

Caledon Green Development Standard: Site Plan Checklist

Instructions

Applicants are required to complete the developer checklist during the Pre-Consultation (DART) Review and Formal Application phase. The Town of Caledon's Green Development Standard Guidebook provides the metric requirements, submission requirements, specifications and applicable site exclusions, and resources to assist applicants in completing their GDS submission. Note that the checklist is a condensed version of the metrics, and should be completed using the GDS Guidebook as a reference to ensure completeness.

This checklist is primarily applicable to residential developments (i.e., detached, semis, and townhouses), institutional, and commercial developments submitting for Site Plan approval. For subsequent submissions, applicants are only required to complete the metrics that have not been approved by the Town of Caledon.

Theme 2: Green Infrastructure

	Completed by Development Applicant	Completed by Town of Caledon
Summarized Metric and Submission Requirements	Reference to Drawing, Plan, Report, with page number.	Brief summary of internal verification notes and approval status
Refer to GDS Guidebook for additional details	Please include comments/notes.	Enter detailed notes on Drawing, Plan, Reports
2.1 On-Site Green Infrastructure All Sites: Meet minimum green cover targets of 0.6 (low-rise residential), 0.5 (multi-unit residential in strategic growth areas), and 0.30 (institutional and commercial) by completing the Green Factor Tool. Eligible green infrastructure features must comply with specifications in the GDS and other Town standards and guidelines. Note: mixed use sites can pro-rate their required factor based on the gross floor area of each of the types of development on site. Submission Requirements: <ul style="list-style-type: none"> • Green Factor Scoresheet • Landscape and Planting Plans • Arborist’s Report 		Parks and Natural Heritage Reviewer Name and Notes
		Metric Approved
2.2 Healthy Soils All Sites: Soil volume: Provide access to a minimum of 30 m ³ soil volume for newly planted trees or tree-specific soil volume indicated in municipal tree species guide. Refer to GDS Guidebook for additional details on techniques. Grading and compaction: Where feasible and appropriate, use selective grading techniques that reduce soil compaction and preserve the natural landform as much as possible. Refer to GDS Guidebook for additional details on techniques. Submission Requirements: <ul style="list-style-type: none"> • Soils Report • Landscape Plan and Grading Plan • Letter of Commitment (where applicable) 		Development Engineering Reviewer Name and Notes
