April 13, 2022

Mr. Anil Datt Argo Summer Valley Limited 4900 Palladium Way, Suite 105 Burlington, Ontario L7M 0W7

Dear Mr. Datt:

RE: Summer Valley - Financial Impact Study (Caledon, Ontario)

urbanMetrics inc. ("urbanMetrics") is pleased to submit this *Financial Impact Study*. This study has been completed in support of the application by Argo Summer Valley Limited ("Argo") for an Official Plan Amendment and a Draft Plan. This study is being prepared for a site that encompasses four properties which are located in the City of Brampton and the Town of Caledon. That said, this study pertains only to development on lands located in the Town of Caledon, those being, 12211, 12213 and 12231 Hurontario Street, hereafter referred to as the "subject lands".

The purpose of this study is to identify the capital and ongoing operational impact to the Town of Caledon arising from the proposed development. Based on our analysis, we have determined that the proposed development would generate a positive net financial benefit to the Town. We appreciate the opportunity to conduct this assignment on your behalf and we look forward to discussing the results of our report with you.

Yours truly,

> Faluli

Rowan Faludi, MCIP, RPP, CMC, PLE Partner rfaludi@urbanMetrics.ca

Executive Summary

urbanMetrics inc. ("urbanMetrics") has been retained by Argo Summer Valley Limited ("Argo") to estimate the financial impact of the residential development being proposed on four properties located in the Town of Caledon and the City of Brampton; 12197 Hurontario Street, Brampton and 12211, 12213 & 12231 Hurontario Street, Caledon. This residential community being proposed includes detached homes and street-related townhomes.

This study has been requested by the Town of Caledon, to assess the impact of the proposed development on the municipal finances of the Town. As such, this study is based on the residential development being contemplated on the lands located only in the Town of Caledon.

The current plan for the lands located in the Town of Caledon includes 73 residential units at full build-out. This includes 45 townhome units and 28 single-detached homes. It is estimated that these units will accommodate some 237 persons based on projected persons per unit ratios.

The purpose of this *Financial Impact Study* has been to quantify the net financial impact that the proposed development will have on the Town of Caledon. This is accomplished through calculating both one-time and ongoing financial benefit accruing to the Town, as well as the financial costs that the Town could incur to provide services to the future residents on site.

Based on our analysis, we have determined that the project will, on aggregate, have a **positive fiscal impact** on the Town of Caledon.

- The subject site could generate some \$3.09 million in development charge revenue for funding growth-related capital projects in the Town, when the project is fully built-out in 2025. Specifically, the project will contribute:
 - \$1.6 million in development charge revenue for roads and related;
 - \$1.2 million for parks and recreation;
 - **\$170,000** for fire protection services; and,
 - **\$170,000** in other development charges.

The proposed development will generate an additional **\$222,000** in one-time revenues through building permit revenues associated with the residential development on-site.

• To calculate the ongoing net municipal operating impact associated with the proposed development, we have calculated the revenues (property taxes, user fees, fines, charges, etc.) and municipal operating & replacement costs that would likely be incurred by the development of the community.

- Based on this analysis, the proposed development is forecast to generate approximately \$204,000 per annum for the Town of Caledon, when the project is fully built-out by 2025, increasing by 2% per year thereafter.
- Similarly, based on this analysis, the proposed development is forecast to cost the Town of Caledon nearly \$126,000, per annum in municipal operating expenses, when the project is fully built-out by 2025, increasing by 2% per year thereafter, aside from the scheduled long-term replacement of hard infrastructure, including roads and storm sewers.
- Based on this methodology, on an ongoing basis, the proposed development is expected to generate a revenue surplus of approximately \$78,000 per year at full build-out in 2025. The operating surplus identified will provide the Town of Caledon with an opportunity to upgrade or replace existing facilities or infrastructure throughout the Town without compromising existing or future municipal finances.

1.0 Introduction

urbanMetrics inc. ("urbanMetrics") has been retained by Argo Summer Valley Limited to estimate the financial impact for the lands located in the Town of Caledon and the City of Brampton. The site encompasses four properties: 12197 Hurontario Street, Brampton and 12211, 12213 & 12231 Hurontario Street, Caledon. This residential community being proposed includes detached homes and street-related townhomes.

