Development Inc. Lilly Wu SmartCentres 3200 Highway 7, Vaughn, Ontario L4k 5Z5

1.2 Background

Based on a review of historical aerial photographs, chain of title information, previous reports, and other records, the Site was used for agricultural purposes starting in the 1820s. It has been used historically as agricultural land since. In the early 2010's, the buildings on Site were demolished. Since then, the Site has been vacant.

1.3 Geological and Hydrogeological Conditions

The Site and surrounding areas are expected to consist of glaciolacustrine deposits or shale, consisting predominantly of clay to silt-textured till. The bedrock in the general area consists of shale, limestone, dolostone and siltstone based in the Queenston Formation.

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0*

According to the topographic map from Natural Resources of Canada (Toporama), the elevation of the Site is approximately 230 m above sea level. A tributary of Salt Creek is located along the northern border of the Site and flows in an eastern direction towards the West Humber River which leads into Lake Ontario, which is located approximately 28 km southeast of the Site. Based on local topography and the previous reports, the groundwater flow direction in the area of the Site is anticipated to be southeast towards the West Humber River

Based on the review of available resources from the Ministry of Natural Resources and Forestry website on June 18th, 2021, no areas of natural significance were identified at the Site or within 30 m of the Site.

1.4 Previous Investigations

1. A report entitled "Phase I Environmental Site Assessment, 6034 Mayfield Road, Caledon, Ontario" dated December 2010 was prepared by Barenco Inc. for Calloway Real Estate Investment Trust. A review of this report indicated the following:
 - The report was completed following the principles of the Canadian Standards Association (CSA) Z-768 Guideline and in accordance with generally accepted professional practices.
 - According to a review of aerial photographs, the Site and surrounding properties were generally used for agricultural purposes. Apart from a few farmhouses, there were no other structures on the Site.
 - An above-ground storage tank was found during the Site inspection in the basement of one of the Site buildings – assumed to be used for storing fuel oil.
 - Fill material was observed at the back of one of the Site buildings towards the northwest of the property.
2. A report entitled "Phase I Environmental Site Assessment, Northeast Corner of Airport Road and Mayfield Road, Caledon, Ontario" dated July 2011 was prepared by EXP Services Inc. for SmartCentres. A review of this report indicated the following:
 - The report was completed following the principles of the Canadian Standards Association (CSA) Z-768-01 (November 2001) Guideline and in accordance with generally accepted professional practices.
 - Based on the Phase I ESA findings, there are multiple potential environmental concerns associated with the Site:
 - An above ground storage tank was observed in the basement of one of the residential buildings on Site.
 - Several fill piles were observed during the Site visit. The fill material is of unknown origin and consistency.
 - Due to the age of the buildings on Site, asbestos, PCB, mercury, and lead containing materials may be present on Site.
 - 12117 Airport Road, north adjacent to the Site, is listed as a private fuel outlet as of 2004. Given the close proximity to the Site and the nature of operations, there is a possibility for the operations to impact the Site.
 - The property located north adjacent to the Site at 12101 Airport Road was occupied by AJ Equipment Sales from 1998 to 2001 which is associated with the hazardous waste of halogenated solvents and petroleum distillates.
 - The property located west of the Site at 12016 Airport Road is occupied by a Shell gas station. It is associated with a 10,000 L gasoline UST and a 7,500 L diesel UST.
 - Based on the conclusions from the Phase I ESA, a Phase II ESA, including borehole drilling, soil and groundwater sampling, and chemical analysis, is recommended.

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0*

3. A report entitled "Phase II Environmental Site Assessment, Northeast Corner of Airport Road and Mayfield Road, Caledon, Ontario" dated January 2012 was prepared by EXP Services Inc. for SmartCentres. A review of this report indicated the following:
- The Phase II ESA consisted of advancing three (3) boreholes at the Site which were completed as groundwater monitoring wells.
 - EXP selected the Table 2 Site Condition Standards (SCS) for Industrial/Commercial Property Use with fine-textured soil.
 - The general stratigraphy at the Site consists of silty topsoil, silt and silty clay, overlying silty clay till.
 - The depth to groundwater ranged from 1.83 and 5.52 m bgs. The groundwater below the Site was assessed to flow in a southeasterly direction.
 - Three (3) soil samples were analyzed for PHCs (F1 to F4) including BTEX. All the soil samples collected were below the MOE Table 2 SCS (2011).
 - Three (3) soil samples were also analyzed for metals. The metals in the submitted soil samples were either not detected above the laboratory MDLs or were below the MOE Table 2 SCS (2011).
 - Two (2) soil samples were analyzed for lead. The concentrations of the lead in the submitted soil samples were below the MOE Table 2 SCS (2011).
 - Four (4) groundwater samples were analyzed for PHCs (F1 to F4). PHCs were not detected in the sample.
 - Four (4) groundwater samples were analyzed for VOCs. Acetone was detected in the groundwater sample from MW-2, however the concentration was below the MOE Table 2 SCS. The remaining samples were below the MOE Table 2 SCS (2011).
 - Four (4) groundwater samples were analyzed for metals. The metals in the submitted groundwater samples were either not detected above the laboratory MDLs or were below the MOE Table 2 SCS (2011).
 - No evidence of free product (ie, visible film or sheen), or odour was observed during well purging and groundwater sampling.
 - Based on the results of the Phase II ESA, the contaminants of concern noted on the Phase I ESA are below the applicable MOE Table 2 SCS (2011).
4. A report entitled "Soil Removal Monitoring and Confirmatory Soil Sampling, Northeast Corner of Airport Road and Mayfield Road, Caledon, ON" dated February 2015 was prepared by EXP Services Inc. for Airfield Developments Inc. A review of this report indicated the following:
- EXP provided oversight for the removal of approximately 134 metric tonnes (MT) of suspected PAH-impacted soil from the southeast portion of the Site where there was previously a barn structure.
 - The impacted soil was disposed of at GFL Fenmar Soil Facility in North York, ON.
 - During the completion of the excavation, debris containing wood and metal was encountered within the area of excavation and removed for recycling.
 - The final excavation was rectangular in shape with a floor area of approximately 484 m² and extended to a depth of approximately 0.5 m bgs.
 - Upon completion of the excavation, the floors and sidewalls consisted of topsoil overlaying silt with sand and granular fill material overlaying native sandy silt to an approximate depth of 0.5 m bgs.

