Appendix B	Aerial Photographs
Appendix C	ERIS Report
Appendix D	MECP Freedom of Information
Appendix E	TSSA Correspondence
Appendix F	Site Photographs

## 1.0 EXECUTIVE SUMMARY

*Toronto Inspection Ltd.* was retained by Tullamore Industrial GP Limited to conduct a Phase I Environmental Site Assessment (ESA) for the property located at 0 Torbram Road and 12245 Torbram Road in Caledon, Ontario (hereinafter referred to as the “Site”). For the purpose of this report, Torbram Road was assumed to orient in an east-west direction. The work was performed as per *Toronto Inspection Ltd.*'s standard terms and agreement. This Phase I ESA was conducted in accordance with Canadian Association (CSA) Z768-01, reaffirmed 2016.

The Phase I ESA was commissioned for due diligence purposes. It is understood that this Phase I ESA cannot be used to support the filing of a Record of Site Condition (RSC).

The objective of the Phase I ESA was to determine if there is evidence of actual or potential contamination at the Site and if the activities of surrounding properties pose an environmental concern to the Site.

The Site is a large piece of land located approximately 300 m southwest of the intersection between Airport Road and Mayfield Road in Caledon, Ontario. The Site is an irregular-shaped property occupied by two farmhouses and associated structures (i.e., barns, sheds, and silos). The Site, which has been historically used for residential and agricultural purposes was developed prior 1954 and it has an approximately area of 371 acres (150 ha).

The neighboring properties are composed of industrial developments to the north; commercial developments to the northeast; residential developments to the east, southeast and south and residential and commercial developments to the southwest.

In summary, based on the records review, the site reconnaissance and the interviews conducted during the Phase I ESA, the identified areas of potential environmental concerns are summarized below:

### On-Site sources:

- The Site has been historically used for residential and agricultural purposes; therefore, there is a potential for the usage of pesticides on the property.
- Five (5) ASTs were present on the Site at the time of the site reconnaissance. Four (4) of them were located within the area of 5762 Mayfield Road and one (1) was reported to be inside the basement of the house at 12245 Torbram Road and was used for heating purposes.
- Oil Stains were observed on the ground floor inside a shed located approximately 60 m west of the residential building at 5762 Mayfield Road.
- A farmhouse and associated sheds and barns, once located at the north portion of the Site in 1954, were no longer visible in the 2001 aerial photograph. Since the buildings were demolished, there is a potential for the usage of fill material for the purpose of grading at that portion of the Site.

Off-Site Sources:

- 34 Perdue Road (*Adjacent to the Site to the northeast*) - 103910 Canada Inc. was reported as a waste generator of waste oils & lubricants (2011-2020) due to a general automotive repair activity.
- 10 Perdue Road (*Adjacent to the Site to the northeast*) - Aecon Materials Engineering Corp was listed as a waste generator of halogenated solvents (2009-2020).
- 43 Perdue Court (*Adjacent to the Site to the northeast*) - ATS Container Services Inc. was reported as a waste generator of aromatic solvents and residues (2018-2020).
- 12552 Mayfield Road (*Adjacent to the southwest of Site*) - A golf course, Mayfield Golf club, was located adjacent to the Site to the southwest. There is a potential for the usage of pesticides on golf courses.

Given the fact that aboveground storage tanks (ASTs) are still present on the Site, it is recommended a secondary containment be placed underneath of the ASTs.

Based on the findings of the Phase I ESA, it is *Toronto Inspection Ltd.*'s opinion that further environmental investigation, i.e., a Phase II ESA is recommended for the Site.

## 2.0 INTRODUCTION

*Toronto Inspection Ltd.* was retained by Tullamore Industrial GP Limited to conduct a Phase I Environmental Site Assessment (ESA) for the property located at 0 Torbram Road and 12245 Torbram Road in Caledon, Ontario (hereinafter referred to as the “Site”). For the purpose of this report, Torbram Road was assumed to orient in an east-west direction. The work was performed as per *Toronto Inspection Ltd.*'s standard terms and agreement.

### 2.1 OBJECTIVES

The objective of the Phase I ESA was to determine if there is evidence of actual or potential contamination at the Site and if the activities of surrounding properties pose an environmental concern to the Site.

The Phase I ESA was commissioned for due diligence purposes. It is understood that this Phase I ESA cannot be used to support the filing of a Record of Site Condition (RSC).

### 2.2 SCOPE OF WORK

The scope of work of this Phase I ESA consisted of:

- a review of reasonably accessible records pertaining to the current and/or past uses of the Site and properties within the Phase I Study Area
- an inspection of the Site and accessible areas surrounding the Site to identify evidence of potential or actual environmental concerns at the Site and within the Phase I Study Area
- interview(s) with person(s) having knowledge of on-site activities and operations
- a report documenting the Phase I ESA findings.

### 2.3 METHODOLOGY AND LIMITATIONS

#### Methodology

This Phase I ESA was conducted in accordance with the Canadian Standard Association (CSA) Z768-01, reaffirmed 2016.

Based on the general land use, topographical and hydrogeological conditions of the Site and surrounding areas, a search distance of 250 m from the Site was deemed sufficient as the Phase I Study Area.

Information from various sources were searched and reviewed as part of the Phase I ESA work program. These sources of information included: topographical and physiographic maps, aerial photographs, property-use records, database records available through ERIS Ltd. and other environmental information sources, government, and regulatory agency records (if available), and any previous environmental reports or on-file information available from the client. A detailed list of records reviewed is included in Section 10.0 *References*.

The Phase I ESA site visit was conducted by Mr. Albert Lee-Wah, B.E.S. of *Toronto*

**Toronto Inspection Ltd.**

*Inspection Ltd.* in two occasions, the first one was performed on February 17, 2021 (wintertime); however, due to the ground snow-cover, a second visit was performed on June 24, 2021. The site visits included a walk-through of the subject Site in all accessible areas to document site observations and photograph details pertinent to the Phase I ESA requirements.

*Limiting Conditions of Phase I ESA*

All accessible areas of the Site were inspected for evidence of potential or actual environmental concerns. It should be noted that due to Covid-19 restrictions, inspection inside the farmhouses were not possible at the time of the site visits. Inspection of the adjacent properties was conducted from vantage points at the Site and other publicly accessible areas.

It should be noted that a response from the Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information (FOI) office has yet to be received at the time this report was prepared. Also, access to the city directories and fire insurance plans for the Site and Study Area was not possible due to the closure of Government buildings at the time of writing this report due to COVID-19. Once these records become accessible, they will be reviewed and assessed. The Client will be notified of any information of relevance, if identified during the supplemental review.