The Town of Caledon requires the completion of this *Financial Impact Study*. Therefore, the analysis included herein pertains only to the development being proposed on the three sites located in the Town of Caledon, hereafter referred to as the "subject lands".

1.1 Objective and Approach

Argo Summer Valley Limited recently acquired a property in the Town of Caledon and the City of Brampton and intends to develop these lands with residential uses. The site includes three properties located in the Town of Caledon; 12211, 12213 & 12231 Hurontario Street, and one property located in the City of Brampton; 12197 Hurontario Street.

As part of the Official Plan Amendment and Draft Plan, the Town of Caledon has requested that a *Financial Impact Study* be prepared to assess the financial impact of the development on the Town's capital and operating budget, specifically the cost and timing of required municipal infrastructure necessary to support the development as proposed. As this study is required by the Town of Caledon, anticipated costs and revenues included herein pertain only to the proposed development which is located in the Town of Caledon (i.e., 12211, 12213 & 12231 Hurontario Street).

To determine the net fiscal impact of the development on the subject lands on the Town of Caledon, the following onetime and ongoing revenues and costs have been calculated.

Revenue

- Development Charges (one-time);
- Building Permit Fees (one-time);
- Annual Property Taxes (ongoing); and,
- Other Non-Tax Revenues (i.e., user fees, fines and other revenues) (ongoing).

Costs

• Required Municipal Capital Projects (one-time);

- Operational Costs to Service New Development (i.e., road maintenance, provision of emergency services, community recreation programming, stormwater operating costs, etc.) (ongoing);
- Incremental Operating Costs (i.e., operating costs associated with new roads, and stormwater infrastructure on site) (ongoing); and,
- Lifecycle Capital Costs (i.e., lifecycle costs to replace the incremental capital assets that are directly related to the proposed development).

It should be noted that all estimated revenues and expenses are stated in 2021 dollars and have been inflated at a rate of 2% annually.

2.0 Proposed Concept Plan

The current concept plan includes only residential development, predominantly detached housing with some street related townhomes. Figure 2-1 illustrates the concept plan for the site, located just northeast of the Hurontario Street and Highwood Road intersection. As shown, the proposed concept plan encompasses development on lands located in the Town of Caledon and the City of Brampton, this includes lands at 12197 Hurontario Street, City of Brampton; and 12211, 12213 & 12231 Hurontario Street, Town of Caledon.

SOURCE: Preliminary Concept Plan provided by Argo Summer Valley Limited on April 11, 2022.

Residential Development

Based on the current concept plan, the site contains 81 residential units at full build-out. This includes 8 units on the lands located in Brampton, and 73 units on the subject lands in Caledon. The analysis included herein pertains specifically to development proposed on the lands located in the Town of Caledon. As summarized in Figure 2-2, the 73 units in Caledon are comprised of 45 townhomes, and 28 single-detached homes.

	Units	% of Project
Caledon Lands		
Single-Detached	28	35%
Townhomes	45	56%
Sub-Total	73	90%
Brampton Lands		
Single-Detached	8	10%
Sub-Total	8	10%
Total	81	100%

Figure 2-2: Residential Composition

SOURCE: urbanMetrics inc., based on Preliminary Development Concept Plan, and unit estimates provided by Argo Summer Valley Limited on March 16, 2022.

To estimate the population that could ultimately be accommodated on the subject site, we have relied on person per unit (PPU) factors by dwelling type, included in the Town of Caledon's 2021 Development Charges Background Study ("DCBS") Update, prepared by Watson & Associates Economics Ltd. and adjusted these PPU factors to include net undercoverage.

The total 73 residential units on the subject lands are forecast to accommodate some 237 persons at full build-out, as shown in Figure 2-3.

	Units	PPU ¹	Anticipated Population
Single-Detached	28	3.802	106
Townhomes	45	2.894	130
Total	73		237

Figure 2-3: Development Phasing and Population Potential

SOURCE: urbanMetrics inc.

¹ Based on Town of Caledon 2019 Development Charges Background Study, adjusted for net undercoverage.