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0*

- Eleven (11) soil samples were analyzed for PAHs. All soil samples were found to be below the MOECC Table 1 SCS guidelines.
- Based on the results of the Soil Removal and Confirmatory Soil Sampling program, the concentrations of PAHs in the soil samples collected were in compliance with the applicable MOECC Table 1 SCS.

1.5 Underground Utilities

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance, previous reports and markings noted on the survey drawing provided by the Client. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Location	Site Entry	Utility
Natural Gas	On street	Not Applicable (N/A)	Natural Gas
Sanitary Sewer	On street	N/A	Sanitary Sewer
Storm Sewer	On street	N/A	Storm Sewer
Water	On street	N/A	Water
Electricity	On street	N/A	Electricity
Telecommunications	On street	N/A	Telecommunications

1.6 Potentially Contaminating Activities and Areas of Potential Environmental Concern:

Refer to Table 2 and Figure 2 for the list of potentially contaminating activities (PCAs) that have occurred within the Phase One Study Area, which includes the Site and properties within 250 m radius of the Site boundaries.

Table 2: Potentially Contaminating Activities

PCA Identifier	Address	Location of Activity (in location to Site) ⁽¹⁾	Potentially Contaminating Activity (PCA) ⁽²⁾	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
Site					

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0*

PCA Identifier	Address	Location of Activity (in location to Site) ⁽¹⁾	Potentially Contaminating Activity (PCA) ⁽²⁾	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
1	Northeast Corner of Airport Road and Mayfield Road, Caledon, ON	On-Site	PCA#30 – Importation of Fill Material of Unknown Quality	Based on the records review and previous environmental reports, the Site was historically occupied by barns and a house at the southeast portion of the Site. The buildings have been removed as of the 2020 aerial photo. In 2015, 484 m ² of soil was removed from the southeast portion of the Site where a barn used to be and extended to a depth of 0.5 m bgs. EXP did not oversee the backfilling of the excavation area.	Yes, based on the PCA occurring on-Site.
2	Southern portion of the Phase One Property	On-Site	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	Based on the previous environmental reports, an above-ground storage tank was found during the Site inspection in the basement of one of the Site buildings – assumed to be used for storing fuel oil.	Yes, based on the PCA occurring on-Site.
Surrounding Properties					
3	12101 Airport Road	Off-Site	PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the aerial photographs and Site reconnaissance, True Motorway, an automobile service shop, is located to the north adjacent of the property.	Yes, based on the up-gradient location with respect to inferred groundwater flow
4	12117 Airport Road	40 m north	PCA “Other” – Waste Generator	Based on the reviewed ERIIS report, First Canada ULC was listed as a waste generator between 2007 and 2021 for aliphatic solvents and residues, petroleum distillates, light fuels, waste oils/sludges (petroleum based), and waste crankcase oils and lubricants.	Yes, based on the up-gradient location with respect to inferred groundwater flow.
			PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	Based on the reviewed ERIIS report, Laidlaw Transit Ltd was listed as a waste generator between 2003 and 2006 for oil skimmings and sludges, aliphatic solvents, petroleum distillates, light fuels, and waste oils & lubricants. Laidlaw Transit is listed as having two (2) historic fuel storage tanks as of 2007 and 2008.	Yes, based on the up-gradient location with respect to inferred groundwater flow.
5	Southwest Corner of Mayfield Road and Airport Road	40 m southeast	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain	Based on the reviewed ERIIS report, Beaver Fuels Management Limited is listed on the private and retail fuel storage tanks list in 1995. Penny Gas Bars was listed as a waste generator between 1988 and 1998 for light fuels.	No, based on the down-gradient location with respect to inferred groundwater flow.

