## 1.0 EXECUTIVE SUMMARY

*Toronto Inspection Ltd.* was retained by Tullamore Industrial GP Limited to conduct a Phase One Environmental Site Assessment (Phase One ESA) for a property located at Blocks 1 to 37, Part of Lots 18, 19 and 20, Concession 6, East of Hurontario Street, Part of Lots the Road Allowance Between Lots 17 and 18, Concession 6, East of Hurontario Street, Town of Caledon, Regional Municipality of Peel (hereinafter referred to as the 'Site' or the 'Phase One Property'). The Phase One ESA was conducted in accordance with Ontario Regulation 153/04, Records of Site Condition – Part XV.1 of the Environmental Protection Act, (O. Reg. 153/04 as amended). It is understood that this Phase One ESA was conducted as part of the requirements for a Record of Site Condition.

The objective of the Phase One ESA was to determine if there is evidence of actual or potential contamination as a result of the current and/or historical activities on-Site or the surrounding properties that could result an adverse environmental impact on the Phase One Property.

The Phase One Property is a large piece of land located northwest of the intersection between Torbram Road and Mayfield Road in Caledon, Ontario. The Phase One Property, which has been historically used for residential and agricultural purposes has an approximate area of 170.80 ha (422 ac) and it was considered to have been first developed prior to 1878 for residential and agricultural purposes.

Based on the local topography, local groundwater flow direction is anticipated to be influenced by the existing West Tributary and East Tributary as well as the surface drainage features which currently assist in draining the agricultural lands. The general direction for local groundwater flow is to the southeast. The surficial geology in the area generally consisted of till, comprised from clay to silt-textured till (derived from glaciolacustrine deposits or shale). The bedrock geology in the Study Area is the Queenston Formation generally consisting of shale, limestone, dolostone and siltstone. Based on a previous environmental investigation conducted at the Site, weathered shale bedrock was encountered at a depth of 12.0 m below grade.

Based on the findings from records review, site reconnaissance and interviews, the Phase One ESA has revealed the following PCAs within the Site and Phase One Study Area that may represent a potential to adversely impact the subsurface soil and/or groundwater at the Site:

Location	Potential Environmental Concerns	Potentially Contaminating Activity (Table 2, Schedule D of O. Reg. 153/04)	Potential to Impact Site
Site	Historical agricultural use	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Yes
	Historical AST located at the southeast portion of the Site	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
5762 Mayfield Road Adjacent to the south of Site	Historical AST#1	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
	Historical AST#2	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
	Historical AST#3	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes

Location	Potential Environmental Concerns	Potentially Contaminating Activity (Table 2, Schedule D of O. Reg. 153/04)	Potential to Impact Site
12484 Airport Road <i>Adjacent to the northeast of Site</i>	Two ASTs were observed on the property.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	No. ASTs were empty and not in use. No staining was identified in the vicinity of the tanks.
12542 Airport Road <i>Adjacent to the northeast of Site</i>	Two ASTs were observed across the creek close to the barn.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	No. ASTs were empty and not in use. No staining was identified in the vicinity of the tanks.
12404 Airport Road <i>Adjacent to the northeast of Site</i>	Presence of an AST and spill incident of 20 liters of diesel.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
10 Perdue Court <i>Adjacent to the southeast of Site</i>	Waste generator of halogenated solvents	NA <sup>1</sup> – Waste Generator	Yes
34 Perdue Court <i>Adjacent to the southeast of Site</i>	Presence of an auto repair with waste generator records.	PCA#10 – Commercial Autobody Shops	Yes
43 Perdue Court <i>Adjacent to the southeast of Site</i>	Waste generator of aromatic solvents and residues	NA <sup>2</sup> – Waste Generator	Yes
12203 Airport Road <i>Neighbouring to the east of Site</i>	Waste generator of petroleum distillates, aliphatic solvents, waste oils and lubricants, etc.	NA <sup>3</sup> – Waste Generator	Yes
	Spill incidents of 35-40 L of hydraulic oil to ground and of 25 litres of diesel to asphalt.	NA <sup>4</sup> - Spill	Yes

Based on the identified PCAs, the following APECs were considered for the Phase One Property:

APEC	Location of APEC on Phase One Property	Potentially Contaminating Activity (Table 2, Schedule D of O.Reg. 153/04)	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, Soil and/or Sediment)
APEC-1	Entire Site	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	OCs, Metals, Hydride-Forming Metals (As, Se and Sb),	Soil and Groundwater
APEC-2	Southeast Portion of Site	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site	PHCs, BTEX, VOCs	Soil and Groundwater
APEC-3	South of Site (Adjacent to 5762 Mayfield Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-4	South of Site (Adjacent to 5762 Mayfield Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-5	South of Site (Adjacent to 5762 Mayfield Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater

APEC	Location of APEC on Phase One Property	Potentially Contaminating Activity (Table 2, Schedule D of O.Reg. 153/04)	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, Soil and/or Sediment)
APEC-6	Northeast of Site (Adjacent to 12404 Airport Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-7	Southeast of Site (Adjacent to 34 Perdue Court)	PCA#10 – Commercial Autobody Shop	Off-Site	PHCs, BTEX, VOCs, Metals, Hydride-Forming Metals (As, Se and Sb)	Groundwater
APEC-8	Southeast of Site (Adjacent to 43 Perdue Court)	NA <sup>2</sup> – Waste Generator of aromatic solvents	Off-Site	VOCs	Groundwater
APEC-9	Southeast of Site (Adjacent to 10 Perdue Court)	NA <sup>1</sup> – Waste Generator of halogenated solvents	Off-Site	VOCs	Groundwater
APEC-10	East of Site (Adjacent to 12203 Airport Road)	NA <sup>3</sup> – Waste Generator of petroleum distillates, aliphatic solvents, waste oils and lubricants, etc.	Off-Site	PHCs, BTEX, VOCs, Metals, Hydride-Forming Metals (As, Se and Sb)	Groundwater
APEC-11	East of Site (Adjacent to 12203 Airport Road)	NA <sup>4</sup> - Spill	Off-Site	PHCs, BTEX, VOCs	Groundwater

Based on the findings of this Phase One ESA, eleven (11) APECs have been identified on the Phase One Property. Therefore, it is *Toronto Inspection Ltd.*'s opinion that a Phase Two Environmental Site Assessment is required for the Phase One Property.

## 2.0 INTRODUCTION

*Toronto Inspection Ltd.* was retained by Tullamore Industrial GP Limited to conduct a Phase One Environmental Site Assessment (Phase One ESA) for a property located at Blocks 1 to 37, Part of Lots 18, 19 and 20, Concession 6, East of Hurontario Street, Part of Lots the Road Allowance Between Lots 17 and 18, Concession 6, East of Hurontario Street, Town of Caledon, Regional Municipality of Peel (hereinafter referred to as the 'Site' or the 'Phase One Property'). The Phase One ESA was conducted in accordance with Ontario Regulation 153/04, Records of Site Condition – Part XV.1 of the Environmental Protection Act, (O. Reg. 153/04 as amended). It is understood that this Phase One ESA was conducted as part of the requirements for a Record of Site Condition.

### 2.1. Objectives

The Phase One ESA was conducted to determine if there is evidence of actual or potential contamination at the Site and if the activities of surrounding properties pose an environmental concern to the Site, for the purpose of satisfying the Phase One ESA general objectives as listed in O. Reg. 153/04 as amended:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the phase one property.
- To determine the need for a Phase Two ESA.
- To provide a basis for carrying out any Phase Two ESA if required.
- To provide adequate preliminary information about environmental conditions in the land or water on, in or under the Phase One Property for the conduct of a risk assessment following completion of a Phase Two Environmental Site Assessment.

### 2.2. Phase One Property Information

**Site Description:** The Phase One Property is a large piece of land located northeast of the intersection between Torbram Road and Mayfield Road in Caledon, Ontario. The Phase One Property has been historically used for residential and agricultural purposes is described as follows:

**Table 2.2-1: Summary of Phase One Property Information**

General Information	Description
<b>Addresses</b>	0 Torbram Road, Caledon, ON 12245 Torbram Road, Caledon, ON 5762 Mayfield Road, Caledon, ON 0 Airport Road, Caledon, ON 12542 Airport Road, Caledon, ON
<b>Property Identification Number (PIN)</b>	To be confirmed by Lawyer's Letter
<b>Legal Description</b>	Part of Lots 18, 19 and 20, Concession 6, East of Hurontario Street, Part of Lots the Road Allowance Between Lots 17 and 18, Concession 6, East of Hurontario Street, Town of Caledon, Regional Municipality of Peel
<b>Ownership</b>	Tullamore Industrial GP Limited
<b>Current land use</b>	Residential and Agricultural

### 3.0 SCOPE OF INVESTIGATION

#### 3.1. Scope of Work

The scope of work of this Phase One ESA consisted of:

- A review of reasonably accessible records pertaining to the current and/or past uses of the Site and properties within the Phase One Study Area.
- An inspection of the Site and accessible areas surrounding the Site to identify evidence of potential environmental concerns at the Site and within the Phase One Study Area.
- Interview(s) with person(s) having knowledge of on-Site activities and operations.
- Preparation of this report to document the findings of the Phase One ESA report.

#### 3.2. Methodology and Limitations

##### Methodology

This Phase One ESA was conducted in accordance with O. Reg. 153/04 as amended.

Based on the general land use, topographical and hydrogeological conditions of the Site and surrounding areas, a search distance of 250 m from the Site was determined to be sufficient as the Phase One Study Area. For details refer to Section 4.1.1. *Phase One Study Area Determination*.

Information from various sources were searched and reviewed as part of the Phase One ESA work program. The source information was searched in accordance with Schedule D of O. Reg. 153/04 as amended. A detail list of records reviewed is included in Section 9 – References. Copies of select source documents are included in the Appendices as references.