We have also estimated the development phasing for the subject site to better understand when related revenues and costs will be incurred. The phasing for this project is based on recent absorption trends for various housing developments in the Town of Caledon. Based on our review, we have arrived at the following absorption rates for the various forms of housing being introduced on the subject lands:

- 50 single-detached units per year; and,
- 70 townhome units per year.

These absorption rates have been applied to the subject lands to determine when units will be build-out. As a result—and owing to the small-scale of this development—we have assumed that the development will commence and culminate in 2025.

The proposed development is consistent with the existing housing stock in Caledon, particularly existing development northeast of the subject lands along Donherb Crescent and Lightheart Drive, and north of Highway 410 extending from Royal Valley Drive. Townhomes will also help diversify the existing housing stock without conflicting with existing residential uses in the area.

Infrastructure Timing

A high-level summary of the internal infrastructure associated with the subject lands is shown in Figure 2-4. This includes infrastructure such as, internal roadways, stormwater infrastructure and road-related infrastructure that is intended to service the subject lands.

In this *Financial Impact Study*, we have built-in infrastructure to align with our assumed phasing plan for the subject lands. Therefore, it is assumed that this infrastructure will be developed when the project is initiated in 2025.

Infrastructure	Unit	Quantity
Roads	Lineal Metres	426.00
Storm Sewer Mains	Lineal Metres	438.04

Figure 2-4: Subject Lands - Community Infrastructure

SOURCE: urbanMetrics inc.

NOTE: Provides a high-level summary of infrastructure on the subject site. The detailed Financial Impact Analysis includes all infrastructure associated, including, sidewalks, curbs, lighting, and rehabilitation.

3.0 Capital Infrastructure

The purpose of this analysis is to determine how the Town of Caledon will be affected by any capital infrastructure required to develop the subject site. To quantify this impact, we have calculated the revenue that the Town would accrue, which includes the value of:

- Development Charges; and,
- Other one-time fees such as building permits.

3.1 One-Time Revenues

Development charges are used by municipalities as a source of revenue to recover growth-related capital costs for new infrastructure. For the purposes of this analysis, we have relied on the Development Charge Update Study as provided April 29, 2021. This Town-wide Development Charge Background Study (including addendum) and by-law amended the Town of Caledon's Development Charge By-law 2019-31 and applies to all lands in the Town. It effectively brings the Town's development charges into conformity with the recently legislated changes to the Development Charges Act. The amendment adjusted and consolidated Development Charge Eligible Costs in the Town, it also removed the 10% statutory deduction included in the 2019 Town of Caledon Development Charge Background Study for Parks and Recreation Services, Library Services, Provincial Offences Act Services, and the Development Related Studies class of service.

The Town-wide development charges were updated in February 2022. We have used these February 2022 rates to estimate the revenues for new residential development on the subject lands. As per recent changes, development charges in the Town of Caledon are used to fund capital infrastructure for the following service areas:

- Roads and Related;
- Fire Protection Services;
- Parks and Recreation;
- Library Services;
- Animal Control; and,
- Provincial Offences Act.

It should be noted that development charges for Animal Control are uncertain, however they are being maintained through to September 18, 2022; as the Town considers the specific funding implications for these growth-related needs. Until adjustments are determined, development charges accrued for Animal Control as a result of this development, have been included in this study. We would note that the Animal Control Charge is very small and would have only an extremely marginal impact on the municipal revenues available from the development.

Based on the updated development charge rates and amendments to the development charge eligible capital costs, it is estimated that the project will generate approximately \$3.09 million in development charge revenue at full build-out¹. Figure 3-1 summarizes the distribution of development charges by service area at full build-out. Appendix A provides details on when development charges are expected to accrue to the Town of Caledon by service area, based on our forecasted development phasing.

As shown, Roads and Related, could account for approximately 51.0% of development charge revenue generated from this development, while 38.0% is attributed to Parks and Recreation. These development charges will go towards funding capital infrastructure required to support population growth on the subject lands and other areas of Caledon, including parks and recreation, roads and related infrastructure, and municipal services, among others.