### 3.0 SITE DESCRIPTION

#### 3.1 SITE CHARACTERISTICS

The Site is a large piece of land located northwest of the intersection between Torbram Road and Mayfield Road in Caledon, Ontario. The Site is an irregular-shaped property occupied by two farmhouses and associated structures (i.e., barns, sheds, and silos). The Site, which has been historically used for residential and agricultural purposes was developed prior 1954. Information pertaining to the Site is described as follows:

**Table 3.1-1: Summary of Subject Property (Site) Information**

General Information	Description
Municipal Addresses	0 Torbram Road, Caledon, ON 12245 Torbram Road, Caledon, ON
Legal description	Part of Lot 17, Con 6 EHS Chinguacousy Brampton; ROAL BTN Lots 17 and 18, Con 6 EHS Chinguacousy; Part of Lot 18, Con 6 EHS Chinguacousy; Part of Lot 19, Con 6, EHS Chinguacousy; Part of Lot 20, Con 6 EHS Chinguacousy as in VS22285; Except Parts 7 - 18 on 43R-9315, Part 1 on 43R-12084, Parts 1 and 2 on 43R-1832, Parts 1, 2, 3 and 4 on 43R-5852 , Parts 1,3, 4, 9 on 43R-1415, Pmt s 1 a nd 2 on 43R-1 3428, Parts 1,2, 3, 4 on 43R-15152 , Part 1 on 43R-15403, Parts 1 , 2 on 43R-18964, Parts 3, 5 on 43R-19786 , Part 1 on 43R-27937, Parts 1, 2 on 43R-29084, Parts 1 , 2, 4, 5, Expropriation Plan PR2385790; S/T the interest of the Regional Municipality of Peel: Brampton/Caledon. being PIN 14347-0346L T (approximately 378 acres more or less);
Approximate total area of Site	371 acres (150 ha)
Structure(s) on Site	The Site is occupied by two farms:  5762 Mayfield Road is composed by a residential building, four barns, three sheds, three silos and a pond.  12245 Torbram Road is composed by a residential building, four barns and a silo.
Current occupants and usage	The Site is occupied by tenants, and it is used for residential and agricultural purposes.
Municipal services and utilities	Hydro, municipal water and curbside waste pick up.
Current land use and zoning	Residential and Agricultural Land Use  The Site is within the Agricultural (A1) and Environmental Policy Area 2 (EPA2) Zones based on the Town of Caledon Zoning By-Law 2006-50.
UTM coordinates (approximate centroid of the Site)	Zone 17 598697m E, 4849525m N
Current and historical sources of building heat	As reported by the Ms. Loris Verge, the tenant at 5762 Mayfield Road, the current source of heat is electricity. Mrs. Verge also mentioned that there is a fuel oil tank inside the basement of the farmhouse at 12245 Torbram Road.

General Information	Description
Historical and current septic fields	The farmhouses are serviced by septic systems including septic beds.
Surface water and groundwater use	As reported by Mrs. Verge, potable water is provided by the municipal drinking water systems in Caledon.
Distance to nearby surface water bodies and characteristics of the water bodies	Narrow creeks cross the Site in a west-east direction and a non provincially significant wetlands are located at the eastern section of the Site. The on-site creeks and the wetlands are part of Humber River Watershed.
Areas of natural significance	<p>According to the Ministry of Environment and Forest (MNR), no ANSI were identified within the Site or the Study Area; however, wetlands and woodland areas were identified at the central-east section of the Site. In addition, a Natural Heritage System and a Greenbelt Land Use Designation was identified at the southeast sections of the Site.</p> <p>Further information regarding the natural features of the Site was requested to TRCA and a response was given by the TRCA stating the following:</p> <p>“TRCA’s Living City Policies (LCP) describes a “Natural System” of water resources, natural features and areas, natural hazards, potential natural cover and/or buffers. TRCA’s LCP generally require that natural features within the “Natural System” be protected from development, site alteration and infrastructure. Notwithstanding additional setbacks prescribed by federal, provincial or municipal requirements, TRCA defines the limit of the “Natural System” as the greater of, but not limited to the following:</p> <ul style="list-style-type: none"> <li>• <b>Valley and Stream Corridors: 10 metre buffer from the greater of the long-term stable top of slope (LTSTOS), top of slope (TOS), Regulatory Floodplain, meander belt, and any contiguous natural features or areas;</b></li> <li>• <b>Woodlands: 10 metre buffer from the dripline and any contiguous natural features or areas;</b></li> <li>• <b>Wetlands: 30 metre buffer from provincially significant wetlands (PSWs) and wetlands on the ORM, and a 10 metre buffer from all other wetlands and any contiguous natural features or areas.</b></li> </ul> <p>Based on my preliminary review of the screening map, it appears that the wetlands on site are not located within the Greenbelt portion of the site. Nevertheless, please note that the Greenbelt Plan generally requires a Natural Heritage Evaluation (NHE) for any development within the 120 m. Minimum Area of Influence of a Key Natural Heritage Features (KNHFs) and/or Hydrologically Sensitive Feature (HSFs) to delineate and assess the feature(s) and demonstrate no adverse impacts to the ecological integrity of the Greenbelt will result from the proposed development”.</p>
Topography	The elevations within the Site ranged from approximately 230-245 m above mean sea level. The land contours mapped for the Site and surrounding areas indicated a general downward slope towards the southeast direction.
Fill Material	A farmhouse and associated sheds and barns, once located at the north portion of the Site in 1954, were no longer visible in the 2001 aerial photograph. Since the buildings were demolished, there is a potential for the usage of fill material for the purpose of grading at that portion of the Site.

General Information	Description
Inferred groundwater flow	<p>The inferred groundwater flow is inferred to be in a west-east direction towards the on-site creeks that cross the Site. The Creeks are tributaries of West Humber River, which drains into Lake Ontario over 20 km far from the Site.</p> <p>It should be noted that local true groundwater flow can only be determined through on-going monitoring of groundwater levels, and that groundwater flow at the Site may be influenced by underground utility corridors or structures.</p>
Physiography	<p>The Phase I Study Area is situated within the physiographic region of South Slope, which comprises of till plains (drumlinized). The surficial geology in the area generally consisted of till, comprised from clay to silt-textured till (derived from glaciolacustrine deposits or shale).</p>
Bedrock geology	<p>The bedrock geology in the Study Area is the Queenston Formation generally consisting of shale, limestone, dolostone and siltstone.</p>

The Site is shown below as Image 1:

Image 1: Aerial image of the Site located to the northwest of the intersection between Torbram Road and Mayfield Road, Caledon  
 (Source: Town of Caledon Interactive Map, 2020)

Maps showing the Site location and the topographic features of the Study Area are provided in Appendix A.

## 4.0 RECORDS REVIEW

A records search was conducted to determine if area(s) of actual and potential environmental concern exist at the Site and within the Phase I Study Area. Details of the review findings are provided in the following sections.

### 4.1 AERIAL PHOTOGRAPHS

Aerial photographs of selected years between 1954 and 2020 (available on-line from University of Toronto Libraries and the Town of Caledon Air photo History Interactive Map) were reviewed to provide a chronological timeline of developmental changes at the Site and within the Study Area. These aerial photographs are enclosed in Appendix B.