The Site is not defined as an Enhanced Investigation Property. Therefore, site operating records that are applicable or specific for an industrial property, a commercial garage, a bulk liquid dispensing facility, or a dry-cleaning equipment operator were not included in this Phase One ESA.

Various site visits were conducted to the Site over the past two years and the most recent visit was conducted on June 8, 2023, by Kevin Nankisore, M.Eng., GIT, EPT of *Toronto Inspection Ltd.* Aerial photographs of the Phase One Property provided by the client are included in Appendix G.

##### Limiting Conditions of Phase One ESA

Inspection of the adjacent properties was conducted from vantage points at the Phase One Property and other publicly accessible areas.

## 4.0 RECORDS REVIEW

Records search was conducted to determine if area(s) of actual and potential environmental concern exist on the Site and within the Phase One Study Area. Details of the findings are provided in the following sections.

### 4.1. General

#### 4.1.1. Phase One Study Area Determination

As indicated from the records review, there were no large historical or recent industrial facilities within 1 km of the subject Site, which include: active or closed waste disposal sites, historical coal gasification plant waste sites, Polychlorinated Biphenyl (PCB) storage sites, or historical industrial sites which produced or used coal tar and related tars. In addition, the Phase One Study Area historically consisted of residential and agricultural land use.

Based on the general land use indicated above, as well as the topographical and hydrogeological conditions of the Phase One Property and surrounding areas, the Phase One ESA Study Area was established to comprise the Phase One Property as well as properties located, in whole or in part, within 250 m of the Phase One Property boundaries. The Regional Topography and the Site Location are shown on Figure No.1, Appendix A.

#### 4.1.2. First Developed Use Determination

According to a review of the 1878 Historical County Map of Ontario County, different parcels of the Phase One Property were owned by different owners and the southern portion of the Phase One Property, actual 5762 Mayfield Road, belonged to Nicholas Hewson and it was already developed with a dwelling house and an orchard. A review of the 1954 aerial photograph (the earliest aerial image of the Phase One Property available) indicated that the Phase One Property was occupied by three farmhouses and associated rural structures. One farmhouse was facing Airport Road, the second one was facing Mayfield Road, and the third one was facing Torbram Road. Based on the records review, the Phase One Property was considered to have been first developed prior to 1878 for residential and agricultural purposes.

#### 4.1.3. Fire Insurance Plans

A search for Fire Insurance Plans (FIPs) for the Phase One Property and study Area was conducted at Toronto Reference Public Library. However, no FIPs were available for review for the Site or the Study Area.

#### 4.1.4. Chain of Title

A chronological chain of title for the Phase One Property was not provided to *Toronto Inspection Ltd.* for review. This is considered unlikely to significantly affect this investigation given that information from other source documents satisfies the objectives of the records review. However, in case of filling a Records of Site Condition, it is recommended that a chain of title be obtained.

#### 4.1.5. City Directory

Might's Halton-Peel Regions Criss-Cross Directory from Toronto Reference Library were available to *Toronto Inspection Ltd.* for review. However, no listings were identified to represent a potential environmental concern to the Phase One Property.

#### 4.1.6. Environmental Reports and Other Reports

The following reports were available to *Toronto Inspection Ltd.* for review.

- "Phase I Environmental Site Assessment 0 & 12245 Torbram Road, Caledon, Ontario", dated July 26, 2021, prepared by *Toronto Inspection Ltd.* for Tullamore Industrial GP Limited.

**Table 4.1.6-1a: Summary of Environmental Reports**

Report Reviewed	Relevant Information / Recommendation
<i>Toronto Inspection Ltd. 2021 Phase I ESA for 0 &amp; 12245 Torbram Road, Caledon, Ontario</i>	<p><u>Relevant information pointed by <i>Toronto Inspection Ltd.</i> in the 2021 Phase I ESA report is summarized below:</u></p> <ul style="list-style-type: none"> <li>- Based on the records review, site reconnaissance and interviews conducted during the Phase I ESA, the identified areas of potential environmental concerns are summarized below:</li> </ul> <p><u>On-Site</u></p> <ul style="list-style-type: none"> <li>- The Site has been historically used for residential and agricultural purposes; therefore, there is a potential for the usage of pesticides on the property.</li> <li>- Five (5) aboveground storage tanks (ASTs) were present on the Site at the time of the site reconnaissance. Four (4) of them were located within the area of 5762 Mayfield Road and one (1) was reported to be inside the basement of the house at 12245 Torbram Road and was used for heating purposes.</li> <li>- Oil stains were observed on the ground floor inside a shed located approximately 60 m west of the residential building at 5762 Mayfield Road.</li> <li>- A farmhouse and associated sheds and barns, once located at the north portion of the Site in 1954, were no longer visible in the 2001 aerial photograph. Since the buildings were demolished, there is a potential for the usage of fill material for the purposes of grading a that portion of the Site.</li> </ul> <p><u>Off-Site</u></p> <ul style="list-style-type: none"> <li>- 34 Perdue Road (adjacent to the northeast) – 103910 Canada Inc. was reported as a waste generator of waste oil &amp; lubricants (2011-2020) due to a general automotive repair facility.</li> <li>- 10 Perdue Road (Adjacent to the northeast) – AECON Materials Engineering Corp was listed as a waste generator of halogenated solvents (2009-2020).</li> <li>- 43 Perdue Court (Adjacent to the northeast) – ATS Container Services Inc. was reported as a waste generator of aromatic solvents and residues (2018-2020).</li> <li>- 12552 Torbram Road (Adjacent to the southwest of Site) – A golf course, Mayfield Club, was located adjacent to the Site to the southwest. There is a potential for the usage of pesticides on golf courses.</li> </ul> <p><u>Recommendations</u></p> <ul style="list-style-type: none"> <li>- Given the fact that ASTs are still present on the Site, it is recommended a secondary containment be placed underneath the ASTs.</li> <li>- Based on the findings of the Phase I ESA, it is <i>Toronto Inspection Ltd.</i>'s, opinion that further environmental investigation, i.e., a Phase II ESA is recommended for the Site.</li> </ul>

- “Phase I Environmental Site Assessment 12542 Airport Road (Site 1) Caledon, Ontario”, dated November 18, 2021, prepared by *Toronto Inspection Ltd.* for Tullamore Industrial GP Limited.

**Table 4.1.6-1b: Summary of Environmental Reports**

Report Reviewed	Relevant Information / Recommendation
Toronto Inspection Ltd. 2021 Phase I ESA for 12542 Airport Road (Site 1), Caledon, Ontario	<p>Relevant information pointed by <i>Toronto Inspection Ltd.</i> in the 2021 Phase I ESA report is summarized below:</p> <ul style="list-style-type: none"> <li>- The area of interest, as highlighted by the client, corresponded to the vacant undeveloped piece of the Site described as Site 1, which comprised the central-south portion of the property.</li> <li>- Site 1 has been historically used for agricultural purposes and no evidence of industrial or commercial use was identified.</li> <li>- At the time of the site reconnaissance, no structures were observed on Site 1. However, the following was observed at the northern portion of the property at 12542 Airport Road in Caledon, which was identified as Site 2: <ul style="list-style-type: none"> <li>- Site 2 was occupied by a farmhouse and four barns.</li> <li>- A circular lagoon was observed approximately 40 m to the southwest of the farmhouse.</li> <li>- A barn located approximately 30 m southeast of the farmhouse was partially used as a greenhouse, gardening equipment and various barrels containing compost material were observed in the vicinities of the barn.</li> <li>- At the back of a second barn, a debris pile containing scrap material i.e., rusted barrels, concrete blocks, and unused ASTs were observed.</li> <li>- Other two ASTs were observed across Salt Creek, approximately 60 m in a southeast direction from the Creek. All ASTs observed at Site 2 were empty and no labels were identified on the surface of the tanks.</li> <li>- Two empty ASTs were observed on the property at 12484 Airport Road.</li> <li>- The presence of the ASTs at Site 2 and at 12484 Airport Road were considered to be of low concern due to gradient orientation and separable distance between the locations of the ASTs and Site 1.</li> <li>- Two soil samples TP1 and TP2 were collected at Site 1 and submitted to the Laboratory SGS for Organochlorine Pesticides (OCs) and Metals and Inorganics (M&amp;Is) analysis. Based on the chemical results, no exceedances for OCs and M&amp;Is were reported at the tested locations in comparison to the applicable MECP Table 1 Site Condition Standard criteria for Agricultural or other property use.</li> </ul> </li> </ul> <p>Recommendations</p> <ul style="list-style-type: none"> <li>- Based on the records review, interview and site reconnaissance, the preliminary findings of this Phase I ESA conducted for Site 1 at 12542 Airport Road in Caledon indicated that no potential environmental concerns were identified at that time.</li> <li>- It was <i>Toronto Inspection Ltd.</i>'s opinion that based on a review of the available information no Phase II ESA was recommended for Site 1 at that time.</li> </ul>

- “Phase II Environmental Site Assessment Airport Road and Mayfield Road, Caledon, Ontario”, dated February 28, 2022, revised November 3, 2022, and revised July 20, 2023, prepared by *Toronto Inspection Ltd.* for Rice Commercial Group.