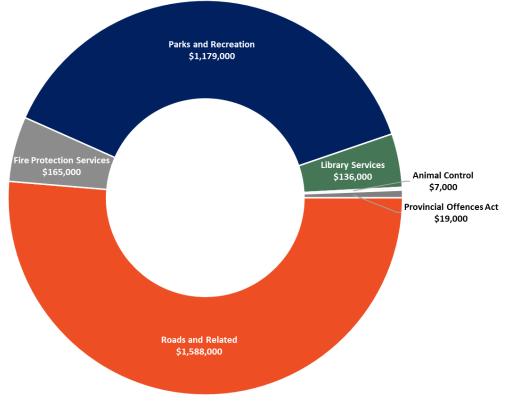

Figure 3-1: Development Charge Revenue Generated by the Subject Lands

SOURCE: urbanMetrics inc. NOTE: Rounded to the nearest \$1,000.

¹ Based on assumed development phasing. Assumes development charges will increase at a rate of 2% per year.

When reviewing Figure 3-1, it is important to note that these development charges are based on the current development charge by-law and inflated by 2.0% per year. If future capital infrastructure projects are added to the capital infrastructure program in future development charge by-laws, such as the next update in 2024, development charges could increase at a faster rate than our assumed rate of inflation, which would result in additional revenue for the Town. Further, we note that the Town of Caledon is considering adding a Transit development charge, as an additional service area or stand-alone revenue source to recover growth-related capital costs. The proposed development would contribute additional revenue to a Transit charge—or any other development charge being contemplated by the Town over the build-out of the development.

3.2 Timing of Capital Infrastructure

While new dwellings on the subject lands will generate approximately \$3.09 million in development charge revenue, the 2021 DCBS update does not include any capital infrastructure projects that are internal to the community. Therefore, the development charges collected from the build-out of subject lands will go towards funding capital infrastructure in other areas of Caledon, including Mayfield West.

As part of this *Financial Impact Study*, we have also reviewed the phasing of new development within the proposed community in comparison to the availability of planned services such as fire protection and other community services such as library and recreation facilities.

As detailed in Figure 3-2, based on the 2021 DCBS update, new community infrastructure in Mayfield West, including the Mayfield Recreation Complex Expansion, the Mayfield West Facility 2, the Mayfield West 2 Library Branch, and the Mayfield West Fire Station (Station #310) are all anticipated to be developed between 2023 and 2026. There is only one community park anticipated to be developed in 2027, and one neighbourhood park anticipated for 2028.

Evidently, the completion of most facilities will occur prior to or alongside the build-out of the subject lands, which is anticipated to be completed in 2025. Therefore, it is anticipated that there will be sufficient services available nearby to support the development as proposed.

Service Area	Year
Parks and Recreation Services	
Tournament Sports Park (15 Acres)	2023 - 2026
Community Park (5 Acres) - Mayfield West II	2021 - 2022
Neighbourhood Park (1 Acre) - Mayfield West II	2023 - 2023

	11050	Cupicui	minustructure

SOURCE: urbanMetrics inc., based on the Town of Caledon 2021 Development Charges Update Study.

3.3 Building Permit Revenue

In addition to development charges, the development of the subject lands will generate one-time revenues to the Town of Caledon by way of building permit fees. In particular, we have identified and evaluated the development permitting fees that are collected by the Town to recover staff costs and other costs associated with building permits.

Building permits are an important one-time revenue for municipalities. Based on the Town of Caledon January 2022 rates, we have estimated building permit fees payable for the proposed residential and commercial uses.

As shown in Figure 3-3, we estimate that the proposed development will generate approximately \$222,000 in total building permit revenue for the Town in 2025, at full build-out. Further details are provided in Appendix A.

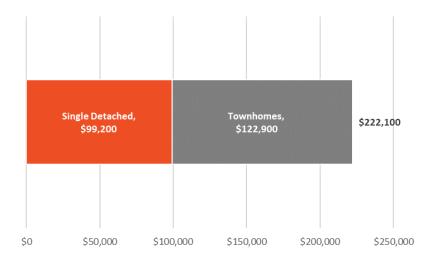

Figure 3-3: Potential Building Permit Revenue

SOURCE: urbanMetrics inc., based on the Town of Caledon Building Permit Fees (Bylaw No. 2021-05, effective January 2022). Rounded to nearest \$100.

4.0 Ongoing Operational Impacts

The proposed development will generate on-going revenue for the Town of Caledon, namely property taxes and non-tax revenue sources such as user fees, fines, etc. The following section calculates revenues from each of these sources based on the residential units in the proposed development and in the Town of Caledon.