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0*

PCA Identifier	Address	Location of Activity (in location to Site) ⁽¹⁾	Potentially Contaminating Activity (PCA) ⁽²⁾	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
			transportation systems		
			PCA "Other" – Waste Generator	Based on the reviewed ERIS report, Canadian Tire Real Estate Limited was listed as a waste generator in 2009 for oil skimmings and sludges.	No, based on the down-gradient location with respect to inferred groundwater flow.
			PCA "Other" – Spill of diesel	Based on the reviewed ERIS report, a spill was reported in 2014 caused by a collision. 500L of diesel spilled to the road. There was no anticipated environmental impact.	No, based on the down-gradient location with respect to inferred groundwater flow.
6	12016 Airport Road	60 m west	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed ERIS report, 2572916 Ontario Inc. is listed as having two (2) full-service liquid fuel tanks in 2009.	Yes, based on the proximity to the Site.
			PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems PCA "Other" – Waste Generator	Based on the reviewed ERIS report, Shell Canada was listed as a waste generator between 2014 and 2021 for oil skimmings and sludges. Based on the Site reconnaissance, Shell Canada has an active gasoline fuelling station and USTs.	Yes, based on the proximity to the Site.
7	12151 Airport Road	60 m north	PCA "Other" – Waste Generator	Based on the reviewed ERIS report, National Express Corp was listed as a waste generator between 2011 and 2013 for waste oils & lubricants, petroleum distillates, and aliphatic solvents.	Yes, based on the up-gradient location with

*Phase One Environmental Site Assessment

GTR-21011807-A0*

PCA Identifier	Address	Location of Activity (in location to Site) ⁽¹⁾	Potentially Contaminating Activity (PCA) ⁽²⁾	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
					respect to inferred groundwater flow
8	5981 Mayfield Road	90 m southwest	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed ERIIS report and City Directory, Penny's Gas Bar is listed as having a retail fuel storage tank. Mayfield Gas Station is listed as having three (3) historic fuel storage tanks as of 1986. Furthermore, they are listed as having ten (10) historic liquid fuel single wall USTs. They are listed as having five (5) delisted fuel tanks in March 2012. 2617919 Ontario Inc is listed on the fuel storage tank list in 1993 for three (3) FS liquid fuel tanks and in 2003 for one (1) FS liquid fuel tank. 1286081 Ontario Limited Div of Jennesis Holdings Corporation had six (6) FS liquid fuel tanks installed in 1988. Holdings Corporation is listed on the list of expired fuels safety facilities. They are listed as having six (6) expired FS liquid fuel tanks as of 2009.	No, based on the down-gradient location with respect to inferred groundwater flow
9	Airport Road at Davis Lane	180 m north	PCA "Other" – Spill of petroleum oil	Based on the reviewed ERIIS report, a spill was recorded in 2008 at the intersection caused by a transport accident. An unknown quantity of petroleum oil was spilled to the ground resulting in soil contamination.	No, based on the nature of the spill and the separation relative to the Site
			PCA "Other" – Spill of gasoline	Based on the reviewed ERIIS report, a spill was recorded in 2020 caused by a collision/accident. An unknown quantity of gasoline and hydraulic oil spilled to the road causing a minor environmental impact.	No, based on the nature of the spill and the separation relative to the Site
10	5955 Mayfield Road	200 m west	PCA "Other" – Spill of natural gas (methane)	Based on the reviewed ERIIS report, a spill of natural gas (methane) was recorded in 2018. The spill was caused by a pipeline hit which caused a spill to air.	No, based on the nature of the spill (i.e., natural gas)
11	10 Perdue Court	250 m northwest	PCA "Other" – Waste Generator	Based on the reviewed ERIIS report, Acon Materials Engineering Corp is listed as a waste generator between 2009 and 2021 for halogenated solvents.	No based on the separation relative to the Site

(1) Distances are approximate. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04, as amended) that is occurring or has occurred in a phase one Study area.

1.7 Areas of Potential Environmental Concern

Based on the evaluation of the PCAs located within the Phase One Study Area, the following areas of potential environmental concern (APECs) were identified, as presented in Figure 4.

Table 3: Areas of Potential Environmental Concern

*Phase One Environmental Site Assessment
Northeast Corner of Airport Road and Mayfield Road, Caledon, ON
GTR-21011807-A0*

Area of Potential Environmental Concern (APEC) ¹	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Importation of Fill Material	South portion of Phase One Property	PCA#30 – Importation of Fill Material	On-Site	Metals and Polycyclic Aromatic Hydrocarbons (PAHs)	Soil
APEC 2: Waste Generator to the North	Northern portion of the Phase One Property	PCA “Other” – Waste Generator	Off-site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Groundwater
APEC 3: Gasoline Service Station to the West	Western portion of the Phase One Property	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems PCA “Other” – Waste Generator	Off-site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Groundwater
APEC 4: Former AST	Southern portion of the Phase One Property	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	On-Site	Petroleum Hydrocarbons (PHCs) and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX)	Soil

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the PI ESA, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.