**Table 4.1-1 Summary of aerial photographs review**

Aerial Photograph	Notable Features
1954	<ul style="list-style-type: none"> <li>- The Site was developed with three farmhouses in 1954. One farmhouse, with associated sheds, barns, and a driveway, was located at the north section of the property, facing Airport Road. A second farmhouse, with associated sheds, barns, and a driveway was located at the east section of the property, facing Mayfield Road. The Third on-site house, also with associated sheds, barns, and a driveway, was located at the south portion of the property, facing Torbram Road.</li> <li>- The Study Area was mainly composed by vacant lands. Airport Road, Mayfield Road and Torbram Road were already developed in 1954.</li> </ul>
2001	<ul style="list-style-type: none"> <li>- The former farmhouse located at the north portion of the Site was no longer visible in 2001. At the east and south sections of the Site, farmhouses with similar features as the ones in the 1954 aerial photograph were observed.</li> <li>- In the Study Area, residential developments were observed on adjacent properties to the northwest, southwest, south, and southeast. Residential developments were also observed to the north, across Airport Road.</li> <li>- Further to the northeast, gas stations were observed at the intersection between Mayfield Road and Airport Road, and further to the southwest, a golf course area was also evident.</li> </ul>
2003	<ul style="list-style-type: none"> <li>- No significant changes to land use were observed for the Site or for the Study Area.</li> </ul>
2005	<ul style="list-style-type: none"> <li>- No significant changes to land use were observed for the Site.</li> <li>- Perdue Courte was developed in 2005.</li> </ul>
2007	<ul style="list-style-type: none"> <li>- No significant changes were observed for the Site.</li> <li>- The adjacent lands to the northeast of the Site appeared to be developed with commercial structures. No other significant changes to land use were observed on the remaining lands of the Study Area.</li> </ul>

Aerial Photograph	Notable Features
2009	<ul style="list-style-type: none"> <li>- No significant changes were observed for the Site.</li> <li>- A large industrial building was developed to the north, across Airport Road. Adjacent to the west of the industrial building, other two industrial facilities were under development. No other significant changes to land use were observed on the remaining lands of the Study Area.</li> </ul>
2014	<ul style="list-style-type: none"> <li>- No significant changes to land use were observed for the Site.</li> <li>- A second large industrial building was developed to the north, across Airport Road. No other significant changes to the land use were observed on the remaining lands of the Study Area.</li> </ul>
2020	<ul style="list-style-type: none"> <li>- No significant changes to land use were observed for the Site or for the Study Area.</li> </ul>

## 4.2 FIRE INSURANCE PLANS

Access to the fire insurance plans for the Site and Study Area was not possible due to the closure of Government buildings at the time of writing this report (as a result of COVID-19). Once these records become accessible, they will be reviewed and assessed. It should be noted that information from these records may amend the conclusions of this report. The client will be notified of any information of relevance, if identified during the supplemental review.

## 4.3 CITY DIRECTORIES

Access to the fire insurance plans for the Site and Study Area was not possible due to the closure of Government buildings at the time of writing this report (as a result of COVID-19). Once these records become accessible, they will be reviewed and assessed. It should be noted that information from these records may amend the conclusions of this report. The client will be notified of any information of relevance, if identified during the supplemental review.

## 4.4 ERIS REPORT AND OTHER ENVIRONMENTAL SOURCE INFORMATION

### *ERIS Report*

*Toronto Inspection Ltd.* ordered a Report from ERIS Ltd. for the Site and Phase One Study Area. The ERIS Report includes the search results of federal, provincial, and private source databases. The ERIS search identified three (3) records for the subject Site and 148 records for the Study Area. The records that represent a potential environmental concern are discussed in *Table 8.1-1: Table of Potential Environmental Concerns*.

A copy of the ERIS Report is included as Appendix C.

## 4.5 TITLE SEARCH

No title search records were provided to *Toronto Inspection Ltd.* for review.

#### 4.6 PREVIOUS ENVIRONMENTAL, GEOLOGICAL AND GEOTECHNICAL REPORTS

No previous reports were provided to *Toronto Inspection Ltd.* for review.

#### 4.7 GOVERNMENT AND REGULATORY INFORMATION

##### ***Ministry of the Environment, Conservation and Parks – Freedom of Information***

The request submitted by *Toronto Inspection Ltd.* for on-file records pertaining to the Site is enclosed in Appendix D. A response has not been received from the MECP at the time this report was prepared. Upon receipt of MECP's response, *Toronto Inspection Ltd.* will review the information and forward to the client any environmentally significant information under a separate cover. The conclusions of this report may be amended based on the information provided by MECP.

##### ***Technical Standards and Safety Authority***

Technical Standards & Safety Authority (TSSA) was contacted to check their records for any fuel storage tanks that may have been present at the Site and the surrounding properties. An email correspondence (attached in Appendix E) from a TSSA representative, indicated that no fuel storage tank records were identified for the Site and surrounding properties.

##### ***MOE Inventory Records***

The following documents were reviewed:

- MOE Inventory of Coal Gasification Plant Waste Sites in Ontario, April 1987
- MOE Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, November 1998
- MOE Waste Disposal Site Inventory, June 1991
- MOE Inventory of PCB Storage Sites, January 1992

A review of the above-listed documents indicated that no active or closed waste disposal sites, historical coal gasification plant sites, or historical industrial sites which produced or used coal tar and related tars, were located within 1 km of the subject Site.

#### 4.8 WELL RECORDS

Based on the review of the Government of Ontario Well Record Map and the ERIS report, there were two wells on site and 24 well records within the remainder of the Study Area. In general, the stratigraphy encountered in the Study Area consisted mainly of clay, shale, and loam. The following is a summary of the information from well records within the vicinity of the Site (i.e., within approximately 100 m of the Site).

**Table 3.2.4-1: Summary of Well Records Within Approximately 100 m of the Site**

Well Location	Well Status, Completed Date	Stratigraphy*	Depth to Bedrock	Depth to Water Table
Lot 2 Con 1 On Site	Water Supply 10/19/1970	0-12 ft Loam (Brown) 12-34 ft Clay (Grey) 34-35 ft Medium Sand	Not encountered in drilling	Water found: 35 ft below ground surface (bgs)
Lot 19 Con 6 On Site	Water Supply 9/27/1971	0-10 ft Loam (Brown) 10-33 ft Clay (Grey)	Not encountered in drilling	Water found: 33 ft bgs
Lot 19 Con 6 (15 m west of the Site)	Abandoned-Supply 9/6/1979	0-15 ft Clay, Soft (Brown) 15-40 ft Clay, Stones (Blue) 40-49 ft Boulder, Hard (Blue) 49-88 ft Shale, Soft (Blue) 99-120 ft Shale, Hard (Blue) 120-129 ft Shale, Clay (Blue) 129-240 ft Shale, Hard (Blue)	Not encountered in drilling	Water found: 39 ft bgs
Lot 18 Con 6 (47 m north northeast of the Site)	Water Supply 3/27/1992	0-1 ft Loam, Hard (Brown) 1-20 ft Clay, Hard (Brown) 20-60 ft Clay, Sand (Grey)	Not encountered in drilling	Water found: 20 ft and 40 ft bgs
Lot 19 Con 6 (50 m north northeast of the Site)	Water Supply 5/27/1980	0-1 ft Loam, Hard (Brown) 1-20 ft Clay, Hard (Brown) 20-55 ft Clay, Hard (Grey) 55-58 ft Sand, Loose (Grey)	Not encountered in drilling	Water found: 55 ft bgs
Lot 20 Con 6 (83 m west of the Site)	Water Supply 9/18/1980	0-15 ft Sand (Grey) 15-25 ft Clay, Stones (Grey) 25-27 ft Sand, Gravel (Grey)	Not encountered in drilling	Water found: 26 ft bgs
12347 Airport Road Lot 2 Con 1 (92 m north northeast of the Site)	Abandoned-Other 6/13/2013	0-4 ft Fill (Brown) 4-30 ft Unknown (Grey)	Not encountered in drilling	Not reported
Lot 16 Con 6 (93 m east northeast of the Site)	Water Supply 9/17/1965	0-12 ft Loam, Clay (Brown) 12-49 ft Clay (Grey) 49-54 ft Shale (Grey)	Not encountered in drilling	Water found: 54 ft bgs
Lot 17 Con 6 (96 m east of the Site)	Water Supply 4/27/1972	0-12 ft Overburden (Brown) 12-42 ft Clay (Grey) 42-45 ft Coarse Sand (Grey) 45-53 ft Shale (Grey)	Not encountered in drilling	Water found: 42 ft bgs
Lot 17 Con 6 (98 m east southeast of the Site)	Water Supply 6/25/1958	0-12 ft Loam, Clay (Brown) 12-36 ft Clay (Grey) 36-38 ft Gravel	Not encountered in drilling	Water found: 38 ft bgs