Further, this section summarizes the additional operating costs associated with the anticipated persons that could be supported on the subject lands. These ongoing revenues and costs will be important in understanding the net operating impact of the project on the finances of the Town.

4.1 Assessed Value and Property Taxes

Current assessed values were obtained directly from various resources and were based on recent comparable developments within Caledon. A detailed list of these comparable properties is included in Appendix B. Our analysis also assumes that assessed values will increase at a rate of 2.0% per year.

Property Type	Assessed Value
Single Detached	\$708,000 per unit
Traditional Townhomes	\$514,000 per unit

Figure 4-1: Summary of Assessed Values

SOURCE: urbanMetrics inc., based on information from a variety of resources. NOTE: Rounded to the nearest \$1,000.

urbanMetrics has estimated the annual property tax revenue that would be payable to the Town of Caledon in each year of the proposed development. In total, the concept plan proposed on the subject lands could generate approximately \$174,000 in annual property tax revenue when it is fully built-out in 2025 and increasing at a rate of 2.0% per year in subsequent years. The calculated property tax revenue assumes 2021 property tax rates with no rate escalation, aside from increases in assessed values.

We do note that if property tax rates were to increase, it would increase the property tax revenue received by the Town. Detailed property tax tables can be found in Appendix D.

4.2 Non-Property Tax Revenue

In addition to property taxes, municipalities can generate revenue from several other sources. These non-tax revenues include user fees, fines, charges, penalties, etc. We have

calculated these non-tax revenues based on the most recent 2020 Financial Information Return (FIR) filed by the Town of Caledon with the Ministry of Municipal Affairs.

These non-tax revenues are summarized by category (i.e., payments in lieu of taxes, grants, fines, penalties, etc.). We have then made assumptions for the portion of non-tax revenue that would increase in proportion to the residential growth on the subject lands, to calculate the growth-related non-tax revenue.

For user fees and service charges, we have examined these charges by service area. User fees for water and wastewater services have been excluded in these calculations as operating revenues and costs associated with water and wastewater are incurred by the upper-tier municipality, the Region of Peel, and have no impact on the finances of the Town. Fees related to licences and permits, such as building permits have been calculated separately in Section 3.3. The residential share, as well as the growth share for each service area are detailed in Appendix C.

As shown in Figure 4-2, the annual non-tax revenue has been estimated at approximately \$119 per resident in 2021 dollars. We have also assumed that non-tax revenue per resident increases at a rate of 2% per year.

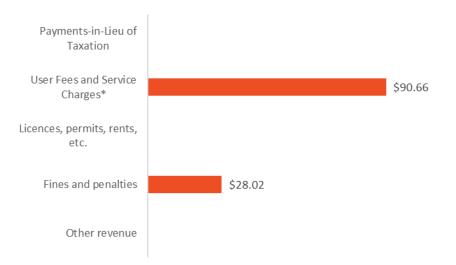

Figure 4-2: Estimated Annual Non-Tax Revenue Per Resident

*Excludes water and wastewater fees.

SOURCE: urbanMetrics inc. based on the Town of Caledon 2020 Financial Information Return, inflated to the year 2021.

Figure 4-3 summarizes the property tax and non-property tax revenue generated by the proposed concept plan for the subject lands. As shown the project is estimated to start generating revenue for the Town of Caledon in 2025, some \$204,000 per annum and

increasing by 2.0% per year thereafter. Approximately 85% of revenue is estimated to come from property taxes.

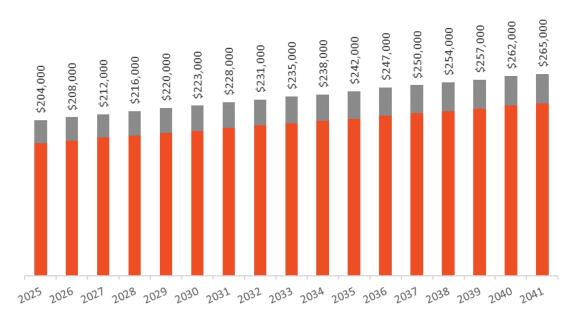

Figure 4-3: Town of Caledon Revenue from the Subject Lands

Town of Caledon Non-Tax Revenue (Excluding Water and Wastewater)

Town of Caledon Property Tax Revenue

SOURCE: urbanMetrics inc. NOTE: Rounded to nearest \$1,000.