**Table 4.1.6-1c: Summary of Environmental Reports**

Report Reviewed	Relevant Information / Recommendation
Toronto Inspection Ltd. 2022 Phase II ESA Airport Road and Mayfield Road, Caledon, Ontario	<p>Relevant information pointed by <i>Toronto Inspection Ltd.</i> in the 2022 Phase II ESA report is summarized below:</p> <ul style="list-style-type: none"> <li>- Based on the findings of the Phase I ESA, it is <i>Toronto Inspection Ltd.</i>'s, opinion that further environmental investigation, i.e., a Phase II ESA is recommended for the Site.</li> <li>- A subsequent site visit was conducted on October 12, 2022, at 12245 Torbram Road to inspect the AST in the basement. The AST was relatively new, with secondary confinement present, and no identified leaks or staining. Therefore, the AST, located in the basement was considered to be of low concern.</li> </ul> <p>A summary of the findings of the Phase II ESA conducted at the Site are present below:</p> <ul style="list-style-type: none"> <li>- Drilled seven (7) boreholes ranging in depths from 6.7 m to 13.9 m below grade (bg). Borehole location 22BH-102 was conducted as part of geotechnical investigation and no soil or groundwater from this borehole location was sampled as part of this report.</li> <li>- Underlying the surface course, fill material underlain by sandy silt till, clayey silt till and shale bedrock was encountered at the Site.</li> <li>- Measured groundwater levels in the monitoring well ranged from 2.0 m to 10.39 m below grade in the monitoring wells.</li> <li>- Representative or “worst-case” soil samples were collected in laboratory-supplied containers, places in a cooler and preserved with ice, and shipped with a chain of custody to SGS Canada Inc. located in Lakefield, Ontario for laboratory analyses.</li> <li>- The MECP Table 8 SCS for Residential/Parkland/Institutional/Industrial/Commercial/Community property use were selected for evaluating sample results.</li> </ul>

Report Reviewed	Relevant Information / Recommendation
<p>Toronto Inspection Ltd. 2022 Phase II ESA Airport Road and Mayfield Road, Caledon, Ontario</p> <p>(Cont.)</p>	<ul style="list-style-type: none"> <li>- A total of seven (6) discrete soil samples were analysed for the parameters groups of Petroleum Hydrocarbons (PHCs) and Volatile Organic Compounds (VOCs) and three (3) discrete soil samples were analyzed for the parameter group of Metals and OCs. The concentrations of PHCs, VOCs, Metals and OCs in the analyzed soil samples at the tested locations met their MECP Table 8 SCS for Residential/Parkland/Institutional property use with the following exceptions: <ul style="list-style-type: none"> <li><b>22BH-104 SS2</b>  PHC F1 result of 75 ug/g vs MECP Table 8 SCS of 25 ug/g.  PHC F2 result of 4330 ug/g vs MECP Table 8 SCS of 10 ug/g.  PHC F3 results of 3440 ug/g vs MECP Table 8 SCS of 240 ug/g  Xylene Mixture of 1.46 ug/g vs MECP Table 8 SCS of 0.05 ug/g</li> <li><b>22BH-104 SS3</b>  PHC F1 result of 46 ug/g vs MECP Table 8 SCS of 25 ug/g.  PHC F2 result of 618 ug/g vs MECP Table 8 SCS of 10 ug/g.  PHC F3 results of 515 ug/g vs MECP Table 8 SCS of 240 ug/g  Xylene Mixture of 0.72 ug/g vs MECP Table 8 SCS of 0.05 ug/g</li> <li><b>22BH-104 SS4</b>  PHC F2 result of 365µg/g vs MECP Table 8 SCS of 10µg/g.  PHC F3 result of 320 µg/g vs MECP Table 8 SCS of 240µg/g.</li> <li><b>Dup-A</b>  PHC F2 result of 51 µg/g vs MECP Table 8 SCS of 25 µg/g.  PHC F2 result of 814 µg/g vs MEP Table 8 SCS of 10 µg/g.  PCH F3 result of 745 µg/g vs MECP Table 8 SCS of 240 µg/g.  Xylene Mixture of 0.78 µg/g vs MECP table 8 SCS of 0.05 µg/g</li> </ul> </li> <li>- A total of five (5) groundwater samples were analyzed for the parameter group of PHCs, four (4) groundwater samples were analyzed for the parameter group VOCs, four (4) groundwater samples were analyzed for the parameter group Metal and Inorganics (MI&amp;) and four (4) groundwater samples were analyzed for the parameter group of OCs. The concentrations of PHCs, VOCs, M&amp;Is and OCs met the MECP table 8 SCS for all property uses with the following exception: <ul style="list-style-type: none"> <li><b>22BH-103(MW)</b>  Sodium results of 1870000 µg/L vs MECP Table 8 SCS of 490000 µg/L  Chloride result of 5700000 µg/L vs MECP Table 8 SCS of 790000 µg/L</li> </ul> </li> <li>- The PHC soil impacts were identified in the vicinity of an AST located at 5762 Mayfield Road and were likely a result of a leaking tank or former spill. The PHC soil impacts extended to an approximate depth of 2.3 m below grade. The area of the soil impact is currently unknown. It is recommended that the PHCs soil impact to be delineated and remediated at the time of the site redevelopment. It is recommended that a secondary containment be installed at the locations of the AST if they remain in use.</li> <li>- The elevated Sodium and Chloride in the groundwater at the monitoring well location 22BH-103(MW) Is likely associated with the application of de-icing salts in the adjacent properties on Perdue Court and do not pose an environmental risk to the Site.</li> </ul>

- “Phase I Environmental Site Assessment Tullamore Lands - 0 & 12245 Torbram Road; 5762 Mayfield Road and 12542 Airport Road, Caledon, Ontario”, dated June 12, 2023, prepared by *Toronto Inspection Ltd.* for Tullamore Industrial GP Limited.

**Table 4.1.6-1d: Summary of Environmental Reports**

Report Reviewed	Relevant Information / Recommendation
Toronto Inspection Ltd. 2023 Phase I ESA for 0 & 12245 Torbram Road, 5762 Mayfield Road and 12542 Airport Road, Caledon, Ontario	<p>Relevant information pointed by <i>Toronto Inspection Ltd.</i> in the 2023 Phase I ESA report is summarized below:</p> <ul style="list-style-type: none"> <li>- Based on the records review, site reconnaissance and interviews conducted during the Phase I ESA, the identified areas of potential environmental concerns are summarized below:</li> </ul> <p><u>On-Site</u></p> <ul style="list-style-type: none"> <li>- The Site has been historically used for residential and agricultural purposes; therefore, there is a potential for the usage of pesticides on the property.</li> <li>- Four (4) aboveground storage tanks (ASTs) were present on the Site at the time of the site reconnaissance. The tanks were located within the area of 5762 Mayfield Road and was used for heating purposes.</li> <li>- A farmhouse and associated sheds and barns, once located at the north portion of the Site in 1954, were no longer visible in the 2001 aerial photograph. Since the buildings were demolished, there is a potential for the usage of fill material for the purposes of grading a that portion of the Site.</li> </ul> <p><u>Off-Site</u></p> <ul style="list-style-type: none"> <li>- 12729 Torbram Road (Adjacent to the north) – There is a potential for the usage of pesticides on agricultural fields.</li> <li>- 12542 Airport Road (Adjacent to the east) – Two empty ASTs were observed across the creek close to a barn at the Site.</li> <li>- 12484 Airport Road (Adjacent to the east) – Two empty ASTs were observed on the property.</li> <li>- 12552 Torbram Road (Approximately 40 m west of Site) – A golf course, Mayfield Club, was located adjacent to the Site to the southwest. There is a potential for the usage of pesticides on golf courses.</li> <li>- 34 Perdue Road (adjacent to the northeast) – 103910 Canada Inc. was reported as a waste generator of waste oil &amp; lubricants (2011-2020) due to a general automotive repair facility.</li> <li>- 43 Perdue Court (Adjacent to the northeast) – ATS Container Services Inc. was reported as a waste generator of aromatic solvents and residues (2018-2020).</li> </ul> <p><u>Recommendations</u></p> <ul style="list-style-type: none"> <li>- Given the fact that ASTs are still present on the Site, it is recommended a secondary containment be placed underneath the ASTs.</li> <li>- Based on the findings of the Phase I ESA, it is <i>Toronto Inspection Ltd.</i>'s, opinion that further environmental investigation, i.e., a Phase II ESA is recommended for the Site.</li> </ul>

## 4.2. Environmental Source Information

### 4.2.1. Ministry of the Environment, Conservation and Parks (MECP) Inventory Records

The following documents were reviewed:

- MOE (now the MECP) Inventory of Coal Gasification Plant Waste Sites in Ontario, April 1987
- MOE Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, November 1998
- MOE Waste Disposal Site Inventory, June 1991
- MOE Inventory of PCB Storage Sites, January 1992

A review of the above-listed documents indicated that no active or closed waste disposal sites, historical coal gasification plant sites, PCB storage sites or historical industrial sites which produced or used coal tar and related tars, were located within 1 km of the Phase One Property.

## 4.2.2. Environmental Risk Information Service (ERIS)

Toronto Inspection Ltd. ordered a report from ERIS Ltd. for the Phase One Property and Phase One Study Area. The ERIS Report includes the search results of federal, provincial, and private source databases that are listed in paragraph 7 of subsection 3 (2) in Schedule D of O. Reg. 153/04 as amended. The records which represent potential environmental concerns and/or Potentially Contaminating Activities (PCAs) that may be contributing to an APEC are summarized in Table 4.2.2-1, below:

**Table 4.2.2-1: Summary of Potential Environmental Concerns Identified from ERIS Report**

Address / Orientation	Listing Information	Environmental Source Information Database*	Potentially Contaminating Activity
12404 Airport Road <i>Adjacent to the northeast of Site</i>	- A spill incident was reported to the MOE (MECP) in 11/5/2004 due to a tank (aboveground) leak of 20 liters of diesel.	SPL	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks
34 Perdue Road <i>Adjacent to the southeast of Site</i>	- 6103910 Canada Inc. was reported as a waste generator of waste oils and lubricants (2011-2020) due to a general automotive repair activity.	GEN	PCA#10 – Commercial Autobody Shop
43 Perdue Road <i>Adjacent to the southeast of Site</i>	- ATS Containers Services Inc was registered as a waste generator of aromatic solvents and residues (2018-2020)	GEN	NA – Waste Generator
12203 Airport Road <i>Neighbouring to the east of Site</i>	- Legacy SCS was registered as a waste generator of petroleum distillates, aliphatic solvents, waste oils and lubricants, etc. (2013-2021).	GEN	NA – Waste Generator
	- A spill incident was reported to the MOE (MECP) in 3/8/2018 due to a leak of 35-40 L of hydraulic oil to ground. - A spill incident was reported to the MOE (MECP) in 16/12/2018 due to a collision resulting in a spill of 25 litres of diesel to asphalt.	SPL	NA1 - Spill
5847 Mayfield Road <i>Neighbouring to the south of Site</i>	- A spill incident was reported to the MOE (MECP) in 12/8/2004 due to a spill of 40 liters of motor oil at a residential property.	SPL	NA1 - Spill
12151 Airport Road <i>Neighbouring to the southeast of Site</i>	- Parkview Transit/STC was reported as a waste generator of waste oils and lubricants, petroleum distillates and aliphatic solvents (2013-2022). - A spill incident was reported to the MOE (now the MECP) in 25/07/2018 due to a fire explosion. Contaminant name: diesel; quantity: unknown.	GEN SPL	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicle, and material used to maintain transportation system