\*\*Distances as indicated in the ERIS Report

## 4.9 COMPANY RECORDS

No company records were provided for review at the time of this Phase I ESA.

## 5.0 SITE RECONNAISSANCE

### 5.1 SPECIFIC OBSERVATIONS ON SITE

The Phase I ESA site visit was conducted by Mr. Albert Lee-Wah, B.E.S. of *Toronto Inspection Ltd.* in two occasions, the first one was performed on February 17, 2021 (wintertime); however, due to the ground snow-cover, a second visit was performed on June 24, 2021. At the time of the site visits, the weather was sunny, with temperature of approximately - 5 °C and 24 °C, respectively. Photographs taken during the site visits are included in Appendix F.

#### 5.1.1 GENERAL SITE LAYOUT AND OPERATIONS

##### 5.1.1.1 Property Use

###### *Current Use*

At the time of the site reconnaissance, the Site was occupied by two farmhouses associated to barns, sheds, and silos. Currently, the Site is used for agricultural and residential purposes.

###### *Products Manufactured*

At the time of the site reconnaissance, no manufacturing was observed on the Site.

###### *Vehicle and Equipment Maintenance Areas*

A private vehicle maintenance area was observed inside of a shed at 5762 Mayfield Road. No commercial maintenance of vehicles or equipment was observed at the time of the site reconnaissance.

##### 5.1.1.2 Topographic, Geologic, and Hydrogeologic Conditions

At the time of the site reconnaissance, the Site was observed to be relatively flat with a gentle slope towards the east direction. The south and southeast sections of the Site were crossed by a narrow creek, while wetland areas associated to narrow creeks were observed at the central-east sections of the property. Aside from the farmhouse areas, the remaining portions of the Site consisted of vegetated fields. Surface runoff was expected to flow towards the on-Site creeks and wetlands or to partially infiltrate into the ground.

##### 5.1.1.3 General Description of Structures

At the time of the site reconnaissance, the Site was occupied by two farmhouses and the structures were described as follows:

5762 Mayfield Road was composed by a residential building, four barns, three sheds, three silos and a pond. The residential building was a 1-storey house with a basement and its main entrance was located on the north elevation.

12245 Torbram Road was composed by a residential building, four barns and a silo. The residential building was a 1 ½-storey house with a basement and its main entrance was

located on the southwest elevation.

### **5.1.2 POTABLE WATER SUPPLY**

At the time of the site reconnaissance, potable water was provided by the municipal drinking water systems in Caledon.

### **5.1.3 WELLS**

#### **Water Wells**

At the time of the site reconnaissance, there were two wells on the Site. One well was located to the north of the residential building at 5762 Mayfield Road and the second well was located to the northeast of the residential building at 12245 Torbram Road. Reportedly, the wells were no longer in use.

#### **Monitoring or Observation Wells**

Monitoring wells were observed on the Site during the second site visit performed on June 24, 2021. The monitoring wells were drilled as part of a geotechnical investigation conducted by *Toronto Inspection Ltd.* in June 2021.

### **5.1.4 WASTE GENERATION AND MANAGEMENT**

#### **5.1.4.1 Sewage Disposal**

The on-Site farms are provided with septic systems associated to septic beds. At 5762 Mayfield Road, the septic system is located to the southeast of the residential building. At 12245 Torbram Road, the septic system is located to the southwest of the residential building.

#### **5.1.4.2 Wastewater**

At the time of the site reconnaissance, wastewater was expected to discharge into the on-site septic system.

#### **5.1.4.3 Solid and Liquid Waste Management**

Region of Peel provides the Site with a curbside collection for solid waste. At least three (3) black bins for garbage, one (1) blue bin for recyclable waste and one (1) green bin for organic waste were observed on the Site.

### **5.1.5 MATERIALS HANDLING AND STORAGE**

#### **5.1.5.1 Hazardous Materials**

No hazardous material was observed on the Site at the time of the site reconnaissance.

### 5.1.5.2 Unidentified Substances

No unidentified substances were observed on the Site at the time of the site reconnaissance.

### 5.1.5.3 Storage Containers

No storage containers were observed on the Site at the time of the site reconnaissance.

### 5.1.5.4 Raw Materials Handling and Storage

No raw material handling or storage was observed on the Site at the time of the site reconnaissance.

## 5.1.6 STORAGE TANKS

### *Aboveground Storage Tanks*

Five (5) aboveground storage tanks were present on the Site, with four (4) of them located within the area of 5762 Mayfield Road and one (1) reported to be inside the basement of the house at 12245 Torbram Road and was used for heating purposes. The tanks are described as follows:

**Table 5.1.6-1: Information on Storage Tanks**

Volume	Year of Construction	Content	Age	Notes
<b>5762 Mayfield Road</b>				
2200 L	2016	Diesel	5 years	The AST tag described the tanks as a diesel double-wall tank. No secondary containment was found under the tank, and no evidence of stains or leakage was observed on the surrounding area.
2200 L	2012	Diesel	9 years	The AST tag described the tank as a single-wall tank. No secondary containment was found under the tank, and no evidence of stains or leakage was observed on the surrounding area.
Unknown	Unknown	Unknown	Unknown	The AST tag was removed; therefore, its capacity, year of construction, content and age were unknown. No secondary containment was found under the tank, and no evidence of stains or leakage was observed on the surrounding area.
Unknown	Unknown	Unknown	Unknown	The AST was rusted; therefore, its capacity, year of construction, and age were unknown. The AST was surrounded by vegetation, and it was noticed to be empty.
<b>12245 Torbram Road</b>				
Unknown	Unknown	Unknown	Unknown	As reported by Ms. Loris Verge, the tenant at 5762 Mayfield Road, there is a fuel oil tank inside the basement of the residential building at 12245 Torbram Road. During the site visit performed on June 24, 2021, fill and vent pipes were observed outside the house, and they were located close to the northeast corner of the building. No access to the farmhouse was given and no further information regarding the tank was provided.