4.3 Municipal Operating Costs

To estimate ongoing operational costs that could be incurred by the Town, which are related to the proposed development on the subject lands, we have estimated costs from three sources:

- Municipal-wide Operational Costs (i.e., provision of emergency services, community recreation programming, etc.), which have been estimated on a per resident basis.
- Incremental Operating Costs The annual operating costs associated with new roads and parks infrastructure that are required on-site to service development.

• Lifecycle Capital Replacement Costs – Lifecycle replacement costs for the on-site incremental capital assets that are directly related to the proposed development.

Municipal Wide Operating Costs Per Resident

The approach we have utilized to estimate municipal-wide operating costs has relied upon the operating expenditures taken from Schedule 40 in the FIR submitted by the Town of Caledon to the Ministry of Municipal Affairs and Housing. Operating expenses listed in Schedule 40 are grouped by object expenses identified below:

- Salaries, Wages and Employee Benefits includes expenses incurred for full-time, part-time and temporary salaries and wages including regular, overtime, shift premiums and other remuneration to employees.
- Interest on Long-Term Debt interest incurred on long-term liabilities and for leased tangible capital assets.
- Materials includes materials purchased by a municipality for its own uses and/or disposal or resale. This also includes expenses for insurance, travel, reimbursement of mileage, photocopying and materials purchased by the municipality which are subsequently provide to a third party.
- **Contracted Services** includes expenses incurred when a municipality is responsible for providing a service(s) and contracts out service delivery. This could include services contracted out to a private contractor, another municipality or another level of government.
- Rents and Financial Expenses includes rents and financial expenses paid to external parties, including expenses for rental of buildings, land, machinery, equipment, and engineering structures.
- External Transfers this category includes transfers to charitable organizations, conservation authorities, individuals (i.e., social assistance) and unconsolidated local boards. Amounts billed by the Province for social housing are also reported under this category.
- Amortization includes the annual amortization expenses for tangible capital assets.

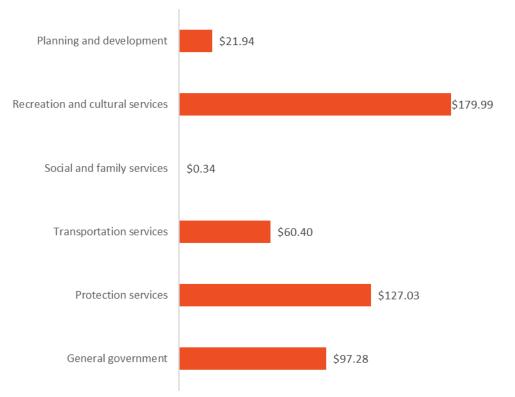

After allocating adjusted operating expenditures between the residential and nonresidential sectors, we have estimated the degree to which adjusted operating expenditures will change with additional growth, by applying a "growth-related" factor. In some cases, this growth-related factor recognizes that there would be nearly proportionate increases in operating costs in comparison to the operating expenditures

being incurred by the Town to provide services to existing residents and employees, with a small allowance made for efficiencies and economies of scale. That being said, there are some services, such as general government, planning and development and solid waste collection where costs will likely grow at a slower pace than population/employment growth, as there are greater opportunities for economies of scale.

Figure 4-4 summarizes our operation costs per resident assumptions based on the FIRs and growth-related factors summarized above. As shown, the Town of Caledon's growth-related annual operating costs amount to approximately \$487 per capita. We have similarly assumed that non-tax revenue per capita increases at a rate of 2% per year. Details are provided in Appendix C.

Figure 4-4: Town of Caledon Per Resident Growth-Related Operating Expenditures

SOURCE: urbanMetrics inc., based on the 2020 Town of Caledon Financial Information Return, inflated to the year 2021.

Annual Operating Costs for New Site-Specific Infrastructure

Our analysis also includes the costs of operating and maintaining infrastructure that is internal to the proposed development, which was summarized previously in Figure 2-4. This includes infrastructure related to the roads associated with the development on the subject lands.