Address / Orientation	Listing Information	Environmental Source Information Database*	Potentially Contaminating Activity
Airport Road at Davis Lane <i>Neighbouring to the southeast of Site</i>	<ul style="list-style-type: none"> <li>- A spill incident was reported to the MOE (MECP) in 1/22/2008 due to petroleum leak to road, ditch. The amount of the spill is unknown.</li> <li>- A spill incident was reported to the MECP in 16/03/2020 due to a collision. The amount of gasoline spilled is unknown.</li> </ul>	SPL	NA1 - Spill
Airport Road north of Mayfield <i>Approximately 20 m east of Site</i>	<ul style="list-style-type: none"> <li>- A spill incident was reported to the MOE (MECP) in 9/18/2015 due to a spill of 120 liters of hydraulic oil. The spill was reported to be cleaned.</li> </ul>	SPL	NA1 - Spill

Environmental Source Information Database:

GEN – Ontario Regulation 347 Waste Generators Summary

SPL – Ontario Spills

According to ERIS report, a number of listings were defined as “unplottable”. Those records could not be mapped due to various reasons, such as limited geographic information, and may or may not have been present within the search radius and were inserted in the ERIS report for reference purposes only. Unless there was information within a specific listing that could be used to infer its location, the “unplottable” listings were not considered to be relevant to the Phase One Property due to uncertainty.

A copy of the ERIS report is included as Appendix B.

### 4.2.3. Government and Regulatory Agency Records

#### Ministry of the Environment, Conservation and Parks (MECP)

A request was submitted on September 12, 2024, to the MECP Freedom of Information (FOI) and Privacy Office by *Toronto Inspection Ltd.* for records pertaining to the Site (attached in appendix D). A response has not been received from the MECP at the time of writing of this report. Upon receipt of MECP’s response, *Toronto Inspection Ltd.* will review the information and forward to the client any environmentally significant information (if found) under a separate cover. The conclusions of this report may be amended based on the information provided by MECP.

#### Technical Standards & Safety Authority (TSSA)

Technical Standards & Safety Authority (TSSA) was contacted and requested to check their records for any fuel storage tanks that may have been present at the Phase One Property and the adjacent properties. An email correspondence (attached in Appendix D) from a TSSA representative, indicated that no fuel storage tank records were identified for the Phase One Property and surrounding properties.

#### Ministry of Environment and Forest (MNRF)

According to the Ministry of Environment and Forest (MNRF), no ANSI were identified within the Phase One Property or the Study Area; however, wetlands and woodland areas were identified at the central-east section of the Phase One Property. Natural features within the

Phase One Property and Study Area are shown on Figure No.4, Appendix A.

### **Toronto and Region Conservation Authority (TRCA)**

Further information regarding the natural features of the Phase One Property was requested to TRCA and a response was given by the TRCA stating the following:

The TRCA's Living City Policies (LCP) describes a "Natural System" of water resources, natural features and areas, natural hazards, potential natural cover and/or buffers. The TRCA's LCP generally require that natural features within the "Natural System" be protected from development, site alteration and infrastructure. Notwithstanding additional setbacks prescribed by federal, provincial or municipal requirements, TRCA defines the limit of the "Natural System" as the greater of, but not limited to the following:

- Valley and Stream Corridors: 10 metres buffer from the greater of the long-term stable top of slope (LTSTOS), top of slope (TOS), Regulatory Floodplain, meander belt, and any contiguous natural features or areas.
- Woodlands: 10 metre buffer from the dripline and any contiguous natural features or areas;
- Wetlands: 30 metre buffer from provincially significant wetlands (PSWs) and wetlands on the ORM, and a 10 metre buffer from all other wetlands and any contiguous natural features or areas.

Based on my preliminary review of the screening map, it appears that the wetlands on site are not located within the Greenbelt portion of the site. Nevertheless, please note that the Greenbelt Plan generally requires a Natural Heritage Evaluation (NHE) for any development within the 120 m. Minimum Area of Influence of a Key Natural Heritage Features (KNHFs) and/or Hydrologically Sensitive Feature (HSFs) to delineate and assess the feature(s) and demonstrate no adverse impacts to the ecological integrity of the Greenbelt will result from the proposed development".

The TRCA Conceptual Regulated Area is Shown on Figure No.5, Appendix A.

#### **4.2.4. Client File Information**

The Client provided *Toronto Inspection Ltd.* with the following document included in Appendix E:

- Draft Plan of Subdivision – Part of Lots 18, 18, and 20, Concession 6, East of Hurontario Street, Part of Lots the Road Allowance Between Lots 17 and 18, Concession 6, East of Hurontario Street, Town of Caledon, Regional Municipality of Peel.

### **4.3. Physical Setting Sources**

#### **4.3.1. Aerial Photographs**

Aerial photographs of selected years between 1954 and 2023 (available on-line from University of Toronto Libraries, ERIS Ltd. and the Town of Caledon Air Photo History Interactive Map) were reviewed to provide a chronological timeline of developmental changes at the Phase One Property and within the Study Area. The aerial photographs are enclosed in Appendix F.

**Table 4.3.1-1 Summary of Review of Aerial Photographs**

Year	Notable Changes or Environmental Issues
1954	<ul style="list-style-type: none"> <li>- The Phase One Property was developed with three farmhouses in 1954. One farmhouse, with associated sheds, barns, and a driveway, was located at the north section of the property, facing Airport Road. A second farmhouse, with associated sheds, barns, and a driveway was located at the east section of the property, facing Mayfield Road. The Third on-site house, also with associated sheds, barns, and a driveway, was located at the south portion of the property, facing Torbram Road.</li> <li>- The remaining portions of the Phase One Property consisted of undeveloped or agricultural fields.</li> <li>- The Study Area was mainly composed by vacant lands. Airport Road, Mayfield Road and Torbram Road were already developed in 1954.</li> </ul>
1960	- No significant changes were observed for the Study Area or for the Phase One Property.
1974	- No significant changes were observed for the Study Area or for the Phase One Property.
1980	- No significant changes were observed for the Study Area or for the Phase One Property.
1988	- No significant changes were observed for the Study Area or for the Phase One Property.
2001	<ul style="list-style-type: none"> <li>- The former farmhouse located at the north portion of the Phase One Property was no longer visible in 2001. At the east and south sections of the Phase One Property, the farmhouses observed on previous aerial photographs remained on the Site.</li> <li>- In the Study Area, residential developments were observed on adjacent properties to the northwest, southwest, south, and southeast. Residential developments were also observed to the north, across Airport Road.</li> <li>- Further to the northeast, gas stations were observed at the intersection between Mayfield Road and Airport Road, and further to the southwest, a golf course area was also evident.</li> </ul>
2003	- No significant changes were observed for the Study Area or for the Phase One Property.
2005	<ul style="list-style-type: none"> <li>- No significant changes were observed for the Phase One Property.</li> <li>- Perdue Court was developed in 2005.</li> </ul>
2007	<ul style="list-style-type: none"> <li>- No significant changes were observed for the Phase One Property.</li> <li>- The adjacent lands to the northeast of the Phase One Property appeared to be developed with commercial structures. No other significant changes to land use were observed on the remaining lands of the Study Area.</li> </ul>
2009	<ul style="list-style-type: none"> <li>- No significant changes were observed for the Phase One Property.</li> <li>- A large industrial building was developed to the north, across Airport Road. Adjacent to the west of the industrial building, other two industrial facilities were under development. No other significant changes to land use were observed on the remaining lands of the Study Area.</li> </ul>
2014	<ul style="list-style-type: none"> <li>- No significant changes were observed for the Phase One Property.</li> <li>- A second large industrial building was developed to the north, across Airport Road. No other significant changes to the land use were observed on the remaining lands of the Study Area.</li> </ul>
2023	- No significant changes were observed for the Study Area or for the Phase One Property.

## 4.3.2. Topography, Hydrology, and Geology

### Topography and Regional Drainage

Based on the topographic map, Natural Resources of Canada – The Atlas of Canada – Toporama, local groundwater flow direction is anticipated to be influenced by the existing West Tributary and East Tributary as well as the surface drainage features which currently assist in draining the agricultural lands. The general direction for local groundwater flow is to the southeast and is generally a subdued reflection of the surface topography.

As indicated on the topographic map, the average elevation of the Phase One Property is approximately 230-245 m above mean sea level. The mapped contours for the Phase One Property and surrounding areas indicate a general downward slope towards the southeast direction.

It should be noted that local groundwater flow direction can only be determined through on-

going monitoring of groundwater levels, and that groundwater flow at the Site may be influenced by underground utility corridors or structures.

### **Physiography and Geology of the Phase One Study Area**

Based on soils maps provided by ERIS, the Phase One Property and the Study Area is situated within the physiographic region of South Slope, which comprises of till plains (drumlinized). The surficial geology in the area generally consisted of till, comprised from clay to silt-textured till (derived from glaciolacustrine deposits or shale). The bedrock geology in the Study Area is the Queenston Formation generally consisting of shale, limestone, dolostone and siltstone. Based on a previous environmental investigation conducted at the Site, weathered shale bedrock was encountered at a depth of 12.0 m below grade.