### ***Underground Storage Tanks***

No vents or pipes indicating the presence of an underground storage tank (UST) were found in the visible areas of the Site during the site reconnaissance.

It should be noted that the presence of USTs cannot be confirmed or refuted based on visual inspections or review of historical documents available to *Toronto Inspection Ltd.* at the time of this Phase I ESA.

#### **5.1.7 ODOURS AND AIR EMISSIONS**

During our inspection, there were no offensive odours or detectable sources of air emissions that may impact the ambient air quality on the Site.

#### **5.1.8 SPILLS, STAINS AND STAINED MATERIALS**

Oil stains were observed on the ground floor inside a shed located approximately 60 m west of the residential building at 5762 Mayfield Road.

#### **5.1.9 BELOW-GROUND STRUCTURES**

##### ***Oil and Water Separators***

No oil and water separators were observed on the Site at the time of the Site reconnaissance.

##### ***Underground Spill Containment Tank***

No underground spill containment tank was observed on the Site at the time of the site reconnaissance.

#### **5.1.10 INTERIOR OBSERVATIONS**

##### **5.1.10.1 General**

The interior of the farmhouses was not inspected at the time of the site reconnaissance due to Covid-19 restrictions.

##### **5.1.10.2 Heating and Cooling Systems**

Reportedly, the house at 5762 Mayfield Road is heated with electric base board heating while the house at 12245 Torbram Road used fuel oil for heating.

##### **5.1.10.3 Drains, Pits and Sumps**

The interior of the farmhouses was not inspected at the time of the site reconnaissance due to Covid-19 restrictions. No drains, pits or sumps were observed on the visible areas within the Site.

#### **5.1.10.4 Mechanical Equipment**

No mechanical or hydraulic equipment was identified in the visible areas within the Site at the time of the site reconnaissance.

### **5.1.11 EXTERIOR OBSERVATIONS**

#### **5.1.11.1 Pits and Lagoons**

At the time of the site reconnaissance, a circular pond was observed at 5762 Mayfield Road. As reported by Bill Jackson, the owner of the property, the pond is a liquid manure tank made from solid concrete with a depth of 8 ft and a diameter of 30 ft. It was used to collect liquid manure from runoff from the barns and then spread on the fields as fertilizer. The pond is no longer in use.

#### **5.1.11.2 Stressed Vegetation**

No stressed vegetation was observed on the Site at the time of the site reconnaissance.

#### **5.1.11.3 Fill and Debris**

At the time of the site reconnaissance, no obvious evidence of fill material was observed on the Site. However, a pile of debris (i.e., pieces of woods and plastic material) were observed approximately 60 m west of the residential building at 5762 Mayfield Road.

#### **5.1.11.4 Watercourses, Ditches, or Standing Water**

The south and southeast sections of the Site were crossed by a narrow creek, while wetland areas associated to narrow creeks were observed at the central-east sections of the property. No ditches or standing water were observed at the time of the site reconnaissance.

#### **5.1.11.5 Roads, Parking Facilities, and Rights-of-way**

The Site was accessed through Airport Road from the north, Mayfield Road from the east and Torbram Road from the south. No parking facilities were observed on the Site at the time of the site reconnaissance.

#### **5.1.11.6 Railway Lines or Spurs**

No evidence of railway lines or spurs was identified on the Site at the time of the site reconnaissance.

### **5.1.12 SPECIAL ATTENTION ITEMS**

#### ***Polychlorinated Biphenyls (PCBs)***

Polychlorinated Biphenyls (PCBs) were first commercially used as an insulation/cooling fluid in 1929 in North America. PCBs are generally found in transformers, light ballasts, and other electrical equipment that contain insulating fluids that were manufactured between 1929 and 1977. The use of PCBs in electrical equipment was banned in 1977.

The Site was developed prior to 1954; therefore, there is a possibility that PCB-containing equipment is present within the Site.

### ***Asbestos-Containing Materials (ACMs)***

Asbestos had been used in building construction as fire retardant and insulation materials. Although the use of asbestos in building material was halted in the late-1970s, asbestos can still be found in a variety of construction materials such as: pipe and pipe elbow insulation; vinyl floor tiles; suspended ceiling tiles; insulation around boilers; stucco ceiling materials; drywall compound.

The Site was developed prior to 1954; therefore, there is a possibility that ACMs are present within the Site.

### ***Lead***

Old paints are known to contain lead, which is defined as one of the Designated Substances under the Ontario Occupational Health and Safety Act - Section 30. Lead was used in oil-based paints as a drying agent and pigmentation. The use of lead-based paints was phased out in 1976. The potential for exposure to lead-based paints and the dust associated with the deterioration or removal of lead-based paint can pose a health risk to humans, especially to children.

The Site was developed prior 1954; therefore, there is a possibility that lead-based paints are present within the Subject Building.

Due to the age of development, there may be designated substances within the on-Site buildings. Therefore, a designated substance survey is recommended prior to commencement of renovation and/or demolition work of the buildings. If the buildings are not to be renovated and/or demolished, an asbestos survey is required according to Ontario Regulation 278/05.

### ***Ozone-Depleting Materials***

The interior of the farmhouses was not inspected at the time of the site reconnaissance due to Covid-19 restrictions. However, since the Site was also used for residential purposes, there was a possibility for the presence of domestic refrigerator units. These units may contain ozone depleting substances and must be serviced by licensed technicians.

### ***Urea Foam Formaldehyde Insulation (UFFI)***

The interior of the farmhouses was not inspected at the time of the site reconnaissance due to Covid-19 restrictions. No evidence of urea-formaldehyde foam insulation was observed on the visible areas of the buildings at the Site.

### ***Noise and Vibration***

The Site is located within a rural residential area in Caledon; therefore, noise and moderate vibration generated by vehicles and delivery trucks are to be expected.

### **Electric and Magnetic Field**

No high voltage transmission lines or substations generating electric or magnetic fields are suspected on site or on the adjacent properties.

### **5.2 ADJACENT AND NEIGHBOURING PROPERTIES OBSERVATIONS**

The Site is located in an area mainly of residential and agricultural developments, and some areas of industrial/commercial developments. Occupants and/or land usage of the adjacent and neighbouring properties at the time of the site reconnaissance include the following:

#### **Adjacent Properties**

**Table 5.2-1: Observations of Areas Adjacent to Site**

<b>Address Orientation</b>	<b>Owner / Occupant</b>	<b>Observations</b>
<b>North of Site</b>  12203 and 12347 Airport Road	<ul style="list-style-type: none"> <li>- Ryder Logistics &amp; Transportation</li> <li>- Legacy Supply Chain</li> <li>- Pepsico North Yard warehouse store</li> <li>- DHL warehouse store</li> </ul>	<p>The properties were occupied by industrial developments.</p> <p>No obvious evidence of potential environmental concerns was identified.</p>
<b>Northeast of Site</b>  10, 22, 34, 43 Perdue Courte	<ul style="list-style-type: none"> <li>- City Electric Supply Corporation</li> <li>- Aecon Materials engineering</li> <li>- Strada Aggregates</li> <li>- GTA Truck Driving School</li> <li>- AST Container Services Inc.</li> </ul>	<p>The properties adjacent to the northeast were occupied by commercial developments.</p> <p>No obvious evidence of potential environmental concerns was identified.</p>
<b>East of Site</b>  5923 and 5847 Mayfield Road	<ul style="list-style-type: none"> <li>- Unknown</li> </ul>	<p>Beyond Mayfield Road, the properties to the east were occupied by residential properties.</p> <p>No obvious evidence of potential environmental concerns was identified.</p>
<b>South of Site</b>  12089, 12179, 12201 Torbram Road	<ul style="list-style-type: none"> <li>- Unknown</li> </ul>	<p>Properties to the south consisted of residential developments.</p> <p>No obvious evidence of potential environmental concerns was identified.</p>
<b>Southeast of Site</b>  12182 and 12198 Torbram Road	<ul style="list-style-type: none"> <li>- Unknown</li> </ul>	<p>Beyond Torbram Road, the properties to the southeast consisted of residential developments.</p> <p>No obvious evidence of potential environmental concerns was identified.</p>

Address Orientation	Owner / Occupant	Observations
<b>Southwest of Site</b> 12306, 12361, 12381 and 12399 Torbram Road	- Unknown	Facing Torbram Road, the properties to the southwest consisted of residential and agricultural developments.  No obvious evidence of potential environmental concerns was identified.
<b>West of Site</b> No municipal address assigned	- Unknown	The property to the west consisted of vacant lands.  No obvious evidence of potential environmental concerns was identified.

**Neighbouring Properties**

Neighbouring properties consisted of industrial developments to the north, beyond Airport Road; Agricultural fields to the east; agricultural fields to the south and a golf course to the southwest. There is a potential for the usage of pesticides in areas occupied by agricultural fields and golf courses.

## 6.0 INTERVIEWS

A Site interview questionnaire was forwarded on June 10, 2021, to Mr. Jordan Holt, the client's representative, an in-person interview was performed on June 24, 2021 with Ms. Loris Verge, the tenant at 5762 Mayfield Road. An e-mail response regarding the Site was received on June 24, 2021, from Mr. Bill Jackson, the owner of the property. Relevant information concerning the Site obtained from the interviews are summarized below:

**Table 6.0-1: Information Summary obtained from Interviews**

Name and Position	Date of Interview	Method of Interview	Relevant Information
Jordan Holt Client's representative	June 10, 2021	Questionnaire	<ul style="list-style-type: none"> <li>• Mr. Holt informed that has been involved with the Site for 8 months.</li> <li>• Mr. Holt reported that the actual owner of the Site is Tullamore Industrial GP Limited.</li> <li>• Mr. Holt mentioned that the Site has been historically used as a farm.</li> <li>• Mr. Holt informed that the age of the on-site structures is unknow and that he is not aware of any renovation, demolition, or addition to the on-site structures.</li> <li>• Mr. Holt indicated that the proposed land use of the Site will be industrial.</li> </ul>
Loris Verge Tenant	June 24, 2021	In-person	<ul style="list-style-type: none"> <li>• Mrs. Verge informed that she lived for approximately 20 years at the on-Site residential building located at 12245 Torbram Road.</li> <li>• Mrs. Verge mentioned that there is a fuel oil tank inside the basement of 12245 Torbram Road.</li> <li>• Mrs. Verge informed that for the past 4 years, she resided at the on-Site residential building located at 5762 Mayfield Road.</li> <li>• Mrs. Verge reported that there are two water wells on the Site; however, they are no longer in use. The drinking water is currently provided by the municipality.</li> <li>• Mrs. Verge informed that the buildings are heated by electricity.</li> </ul>
Bill Jordan Owner	June 24, 2021	E-mail	<ul style="list-style-type: none"> <li>• Mr. Jackson informed that Tullamore Industrial GP Limited purchased the property on March 31, 2021.</li> <li>• Mr Jackson mentioned that 5762 Mayfield Road is heated with electric base board heating, while 12245 Torbram Road used fuel oil for heating.</li> <li>• Mr. Jackson reported that the on-Site Pond is a liquid manure tank made from solid concrete with a depth of 8 ft and a diameter of 30 ft. It was used to collect liquid manure from runoff from the barns and then spread on the fields as fertilizers. It is no longer in use; however, it is full of surface water.</li> </ul>

## 7.0 FINDINGS

### 7.1 SITE HISTORY

The Site, which has been historically used for residential and agricultural purposes was developed prior 1954. The current and past uses of the Site (based on records available at the time of writing this Phase I ESA report) are described as follows:

**Table 7.1-1: Current and Past Uses of Site**

Years	Name of Owner / Occupant(s)	Description of Property Use	Historical and Current Site Activities
Prior to 1954	Unknown	Residential and Agricultural	<ul style="list-style-type: none"> <li>The Site was developed with three farmhouses associated to sheds, barns, and driveways.</li> </ul>
1954-2021	Unknown	Residential and Agricultural	<ul style="list-style-type: none"> <li>The aerial photographs show no change in land use, the Site remained as a farmland over the years.</li> </ul>
2021	Tullamore Industrial GP Limited	Residential and Agricultural	<ul style="list-style-type: none"> <li>No changes in the land use were observed for the Site. Reportedly, Tullamore Industrial GP Limited purchased the property on March 31, 2021.</li> </ul>

### 7.2 HISTORICAL USES OF ADJACENT AND NEIGHBOURING PROPERTIES

Based on a review of available records (i.e., selected aerial photographs, ERIS, and Google Earth Street view images of selected years), the adjacent and neighbouring properties surrounding the Site have been historically used for agricultural and residential purposes. Commercial activities were observed in the early 2000s with the expansion of commercial and industrial activities around 2007. Below is a summary of notable historical and/or recent activities that occurred on the properties surrounding the Site.

**Table 7.2-1: Current and Past Uses of Surrounding Properties**

Years	Location			
	North	East	South	West
Prior to 1954	<ul style="list-style-type: none"> <li>Lands to the north were vacant or used for agricultural purposes.</li> </ul>	<ul style="list-style-type: none"> <li>Lands to the east were vacant or used for agricultural purposes.</li> </ul>	<ul style="list-style-type: none"> <li>Lands to the south were vacant or used for agricultural purposes.</li> </ul>	<ul style="list-style-type: none"> <li>Lands to the west were vacant or used for agricultural purposes.</li> </ul>