For the purposes of this analysis, we have utilized operating and maintenance costs taken from the 2020 FIR for Winter Control Costs and Park Operations to get a general idea of other potential operating costs that may accumulate from the proposed development. Annual operating costs were then divided by the quantity of infrastructure to determine the operating costs per unit. We have then applied these annual per unit costs to the infrastructure that will be developed within the subject lands. The operating costs used in our analysis are summarized in Figure 4-5.

The Town of Caledon may also accrue additional operating fees related to street lighting, including bulb replacement and maintenance, and the use of/or access to electricity (i.e., Hydro One Networks Inc.) ("HONI"). This additional cost will be similarly tied to the eventual integration and distribution of streetlights within the proposed development.

We would also note that these annual operating costs are to some extent captured by the Municipal Operating Costs per Resident estimates detailed above. However, we have included the estimates and costs in Figure 4-5 as an example of what operating costs may be accrued for, and how they may be utilized.

	Operating Costs ¹		Units	Per Unit (2020 dollars)	Per Unit (2021 dollars)
Winter Control - Street Sidewalks, Parking	\$3,210,027	1,583	Paved Lane KM	\$2,028	\$2,068

SOURCE: urbanMetrics inc.

¹ Includes Salaries, Wages and Employee Benefits, Materials, Contracted Services, Rents and Financial Expenses and External Transfers from the Town of Caledon 2020 Financial Information Return.

The results of our analysis are summarized in Figure 4-6, with detailed tables included in Appendix E. In our analysis, we have taken the conservative approach of assuming that all roads are developed and conveyed to the Town in 2025. The actual development of roads is likely to take place incrementally as development proceeds and therefore will have less of an impact on municipal finances.

As shown, on-site operating costs are estimated at approximately \$1,900 per year in 2025 when the subject lands are fully built-out and increasing by 2.0% per year thereafter.

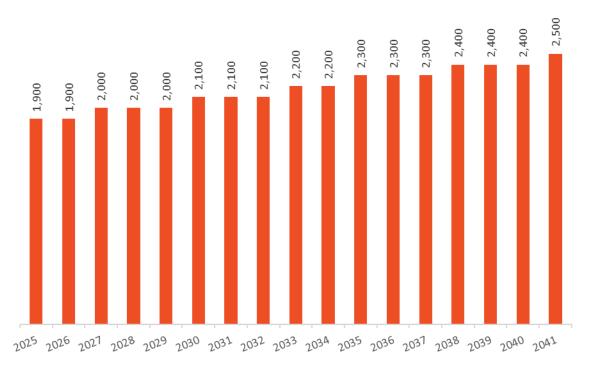

Figure 4-6: Operating Costs for New Site-Specific Road Infrastructure

Lifecycle Replacement Capital Costs for New Site-Specific Infrastructure

In addition to annual operating costs associated with new site-specific infrastructure, our analysis also includes the lifecycle capital costs to replace the infrastructure at the end of its estimated useful life. The replacement costs per unit and estimated useful life is based on information provided by the Town of Caledon. For some infrastructure, we have relied on cost estimates and the estimated useful life, provided in the 2018 Asset Management Plan for the Town of Caledon.

Estimated replacement costs (in 2021 dollars) and the estimated useful life for infrastructure is summarized in Figure 4-7.

SOURCE: urbanMetrics inc., based on Town of Caledon 2020 Financial Information Return. NOTE: Rounded to the nearest \$100.

	Units	Cost Per Unit	Estimated Service Life

Figure 4-7: Estimated Replacement Costs and Service Life

SOURCE: urbanMetrics inc., based on cost estimates included in the 2018 Asset Management Plan for the Town of Caledon.

Based on the assumed phasing of infrastructure, we have calculated the annual lifecycle replacement costs for each year based on the on-site infrastructure. Figure 4-8 summarizes these costs over a 100-year timeframe to reflect some the extended useful life of some infrastructure relative to others. Over this 100-year timeframe, all infrastructure is expected to be replaced at least once.

As shown in Figure 4-8, owing to the size and scale of the proposed development, lifecycle costs in the early years are expected to be modest and are generally related to road rehabilitation, resurfacing, and maintenance. Additional lifecycle costs in the longer-term are related to the maintenance and replacement of storm sewer mains.