#### **4.3.3. Fill Materials**

Based on the 2021 Phase Two ESA, a layer of fill was contacted below the topsoil and extended to depths ranging from 0.4 m to 2.4 m below grade. The fill probably represents the material from the previous regrading of the Site, or native soil reworked during the farming process. At the time of the site reconnaissance, no evidence of imported fill material was identified at the Site.

#### **4.3.4. Water Bodies, Areas of Natural Significance & Groundwater Information**

Narrow seasonal creeks cross the Phase One Property in a west-east direction and a non provincially significant wetlands and natural ponds are located at the eastern section of the Phase One Property. The on-Site seasonal creeks, ponds and wetlands areas are part of Humber River Watershed. However, due to site grading, these seasonal creeks and wetlands have been removed. Surface runoff is expected to flow towards Salt Creek located approximately 100 m east of the Site. Based on information provided on the MNRF online database, no ANSI were identified within the Phase One Property or the Study Area; however, wetlands and woodland areas were identified at the central-east section of the Phase One Property.

Based on the Source Protection Information Atlas mapping website, the Phase One Property and the Study Area are not located within wellhead protection area, a significant groundwater recharge area or a highly vulnerable aquifer. According to the Water Well Information System (WWIS), water supply wells were identified on the Phase One Property in the Study Area.

#### **4.3.5. Well Records**

Various well records were identified within the RSC property boundary and coincided to both drinking water and monitoring wells. It is recommended that all wells are decommissioned at the time of site development.

### **4.4. Site Operating Records**

The Site is not defined as an Enhanced Investigation Property. Therefore, Site Operating Records that are applicable or specific for an industrial property, a commercial garage, a bulk liquid dispensing facility, or a dry-cleaning equipment operator were not included in this Phase One ESA.

## 5.0 INTERVIEWS

Persons with knowledge of the Site i.e., tenant and client's representative were interviewed in different occasions. Relevant information concerning the Site obtained from the interviews were included into this Phase I ESA report.

## 6.0 SITE RECONNAISSANCE

### 6.1. General Requirements

Various site visits were conducted to the Site over the past two years and the most recent visit was conducted on June 8, 2023, by Kevin Nankisore, M.Eng., GIT, EPt of *Toronto Inspection Ltd.* General information pertaining to the site visit is present as follows:

**Table 6.1-1 : Site Reconnaissance General Notes**

Date, Time, and Length of Time of Investigation	Weather Conditions	Is Facility in Operation at Time of Investigation (applicable to Enhanced Investigation Property)	Names and Qualifications of Persons Conducting the Investigation
June 8, 2023 1:00 pm – 2:00 pm	Sunny Temperature: 17°C	Not applicable	Kevin Nankisore, M.Eng., GIT, EPt

Aerial photographs of the Phase One Property provided by the client are included in Appendix G.

### 6.2. Specific Observations at Phase One Property

#### 6.2.1. General Site Layout and Operations

##### ***Topographic, Geologic, and Hydrogeologic Conditions***

At the time of the site reconnaissance, the Phase One Property was observed to be an irregular terrain crossed by several seasonal creeks and wetlands. Based on previous on-Site investigation, the soil stratigraphy at sampled locations at the Phase One Property consisted of fill, sandy silt till, clayey silt till and weathered shale. However, due to site grading, these seasonal creeks and wetlands have been removed. Surface runoff is expected to flow towards Salt Creek located approximately 100 m east of the Site.

##### ***General Description of Structures***

A 1 ½-storey residential dwelling house was present at 12245 Torbram Road.

##### ***Property Use***

Residential and Agricultural

##### ***Products Manufactured***

No manufacturing of products was observed on the Phase One Property.

##### ***Vehicle and Equipment Maintenance Areas***

No vehicle and equipment maintenance areas were observed on the Phase One Property.

#### 6.2.2. Utilities Services

No utility services were provided to the Phase One Property.

### **6.2.3. Potable Water Supply**

At the time of the site reconnaissance, potable water was provided by the municipal drinking water systems in Caledon.

### **6.2.4. Wells**

#### ***Water Wells***

No drinking water wells were observed on the Phase One Property at the time of the site reconnaissance.

#### ***Monitoring or Observation Wells***

Various monitoring wells were present on the Phase One Property for hydrogeological investigation purposes.

### **6.2.5. Waste Generation and Management**

#### ***Solid and Liquid Waste Management***

No evidence of occupancy was observed at the time of the site reconnaissance, demolition activity was ongoing on the Phase One Property. Therefore, no solid or liquid waste generation was observed.

#### ***Sewage Disposal***

No evidence of occupancy was observed at the time if the site reconnaissance, demolition activity was ongoing on the Phase One Property. However, historically the on-Site farms were provided with septic systems associated to septic beds.

#### ***Wastewater***

No industrial wastewater generation was observed on the Phase One Property.

#### ***Liquid Discharge Points***

No liquid discharge points were observed on the Phase One Property.

#### ***By-Products and Wastes***

No by-products or waste were observed on the Phase One Property.

### **6.2.6. Materials Handling and Storage**

#### ***Hazardous Materials***

No hazardous materials were observed on the Phase One Property.

**Unidentified Substances**

No unidentified substances were observed on the Phase One Property.

**Raw Materials Handling and Storage**

No raw material handling or storage were observed on the Phase One Property.

**Storage Containers**

No storage containers were observed on the Phase One Property.

**6.2.7. Storage Tanks*****Aboveground Storage Tanks (AST)***

No ASTs were observed on the Phase One Property at the time of the site reconnaissance.

***Underground Storage Tanks (UST)***

No vents or pipes indicating the presence of a UST were found in visible areas of the Phase One Property during the site reconnaissance.

It should be noted that the presence of USTs cannot be confirmed or refuted based on visual inspections or review of historical documents available to *Toronto Inspection Ltd.* at the time of this Phase One ESA.

**6.2.8. Odours and Air Emissions**

No offensive odour or detectable sources of air emissions that may impact the ambient air quality on the Phase One Property were observed during the site reconnaissance.

**6.2.9. Spills, Stains and Stained Materials**

No spills, stains or stained materials were observed on the Phase One Property.

**6.2.10. Below-ground Structures*****Oil and Water Separators***

No oil and water separators were observed on the Phase One Property.

**6.2.11. Interior Observations*****General***

The interior of the residential building 12245 Torbram Road was not accessible due to safety concerns.

## 6.2.12. Exterior Observations

### *Pits and Lagoons*

At the time of the site reconnaissance, stormwater management ponds were observed on the west and south portions of the Phase One Property.

### *Stressed Vegetation*

At the time of the site reconnaissance, no stressed vegetation was observed on the Phase One Property.

### *Fill and Debris*

Cut and fill grading was occurring on the RSC Property however imported fill material was not anticipated.

### *Watercourses, Ditches, or Standing Water*

At the time of the site reconnaissance, there were no watercourses, ditches, or standing water observed on the Phase One Property.

### *Roads, Parking Facilities, and Rights-of-Way*

Access to the Phase One Property was provided through Airport Road from the north, Mayfield Road from the east and Torbram Road from the south. There were no parking facilities on the Phase One Property at the time of the site reconnaissance.

### *Railway Lines or Spurs*

At the time of the site reconnaissance, no evidence of current or former railway lines or spurs was identified on the Phase One Property.

## 6.2.13. Potentially Contaminating Activity Observed on Phase One Property

Potentially Contaminating Activities associated with the current and/or historical use of the Phase One Property, as identified during the site reconnaissance are listed as follows:

**Table 6.2.13-1: PCAs Relating to Current and/or Historical Uses of Phase One Property**

Location	Source of Environmental Issues	Potentially Contaminating Activity
Entire Site	Historical agricultural use	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

## 6.2.14. Special Attention Items

### ***Polychlorinated Biphenyls (PCBs)***

Not anticipated.

### ***Asbestos-Containing Materials (ACMs)***

Not anticipated.

### ***Lead***

Not anticipated.

### ***Ozone-Depleting Materials (ODM)***

Not anticipated.

### ***Urea Foam Formaldehyde Insulation (UFFI)***

Not anticipated.

### ***Noise and Vibration***

Excessive noise or vibration was not anticipated at the Phase One Property.

### ***Electric and Magnetic Field***

No high voltage transmission lines or substations generating electric or magnetic fields are suspected on Phase One Property or on the adjacent properties.

## 6.3. Adjacent and Neighbouring Properties Observations

Occupants and/or land usage of the adjacent and neighbouring properties at the time of the site reconnaissance include the following:

### ***Adjacent Properties***

The adjacent property uses (excluding municipal rights-of-way) observed at the time of the site reconnaissance are summarized in Table 6.3-1.

**Table 6.3-1: Observations of Areas Adjacent to Phase One Property**

Address / Orientation	Owner / Occupant	Observations
<b><i>North of Site</i></b> 12609, 12729 Torbram Road and 12620 and 0 Airport Road	- Unknown	The property to the north consisted of residential and agricultural properties.  No obvious evidence of potential environmental concerns was identified.

Address / Orientation	Owner / Occupant	Observations
<b>East of Site</b> 12203, 12347, 12366, 12374, 12394, 12404 and 12484 Airport Road  12577, 12541 Airport Road	- Private Residential - Legacy Supply Chain Services - AMR Auto Tech - AKAL Paving & Construction Ltd. - Petrella Transport Limited - T-Dot towing service inc.	Across Airport Road, the properties to the east were occupied by residential, commercial and industrial properties.  No obvious evidence of potential environmental concerns was identified.
<b>Southeast of Site</b> 10, 22, 34, 43 Perdue Court  33 Perdue Court	- City Electric Supply Corporation - Aeon Materials engineering - Strada Aggregates - HGC The Herman Group - AST Container Services Inc.	The properties adjacent to the southeast were occupied by commercial and industrial developments.  No obvious evidence of potential environmental concerns was identified. However, automotive repair (PCA#10) and waste generation was identified at 34 Perdue and waste generation (NA – waste generation) was identified at 43 Perdue Court.
<b>South of Site</b> 5923 and 5847 Mayfield Road	Unknown	Beyond Mayfield Road, the properties to the south were occupied by residential and agricultural properties.  No obvious evidence of potential environmental concerns was identified.
<b>Southwest of Site</b> 12089, 12179, 12201 Torbram Road	Unknown	Properties to the southwest consisted of residential developments.  No obvious evidence of potential environmental concerns was identified.
<b>West of Site</b> 12361, 12381, 12399, 12409, 12419 and 12429 Torbram Road	Unknown	Facing Torbram Road, the properties to the west consisted of residential developments.  No obvious evidence of potential environmental concerns was identified.