Years	Location			
	North	East	South	West
2001-2010	<ul style="list-style-type: none"> <li>• Lands to the north were vacant or used for agricultural purposes until at least 2005. The 2009 aerial photograph shows the property at 12203 Airport Road developed as an industrial building (warehouse).</li> <li>• In the 2001 aerial photograph, lands to the northeast at 12050 and 12016 Airport Road were developed as commercial properties, including a <b>gas station at 12016 Airport Road.</b></li> <li>• In the 2001 aerial photograph, a property to the northwest at 12404 Airport Road was developed with a residential and commercial property.</li> <li>• In the 2007 aerial photograph, properties to the northeast at 10 and 43 Perdue Courte, were developed as commercial/industrial properties.</li> </ul>	<ul style="list-style-type: none"> <li>• Lands to the east were used for residential or agricultural purposes.</li> </ul>	<ul style="list-style-type: none"> <li>• Lands to the south, southeast and southwest were used for residential, agricultural, or commercial purposes. A <b>golf course</b> was developed at <b>12552 Torbram Road</b> by 2001.</li> </ul>	<ul style="list-style-type: none"> <li>• Lands to the west were vacant or used for agricultural purposes.</li> </ul>
2010-present	<ul style="list-style-type: none"> <li>• In the 2011 aerial photograph, a property to the northeast, at 34 Perdue Courte was developed as commercial.</li> <li>• In the 2014 aerial photograph, a property to the north at 12347 Airport Road was developed with an industrial building.</li> <li>• In 2015 aerial photograph, the property to the northeast at 33 Perdue Courte was used for commercial purposes</li> </ul>	<ul style="list-style-type: none"> <li>• Lands to the east were used for residential or agricultural purposes.</li> </ul>	<ul style="list-style-type: none"> <li>• Lands to the south, southeast and southwest were used for residential, agricultural, or commercial purposes. A <b>golf course</b> was developed at <b>12552 Torbram Road.</b></li> </ul>	<ul style="list-style-type: none"> <li>• Lands to the west were vacant or used for agricultural purposes.</li> </ul>

## 8.0 EVALUATION OF FINDINGS

### 8.1 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN SITE & STUDY AREA

Based on the information obtained through a records review, visual observations made during the site reconnaissance, and the interviews, the Phase I ESA has revealed the following potential environmental concerns which may impact the subsurface soil and/or groundwater at the Site.

**Table 8.1-1: Table of Potential Environmental Concerns**

Location	Potential Environmental Concerns	Source Documents	Potential to Impact Site
5762 Mayfield Road and 12245 Torbram Road <i>Site</i>	<ul style="list-style-type: none"> <li>The Site has been historically used for residential and agricultural purposes; therefore, there is a potential for the usage of pesticides on the property.</li> <li>Five (5) ASTs were present on the Site at the time of the site reconnaissance. Four (4) of them were located in the area of 5762 Mayfield Road and one (1) was reported to be inside the basement of the house at 12245 Torbram Road and was used for heating purposes.</li> <li>Oil stains were observed on the ground floor inside a shed located approximately 60 m west of the residential building at 5762 Mayfield Road.</li> <li>A farmhouse and associated sheds and barns, once located at the north portion of the Site in 1954, were no longer visible in the 2001 aerial photograph. Since the buildings were demolished, there is a potential for the usage of fill material for the purpose of grading at that portion of the Site.</li> </ul>	Site Reconnaissance	Yes
34 Perdue Road <i>Adjacent to the Site to the northeast</i>	<ul style="list-style-type: none"> <li>6103910 Canada Inc. was reported as a waste generator of waste oils and lubricants (2011-2020) due to a general automotive repair activity</li> </ul>	ERIS	Yes
10 Perdue Road <i>Adjacent to the Site to the northeast</i>	<ul style="list-style-type: none"> <li>Aecon Materials Engineering Corp was listed as a waste generator of halogenated solvents (2009-2020)</li> </ul>	ERIS	Yes
43 Perdue Court <i>Adjacent to the Site to the northeast</i>	<ul style="list-style-type: none"> <li>ATS Container Services Inc. was reported as a waste generator of aromatic solvents and residues (2018-2020)</li> </ul>	ERIS	Yes
12552 Mayfield Road <i>Adjacent to the southwest of Site</i>	<ul style="list-style-type: none"> <li>A golf course, Mayfield Golf club, was located adjacent to the Site to the southwest. There is a potential for the usage of pesticides on golf courses.</li> </ul>	Aerial Photographs	Yes

Location	Potential Environmental Concerns	Source Documents	Potential to Impact Site
Airport Road north of Mayfield  <i>Approximately 20 m north of Site</i>	<ul style="list-style-type: none"> <li>A spill incident was reported to the MOE (MECP) in 9/18/2015 due to a spill of 120 liters of hydraulic oil. The spill was reported to be cleaned.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to distance, amount of spill and trans gradient orientation.
5847 Mayfield Road  <i>Approximately 25 m east of Site</i>	<ul style="list-style-type: none"> <li>A spill incident was reported to the MOE (MECP) in 12/8/2004 due to a spill of 40 liters of motor oil at a residential property.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to distance, amount of spill and trans gradient orientation.
12404 Airport Road Adjacent to the Site to the northwest	<ul style="list-style-type: none"> <li>A spill incident was reported to the MOE (MECP) in 11/5/2004 due to a tank (aboveground) leak of 20 liters of diesel.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to the amount of spill.
12151 Airport Road Approximately 175 m northeast of Site	<ul style="list-style-type: none"> <li>Parkview Transit/STC was reported as a waste generator of waste oils and lubricants, petroleum distillates and aliphatic solvents (2014-2020).</li> <li>A spill incident was reported to the MOE (MECP) in 25/07/2018 due to a fire explosion. Contaminant name: diesel; quantity: unknown.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to distance and trans gradient orientation of the property.
Airport Road at Davis Lane  <i>Approximately 175 m northeast of Site</i>	<ul style="list-style-type: none"> <li>A spill incident was reported to the MOE (MECP) in 1/22/2008 due to petroleum leak to road, ditch. The amount of the spill is unknown.</li> <li>A spill incident was reported to the MOE (MECP) in 16/03/2020 due to a collision. The amount of gasoline spilled is unknown.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to distance and trans gradient orientation of the property
12203 Airport Road  <i>Approximately 80 m northeast of Site</i>	<ul style="list-style-type: none"> <li>A spill incident was reported to the MOE (MECP) in 3/8/2018 due to a leak of 35-40 L of hydraulic oil to ground.</li> <li>A spill incident was reported to the MOE (MECP) in 16/12/2018 due to a collision resulting in a spill of 25 litres of diesel to asphalt.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to distance and trans gradient orientation of the property
5981 Mayfield Road  <i>Approximately 245 m northeast of Site</i>	<ul style="list-style-type: none"> <li>A service station, Penny's Gas Bar, was reported for this address.</li> <li>A retail fuel outlet and many single-wall gasoline USTs were reported for the property.</li> </ul>	ERIS	<b><i>Anticipated to be low</i></b> , due to distance and down gradient orientation of the property

Location	Potential Environmental Concerns	Source Documents	Potential to Impact Site
12016 Airport Road <i>Approximately 250 m northeast of Site</i>	<ul style="list-style-type: none"> <li>• 2572916 Ontario Inc. was reported as a gasoline station.</li> <li>• A 75000 liters fibreglass double-wall storage tank was reported for the property.</li> <li>• Shell Canada was reported as a waste generator of oil skimming and sludges (2014-2020)</li> </ul>	ERIS	<i><b>Anticipated to be low</b></i> , due to distance and down gradient orientation of the property

The remaining records or documents available are not considered to represent issues of significant potential environmental concerns for the Site, based on the orientation of the properties, the inferred groundwater flow in the Study Area, nature of the records and/or distance.

Areas of potential environmental concerns within the Site and Study Area are shown on Appendix A.