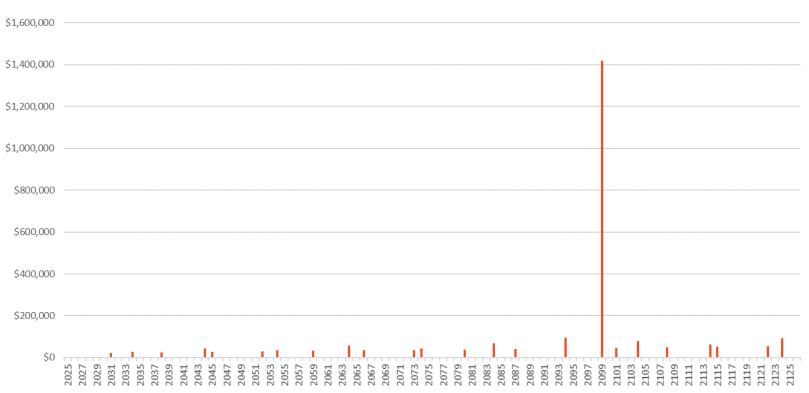

Figure 4-8: Lifecycle Replacement Costs for Infrastructure on the Subject Lands

SOURCE: urbanMetrics inc., based on information provided by the Town of Caledon.

4.4 Net Operating Impact

To estimate the net operating impact associated with the proposed development we have compared the municipal revenues that could be generated by the development to the estimated operating costs that could be incurred by the Town of Caledon in each year.

The total annual operating impact of the subject lands is summarized in Figure 4-9. As shown, with the proposed development of the subject lands, is expected to result in an operating surplus in each year of operation. The operating surplus identified in Figure 4-9 provides the Town with an opportunity to upgrade or replace existing facilities or infrastructure in other parts of the Town without being a drain on municipal finances.

5.0 Summary

urbanMetrics has been retained to estimate the financial impact of the proposed development on the subject lands, including three properties: 12211, 12213 & 12231 Hurontario Street, Caledon. A *Financial Impact Study* is identified in Policy 5.10.3.27.7 f) of the Town of Caledon Official plan as a requirement prior to the Town considering an amendment for the release of Policy Areas for development. This study—along with other assessments and studies detailed in Policy 5.10.3.27.7 f)—to ensure development in the Policy Area is appropriate and will be well planned come the plan of subdivision/condominium approval stage.

Overall, this *Financial Impact Study* seeks to inform the Town on key financial pressures that may result from the proposed project, in order to assist the Town in managing growth over the longer-term planning period. Based on our analysis, we have determined that the project will, on aggregate, have a positive fiscal impact on the Town.

The following summarizes our results pertaining to the fiscal impact on the Town of Caledon.

- The fiscal impact analysis included in this report is based on residential development on lands located in the Town of Caledon only. This includes 73 residential units, some 45 townhome units and 28 single-detached units.
- While an exact development phasing plan has not yet been determined for these lands, we have analyzed the construction of the subject lands on a year-by-year basis to assess the financial impact of the project. Based on development trends in the surrounding area, we have assumed that the full build-out of this community will occur by 2025.
- It is estimated that the 73 units being proposed will accommodate approximately 237 persons at full build-out in 2025.
- The Town of Caledon can expect to accrue approximately \$3.32 million in one-time revenues from the proposed development, mainly driven by development charges.
 - \$3.09 million in total residential development charges;
 - \$1.6 million in development charge revenue for roads and related;
 - \$1.2 million for parks and recreation;
 - \$170,000 for fire protection services; and,
 - \$170,000 in other development charges.
 - \$222,000 in building permit fees.

- At full realization (2025), this development will generate \$204,000 in ongoing revenues for the Town of Caledon, per annum. Both property taxes and non-tax revenue are anticipated to increase by 2% per year thereafter.
 - \$174,000 in annual property tax; and,
 - \$30,000 in non-tax revenue.

Overall, the proposed development is expected to generate an annual revenue surplus for the Town of Caledon. The operating surplus identified will provide the Town with an opportunity to maintain and upgrade existing facilities or infrastructure without compromising current municipal finances.