## Neighbouring Properties

The neighbouring property uses (excluding rights-of-way) observed at the time of the site reconnaissance are summarized in Table 6.3-2.

**Table 6.3-2: Observations of Neighbouring Properties**

Location	Land Use	Observations
<i>North</i>	Agricultural	Neighboring properties to the north consisted of residential and agricultural lands.  No evidence of potential environmental concern was observed.
<i>East</i>	Residential, Agricultural, Commercial and Industrial	Neighboring properties to the east consisted of residential, agricultural, commercial and industrial developments.  No evidence of potential environmental concern was observed.
<i>Southeast</i>	Commercial and Industrial	Neighboring properties to the southeast consisted of commercial and industrial developments. Including an ESSO gas station at 12016 Airport Road.  No evidence of potential environmental concern was observed.

Location	Land Use	Observations
<i>South</i>	Residential and Agricultural	Neighboring properties to the south consisted of residential and agricultural lands.  No evidence of potential environmental concern was observed.
<i>West</i>	Residential, commercial and agricultural	Neighboring properties to the west consisted of residential, commercial and agricultural lands.  A golf course was observed at 12552 Torbram Road, golf courses may represent a potential environmental concern.

### 6.3.1. Potentially Contaminating Activities Observed in Study Area

Potentially Contaminating Activities associated with the current and/or historical use of the properties within the Study Area, as identified during the site visit are listed as follows:

**Table 6.3.1-1: Potentially Contaminating Activity Observed in Study Area**

Location	Source of Environmental Issues	Potentially Contaminating Activity
12016 Airport Road  <i>Approximately 210 m southeast of Site</i>	ESSO Gas Station	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks

### 6.3.2. Enhanced Investigation Property

The Phase One Property is not currently being used or has ever been used for industrial purposes, or as a garage, a bulk liquid dispensing facility including a gasoline outlet, or a facility where dry cleaning equipment operated; therefore, the Site is not considered an enhanced investigation property.

## 6.4. Written Description of Investigation

Investigations of the Phase One Property and Phase One Study Area were carried out in accordance with Schedule D of O. Reg. 153/04 (as amended). Written description detailing each investigation is provided in Section 6.2 *Specific Observations at Phase One Property* and Section 6.3 *Adjacent and Neighbouring Properties Observations*. Findings that are relevant to identified PCAs on-Site and within the Study Area are provided in Sections 6.2.13 and 6.3.1.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1. Current and Past Uses

A summary description of the current and past uses of the Phase One Property to its first developed use is provided in Table 7.1-1, below.

**Table 7.1-1: Current and Past Uses of the Phase One Property**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans Etc.
A Chain of Title dating back to the Crown patent is required prior submission of Record of Site Condition.				

### 7.2. Potentially Contaminating Activities

Based on the findings from records review, site reconnaissance and interviews, the Phase One ESA has revealed the following PCA within the Phase One Study Area that may represent a potential to adversely impact the subsurface soil and/or groundwater at the Site:

**Table 7.2-1: Potentially Contaminating Activities Within the Phase One Study Area**

Location	Potential Environmental Concerns	Potentially Contaminating Activity (Table 2, Schedule D of O. Reg. 153/04)	Potential to Impact Site
Site	Historical agricultural use	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Yes
	Historical AST located at the southeast portion of the Site	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
5762 Mayfield Road <i>Adjacent to the south of Site</i>	Historical AST#1	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
	Historical AST#2	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
	Historical AST#3	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
12484 Airport Road <i>Adjacent to the northeast of Site</i>	Two ASTs were observed on the property.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	No. ASTs were empty and not in use. No staining was identified in the vicinity of the tanks.
12542 Airport Road <i>Adjacent to the northeast of Site</i>	Two ASTs were observed across the creek close to the barn.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	No. ASTs were empty and not in use. No staining was identified in the vicinity of the tanks.
12404 Airport Road <i>Adjacent to the northeast of Site</i>	Presence of an AST and spill incident of 20 liters of diesel.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Yes
10 Perdue Court <i>Adjacent to the southeast of Site</i>	Waste generator of halogenated solvents	NA <sup>1</sup> – Waste Generator	Yes

<b>Location</b>	<b>Potential Environmental Concerns</b>	<b>Potentially Contaminating Activity (Table 2, Schedule D of O. Reg. 153/04)</b>	<b>Potential to Impact Site</b>
34 Perdue Court <i>Adjacent to the southeast of Site</i>	Presence of an auto repair with waste generator records.	PCA#10 – Commercial Autobody Shops	Yes
43 Perdue Court <i>Adjacent to the southeast of Site</i>	Waste generator of aromatic solvents and residues	NA <sup>2</sup> – Waste Generator	Yes
12203 Airport Road <i>Neighbouring to the east of Site</i>	Waste generator of petroleum distillates, aliphatic solvents, waste oils and lubricants, etc.	NA <sup>3</sup> – Waste Generator	Yes
	Spill incidents of 35-40 L of hydraulic oil to ground and of 25 litres of diesel to asphalt.	NA <sup>4</sup> - Spill	Yes
5847 Mayfield Road <i>Neighbouring to the south of Site</i>	A spill incident of 40 liters of motor oil at a residential property.	NA <sup>5</sup> - Spill	No
12151 Airport Road <i>Neighbouring to the southeast of Site</i>	Presence of a school bus yard with spill incident due to a fire explosion. Diesel contamination present.	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicle, and material used to maintain transportation system	No
Airport Road at Davis Lane <i>Neighbouring to the southeast of Site</i>	A spill incident due to petroleum leak to road, ditch. The amount of the spill is unknown.  A spill incident due to a collision. The amount of gasoline spilled is unknown.	NA <sup>6</sup> - Spill	No
Airport Road north of Mayfield <i>Approximately 20 m east of Site</i>	A spill incident of 120 liters of hydraulic oil, reported to be cleaned.	NA <sup>7</sup> - Spill	No
12016 Airport Road <i>Approximately 210 m southeast of Site</i>	Presence of gas station with underground storage tanks.	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	No

The PCAs identified above are presented on Figures No. 2 and 2a, Appendix A.

### 7.3. Areas of Potential Environmental Concern

Eleven (11) APECs as determined from the Phase One ESA are summarized in Table 7.3-1, below:

**Table 7.3-1: Areas of Potential Environmental Concern**

APEC	Location of APEC on Phase One Property	Potentially Contaminating Activity (Table 2, Schedule D of O.Reg. 153/04)	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, Soil and/or Sediment)
APEC-1	Entire Site	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	OCs, Metals, Hydride-Forming Metals (As, Se and Sb),	Soil and Groundwater
APEC-2	Southeast Portion of Site	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site	PHCs, BTEX, VOCs	Soil and Groundwater
APEC-3	South of Site (Adjacent to 5762 Mayfield Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-4	South of Site (Adjacent to 5762 Mayfield Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-5	South of Site (Adjacent to 5762 Mayfield Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-6	Northeast of Site (Adjacent to 12404 Airport Road)	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX, VOCs	Groundwater
APEC-7	Southeast of Site (Adjacent to 34 Perdue Court)	PCA#10 – Commercial Autobody Shop	Off-Site	PHCs, BTEX, VOCs, Metals, Hydride-Forming Metals (As, Se and Sb)	Groundwater
APEC-8	Southeast of Site (Adjacent to 43 Perdue Court)	NA <sup>2</sup> – Waste Generator of aromatic solvents	Off-Site	VOCs	Groundwater
APEC-9	Southeast of Site (Adjacent to 10 Perdue Court)	NA <sup>1</sup> – Waste Generator of halogenated solvents	Off-Site	VOCs	Groundwater
APEC-10	East of Site (Adjacent to 12203 Airport Road)	NA <sup>3</sup> – Waste Generator of petroleum distillates, aliphatic solvents, waste oils and lubricants, etc.	Off-Site	PHCs, BTEX, VOCs, Metals, Hydride-Forming Metals (As, Se and Sb)	Groundwater
APEC-11	East of Site (Adjacent to 12203 Airport Road)	NA <sup>4</sup> - Spill	Off-Site	PHCs, BTEX, VOCs	Groundwater

The APECs identified above are presented on Figures No. 3 and 3a, Appendix A.

## **7.4. Phase One Conceptual Site Model**

A Conceptual Site Model (CSM) was developed as part of this Phase One ESA. The CSM consists of figures of the Phase One Study Area which include the PCAs identified within the Phase One Property and the Study Area, inferred groundwater flow, areas of natural significance and land usage adjacent to the Phase One Property.

### **7.4.1. Site Overview**

The Phase One Property is a large piece of land located northeast of the intersection between Torbram Road and Mayfield Road in Caledon, Ontario. The Phase One Property, which has an approximate area of 170.80 ha (422 ac), was considered to have been first developed prior to 1878 for residential and agricultural purposes.

### **7.4.2. Physical Setting of Phase One Property**

#### ***Regional Geological and Hydrogeological Information***

Based on the topographic map, Natural Resources of Canada – The Atlas of Canada – Toporama, local groundwater flow direction is anticipated to be influenced by the existing West Tributary and East Tributary as well as the surface drainage features which currently assist in draining the agricultural lands. The general direction for local groundwater flow is to the southeast.