## 9.0 CONCLUSIONS

In summary, based on the records review, the site reconnaissance and the interviews conducted during the Phase I ESA, the identified areas of potential environmental concerns are summarized below:

### On-Site sources:

- The Site has been historically used for residential and agricultural purposes; therefore, there is a potential for the usage of pesticides on the property.
- Five (5) ASTs were present on the Site at the time of the site reconnaissance. Four (4) of them were located within the area of 5762 Mayfield Road and one (1) was reported to be inside the basement of the house at 12245 Torbram Road and was used for heating purposes.
- Oil Stains were observed on the ground floor inside a shed located approximately 60 m west of the residential building at 5762 Mayfield Road.
- A farmhouse and associated sheds and barns, once located at the north portion of the Site in 1954, were no longer visible in the 2001 aerial photograph. Since the buildings were demolished, there is a potential for the usage of fill material for the purpose of grading at that portion of the Site.

### Off-Site Sources:

- 34 Perdue Road (*Adjacent to the Site to the northeast*) - 103910 Canada Inc. was reported as a waste generator of waste oils & lubricants (2011-2020) due to a general automotive repair activity.
- 10 Perdue Road (*Adjacent to the Site to the northeast*) - Aecon Materials Engineering Corp was listed as a waste generator of halogenated solvents (2009-2020).
- 43 Perdue Court (*Adjacent to the Site to the northeast*) - ATS Container Services Inc. was reported as a waste generator of aromatic solvents and residues (2018-2020).
- 12552 Mayfield Road (*Adjacent to the southwest of Site*) - A golf course, Mayfield Golf club, was located adjacent to the Site to the southwest. There is a potential for the usage of pesticides on golf courses.

Given the fact that aboveground storage tanks (ASTs) are still present on the Site, it is recommended a secondary containment be placed underneath of the ASTs.

Based on the findings of the Phase I ESA, it is *Toronto Inspection Ltd.*'s opinion that further environmental investigation, i.e., a Phase II ESA is recommended for the Site.

### Government Inventory and Database Records

- *Inventory of Coal Gasification Plant Waste Sites in Ontario*, Ministry of the Environment (MOE) Waste Management Branch, July 1987, records search within approximately 1 km of the Site
- *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario*, MOE, November 1988, records search within approximately 1 km of the Site.
- *Waste Disposal Site Inventory*, MOE Waste Management Branch, June 1991, active and closed facilities within approximately 1 km of the Site
- *Brownfields Environmental Site Registry*, Ministry of the Environment, Conservation and Parks (MECP) website

### Interviews

- Questionnaire interview with Mr. Jordan Holt, the client's representative on June 10<sup>th</sup>, 2021, an in-person interview with Ms. Loris Verge, the tenant of 5762 Mayfield Road, on June 24<sup>th</sup>, 2021, and an e-mail response from Mr. Bill Jackson on June 24<sup>th</sup>, 2021.

### Requests for File Information

- MECP Freedom of Information Office regarding environmental concerns, violations, complaints, etc.
- Ministry of Natural Resources and Forestry (MNR), Natural Heritage website regarding environmentally sensitive areas.
- Technical Standards and Safety Authority (TSSA) for information pertaining to fuel storage tanks.

### Topographic Maps

- Topographic map: The Atlas of Canada – Toporama website (<http://atlas.gc.ca/toporama/en/index.html>), Natural Resources Canada

Toronto Inspection Ltd.

### 11.0 GENERAL STATEMENT OF LIMITATION

This Phase I Environmental Site Assessment was conducted in general compliance with currently acceptable practices for environmental site investigations, and specific client requests, as applicable to this property. It is based on documents and oral information supplied to *Toronto Inspection Ltd.* There is no warranty expressed or implied or representations by *Toronto Inspection Ltd.* that this investigation uncovered all potential environmental risks or liabilities associated with the subject site.

This report was prepared by *Toronto Inspection Ltd.* for the account of Tullamore Industrial GP Limited. The material in this report reflects *Toronto Inspection Ltd.*'s judgment in light of the information available to them at the time of preparation. Any use which a Third Party makes of this report, or any reliance on decisions to be made based on it, is the responsibility of these Third Parties. *Toronto Inspection Ltd.* accepts no responsibility for damages, if any, suffered by any Third Party as a result of decisions made or actions based on this report.

*Toronto Inspection Ltd.* did not provide any service to investigate or detect the presence of moisture, mould or other biological contaminants in or around any structure, or any service that was designed or intended to prevent or lower the risk of the occurrence of the amplification of the same. Mould is ubiquitous to the environment with mould amplification occurring when building materials are impacted by moisture. Site conditions are outside of *Toronto Inspection Ltd.*'s control, and mould amplification will likely occur, or continue to occur, in the presence of moisture. As such, *Toronto Inspection Ltd.* cannot and shall not be held responsible for the occurrence or recurrence of mould amplification.

To the fullest extent permitted by law, the client's maximum aggregate recovery against *Toronto Inspection Ltd.*, its directors, employees, sub-contractors, and representatives, for any and all claims by Tullamore Industrial GP Limited. for all causes including, but not limited to, claims of breach of contract, breach of warranty and/or negligence, shall be limited to the amount of professional insurance maintained.

Yours sincerely,  
**TORONTO INSPECTION LTD.**

**Itala Abreu, B.Sc., EPT**  
Environmental Scientist

**Rene Quiambao, P.Eng., QP<sub>ESA</sub>**

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

**Certificate #:** 8730-5BXQ5L  
**Application Year:** 02  
**Issue Date:** 8/26/02  
**Approval Type:** Municipal & Private water  
**Status:** Approved  
**Application Type:** Amended CofA  
**Client Name:** The Regional Municipality of Peel  
**Client Address:** 10 Peel Centre Drive  
**Client City:** Brampton  
**Client Postal Code:** L6T 4B9  
**Project Description:** This application is to amend the CofA to complete upgrades for Well No. 5 as described in Condition 5 of the CofA. The work to be completed under this project is to isolate Well No. 5 and abandon. Remove existing chlorination set up that includes injection into the Well No. 5 discharge header. Re-chlorinate the water entering this facility from

the Caledon Village Booster Pumping Station via. the 100mm Dia. pipe. The chlorinated water is then conveyed to the Mono Mills standpipe.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Dec 31, 2020**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2018**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Dec 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Dec 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Nov 2020**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Dec 31, 2020**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Dec 31, 2020**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Dec 31, 2020**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Oct 31, 2020**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Sep 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2018**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Sep 30, 2020**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Dec 31, 2020**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 31, 2020**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Dec 31, 2020**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Nov 2020**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Dec 31, 2020**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Mar 2020; Jul 2020 - Aug 2020**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**Appendix D**

**MECP Freedom of Information**

RE: PN 5552 - Airport Road and Mayfield Road, Caledon - Request for file info from TSSA

---

From: Public Information Services (publicinformationservices@tssa.org)

To: itala@torontoinspection.com

Date: Monday, February 22, 2021, 03:45 PM EST

---

Good afternoon,

Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid\\_=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392) and email the completed form to [publicinformationservices@tssa.org](mailto:publicinformationservices@tssa.org) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Thanks,

**Sherees Thompson | Public Information Agent**