As indicated on the topographic map, the average elevation of the Phase One Property is approximately 230-245 m above mean sea level. The mapped contours for the Phase One Property and surrounding areas indicate a general downward slope towards the southeast direction.

Based on soils maps provided by ERIS, the Phase One Property and the Study Area is situated within the physiographic region of South Slope, which comprises of till plains (drumlinized). The surficial geology in the area generally consisted of till, comprised from clay to silt-textured till (derived from glaciolacustrine deposits or shale). The bedrock geology in the Study Area is the Queenston Formation generally consisting of shale, limestone, dolostone and siltstone. Based on a previous environmental investigation conducted at the Site, weathered shale bedrock was encountered at a depth of 12.0 m below grade.

#### ***Water Bodies and Areas of Natural Significance in Phase One Study Area***

Narrow seasonal creeks cross the Phase One Property in a west-east direction and a non provincially significant wetlands and natural ponds are located at the eastern section of the Phase One Property. The on-site seasonal creeks, ponds and wetlands areas are part of Humber River Watershed. However, due to site grading, these features have been removed. Salt Creek was observed approximately 100 m east of the Site.

Based on information provided on the MNRF online database, no ANSI were identified within the Phase One Property or the Study Area; however, wetlands and woodland areas were identified at the central-east section of the Phase One Property, while a Natural Heritage System and a Greenbelt Land Use Designation was identified at its the southeast section.

Further information regarding the natural features of the Phase One Property was requested to TRCA and a response was given by the TRCA stating the following:

The TRCA's Living City Policies (LCP) describes a "Natural System" of water resources, natural features and areas, natural hazards, potential natural cover and/or buffers. The TRCA's LCP generally require that natural features within the "Natural System" be protected from development, site alteration and infrastructure. Notwithstanding additional setbacks prescribed by federal, provincial or municipal requirements, The TRCA defines the limit of the "Natural System" as the greater of, but not limited to the following:

- Valley and Stream Corridors: 10 metres buffer from the greater of the long-term stable top of slope (LTSTOS), top of slope (TOS), Regulatory Floodplain, meander belt, and any contiguous natural features or areas;
- Woodlands: 10 metre buffer from the dripline and any contiguous natural features or areas;
- Wetlands: 30 metre buffer from provincially significant wetlands (PSWs) and wetlands on the ORM, and a 10 metre buffer from all other wetlands and any contiguous natural features or areas.

Based on a preliminary review of the screening map, it appears that the wetlands on site are not located within the Greenbelt portion of the site. Nevertheless, please note that the Greenbelt Plan generally requires a Natural Heritage Evaluation (NHE) for any development within the 120 m. Minimum Area of Influence of a Key Natural Heritage Features (KNHFs) and/or Hydrologically Sensitive Feature (HSFs) to delineate and assess the feature(s) and demonstrate no adverse impacts to the ecological integrity of the Greenbelt will result from the proposed development.

### ***Phase One Property Topographic, Geologic, and Hydrogeologic Conditions***

At the time of the site reconnaissance, the Phase One Property was observed to be an irregular terrain crossed by several seasonal creeks and wetlands. Based on previous on-Site investigation, the soil stratigraphy at sampled locations at the Phase One Property consisted of fill, sandy silt till, clayey silt till and weathered shale. However, due to site grading, these seasonal creeks and wetlands have been removed. Surface runoff is expected to flow towards Salt Creek located approximately 100 m east of the Site.

### ***Fill Materials***

Based on the 2021 Phase Two ESA, a layer of fill was contacted below the topsoil and extended to depths ranging from 0.4 m to 2.4 m below grade. The fill probably represents the material from the previous regrading of the Site, or native soil reworked during the farming process. At the time of the site reconnaissance, no evidence of imported fill material was identified at the Site.

### ***Drinking Water Wells at the Phase One Property***

No drinking water well was observed on the Phase One Property at the time of the site reconnaissance.

### ***Proposed Property Use at the Phase One Property***

**Toronto Inspection Ltd.**

The proposed land use for the Phase One Property is industrial.

### **7.4.3. Sources of Contamination**

#### ***Potentially Contaminating Activity***

Numerous PCAs were identified within the Phase One Property and Study Area – the locations of the PCAs within the Phase One Property and the Study Area that may be contributing to an APEC are shown on Figure No.2 and it is summarized in Table 7.2-1.

#### ***Areas of Potential Environmental Concern***

Eleven (11) APECs were identified at the Phase One Property – the historical agricultural use, potential presence of fill material and a historical AST located at the southeast portion of the Site contribute to two (2) APECs at the Phase One Property. From the off-Site PCAs, nine (9) are anticipated to create APECs at the Phase One Property. The locations of the APECs are shown on Figure No.3, Appendix A and summarized in Table 7.3-1.

### **7.4.4. Uncertainty or Absence of Information**

There is no known data gap identified that significantly affects the findings of this Phase One ESA.

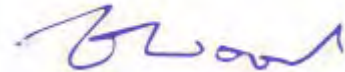

## 8.0 CONCLUSIONS

Based on the findings of this Phase One ESA, eleven (11) APECs have been identified on the Phase One Property. It is *Toronto Inspection Ltd.*'s opinion that a Phase Two Environmental Site Assessment is required for the Phase One Property.

Yours sincerely,  
**Toronto Inspection Ltd.**

## 10.0 GENERAL STATEMENT OF LIMITATION

This Phase One Environmental Site Assessment was conducted in general compliance with currently acceptable practices for environmental site investigations, and specific client requests, as applicable to this property. It is based on documents and oral information supplied to *Toronto Inspection Ltd.* There is no warranty expressed or implied or representations by *Toronto Inspection Ltd.* that this investigation uncovered all potential environmental risks or liabilities associated with the subject site.

This report was prepared by *Toronto Inspection Ltd.* for the account of Tullamore Industrial GP Limited. The material in this report reflects *Toronto Inspection Ltd.*'s judgement in light of the information available to them at the time of preparation. Any use which a Third Party makes of this report, or any reliance on decisions to be made based on it, is the responsibility of these Third Parties. *Toronto Inspection Ltd.* accepts no responsibility for damages, if any, suffered by any Third Party as a result of decisions made or actions based on this report.

*Toronto Inspection Ltd.* did not provide any service to investigate or detect the presence of moisture, mould or other biological contaminants in or around any structure, or any service that was designed or intended to prevent or lower the risk of the occurrence of the amplification of the same. Mould is ubiquitous to the environment with mould amplification occurring when building materials are impacted by moisture. Site conditions are outside of *Toronto Inspection Ltd.*'s control, and mould amplification will likely occur, or continue to occur, in the presence of moisture. As such, *Toronto Inspection Ltd.* cannot and shall not be held responsible for the occurrence or recurrence of mould amplification.

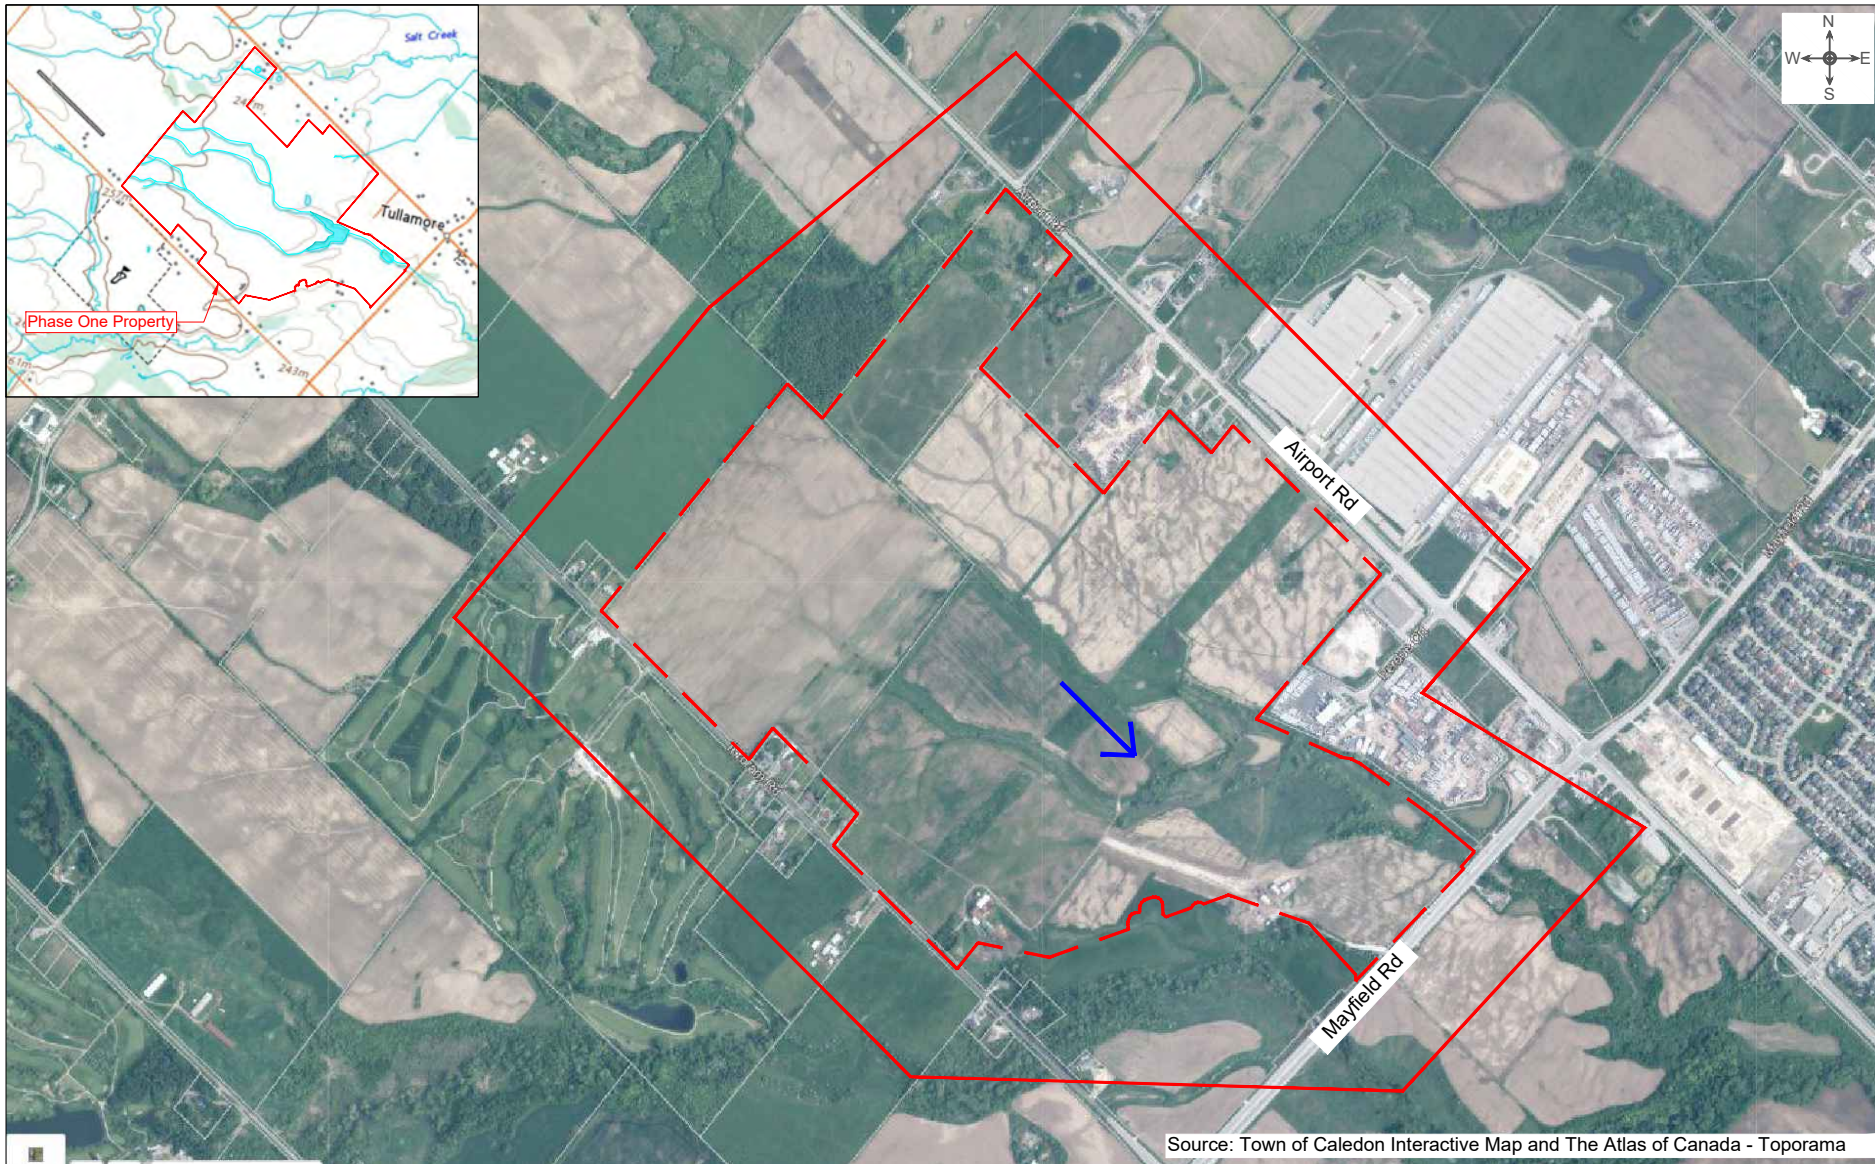

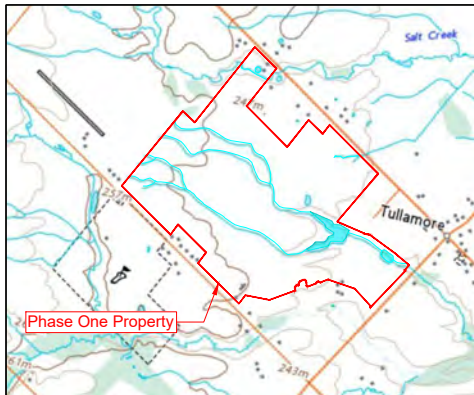

Any legal actions arising directly or indirectly from this work and/or *Toronto Inspection Ltd.*'s performance of the services shall be filed no longer than two years from the date of *Toronto Inspection Ltd.*'s substantial completion of the services. *Toronto Inspection Ltd.* shall not be responsible to the client for lost revenues, loss of profits, cost of content, claims of customers, or other special indirect, consequential, or punitive damages.

To the fullest extent permitted by law, the client's maximum aggregate recovery against *Toronto Inspection Ltd.*, its directors, employees, sub-contractors, and representatives, for any and all claims by Tullamore Industrial GP Limited for all causes including, but not limited to, claims of breach of contract, breach of warranty and/or negligence, shall be limited to the amount of professional fees paid by the client.

This report is to be read in its entirety, each section is an integral part of the report, and no sections are to be used separately.

# Executive Summary

## **Property Information:**

**Project Property:** *Airport Road and Mayfield Road, Caledon  
Airport Road and Mayfield Road Caledon ON L7C 2S7*

**Project No:** *5552-23-EA*

## **Order Information:**

**Order No:** *23033100284*  
**Date Requested:** *March 31, 2023*  
**Requested by:** *Toronto Inspection Ltd.*  
**Report Type:** *Quote - Custom-Build Your Own Report*

## **Historical/Products:**

**ERIS Xplorer** [\*ERIS Xplorer\*](#)

**Application Year:** 02  
**Issue Date:** 8/26/02  
**Approval Type:** Municipal & Private water  
**Status:** Approved  
**Application Type:** Amended CofA  
**Client Name:** The Regional Municipality of Peel  
**Client Address:** 10 Peel Centre Drive  
**Client City:** Brampton  
**Client Postal Code:** L6T 4B9  
**Project Description:** This application is to amend the CofA to complete upgrades for Well No. 5 as described in Condition 5 of the CofA. The work to be completed under this project is to isolate Well No. 5 and abandon. Remove existing chlorination set up that includes injection into the Well No. 5 discharge header. Re-chlorinate the water entering this facility from the Caledon Village Booster Pumping Station via. the 100mm Dia. pipe. The chlorinated water is then conveyed to the Mono Mills standpipe.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Feb 28, 2022**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**Federal [CDRY](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2021**

**Commercial Fuel Oil Tanks:**Provincial [CFOT](#)

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**Private [CHM](#)

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Feb 28, 2023**

**Compressed Natural Gas Stations:**Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Sep 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Feb 2023**

**Certificates of Property Use:**Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Feb 28, 2023**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022**

**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Feb 28, 2023**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Dec 31, 2022**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date:** Apr 30, 2022

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2021

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Dec 2022

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** May 31, 2018

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2023**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2022****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Feb 28, 2023****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011- Feb 28, 2023

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - Feb 28, 2023

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2020

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Feb 2023

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Feb 28, 2023

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** 1988-Mar 2021; May 2021-Oct 2021

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jun 30 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## **Appendix C      Freedom of Information**

## Ministry of the Environment, Conservation and Parks

### Freedom of Information Request for Property Information

#### Instructions

Use this form to:

- submit and pay for a new FOI request for access to records/information about a property
- pay for a deposit or a final fee on an existing FOI request

Fields marked with an asterisk (\*) are mandatory.

**Are you: \***

- ☒ Submitting a new FOI Request for Property Information
- ☐ Paying a deposit or final fee for an existing FOI Request for Property Information

#### Section 1 – Description of Records Requested

##### Time Period for Records Requested

From (yyyy/mm/dd) \*

To (yyyy/mm/dd) \*

1990/01/01

2024/09/12

**Type of Record(s) \***

- ☒ All environmental records relating to the identified property/site exclusive of Environmental Approvals and Registrations
- ☐ Environmental Approvals and Registrations (e.g. Environmental Compliance Approvals; Certificate of Approval; Renewable Energy Approvals; Environmental Activity and Sector Registry Registrations)

Select only if you are seeking access to an Approval or Registration that is not publicly available or if you are also seeking supporting documents relating to the Approval or Registration.

Operator and vendor Pesticide Licenses from September 4, 2018, final Approvals and Registrations are publicly available on the Access Environment website at:

<https://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en>.

Records of Site Condition (RSC) records are publicly available on the Brownfields Environmental Site Registry (BSER).

- RSC records between 2004 to June 30, 2011 are available at:  
<https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch>
- RSC records filed after July 2011 are available at:  
[https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc\\_search?request\\_locale=en](https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc_search?request_locale=en)

☐ Other Specific Document(s)

List any record(s) that should be excluded from the scope of your request (e.g. email correspondences; records originating from your organization/business; records already in your possession, prior year(s) annual reports for approvals)

Please provide any additional relevant information relating to your request. For example, does your request relate to any other ministry business? Please note that this information is being requested only in order to provide contextual information to the Access and Privacy Office and will not in any way affect or expedite the status of any related ministry business identified.

## Section 2 – Requester Information

## RE: (PN 5552) Public Information Request for Airport Road and Mayfield Road, Caledon

From: Public Information Services (publicinformationservices@tssa.org)

To: natalle@torontoinspection.com

Date: Thursday, September 12, 2024 at 03:09 PM EDT

Hello ,

### **NO RECORDS FOUND IN CURRENT DATABASE:**

- We confirm that there are NO **fuels records** in our database at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the [TSSA Client Portal](#) to complete an Application for Release of Public Information.

Please refer to [How to Submit a Public Information Request \(tssa.org\)](#) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at [publicinformationservices@tssa.org](mailto:publicinformationservices@tssa.org).

Kind regards,

### **Melanie Fowler | Public Information Releases Agent**
