**RE: TRANSPORTATION CONFORMANCE LETTER
ALLOA – MAYFIELD WEST V DRAFT PLAN**

Dear Kavleen and Yifan,

C.F. Crozier & Associates Inc. (Crozier) has been retained to prepare a Transportation Compliance Letter in support of the Mayfield West V Draft Plan development application. The Mayfield West V Draft Plan is comprised of part of Lot 18 Concession 3, West of Hurontario Street, in the Town of Caledon, Regional Municipality of Peel. The Draft Plan is also located within the Alloa Secondary Plan and Alloa Phase 1 Tertiary Plan.

A Transportation Impact Study (TIS) (Crozier, December 2024) was prepared in support of the Alloa Phase 1 Tertiary Plan. The TIS comprehensively evaluated the impacts of the Alloa Phase 1 Lands from a transportation perspective, identifying required mitigation measures as warranted. The Tertiary Plan was designed to comprise the intended individual Draft Plans such that the Tertiary Plan's road network and land use layout was reflective of the respective Draft Plans for each parcel.

The Transportation Conformance Letter builds on and accompanies the Alloa Phase 1 Tertiary Plan TIS (Crozier, December 2024), and is in support of the Draft Plan development application. The letter herein reviews the following:

- Site Context
- Development Proposal
- Site Generated Traffic Review
- Recommendations

1.0 Site Context

1.1 Subject Lands

The Mayfield West V Draft Plan is located within the Alloa Phase 1 Lands, covers an area of approximately 6.17 ha and currently consists of undeveloped greenfield lands. The Subject Site is located on the southeast side of the Alloa Phase 1 Lands and is generally bound by Chinguacousy Road to the east, and undeveloped greenfield lands to the north, south and west.

Figure 1 illustrates the site location.

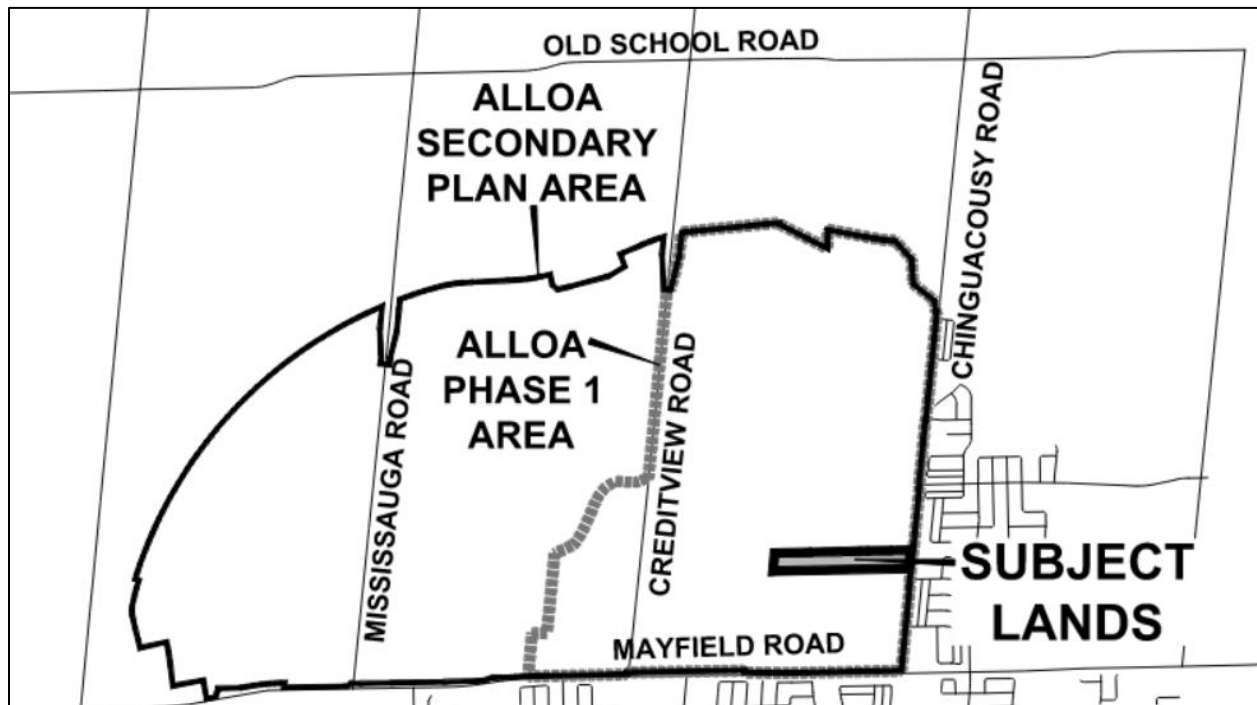

Figure 1: Site Location

1.2 Existing Transportation Context

Table 1 outlines the roadways near the Subject Site, including road and active transportation network features.

Table 1: Existing Roadway Network

Feature	Roadway	
	Mayfield Road	Chinguacousy Road
Direction	Two-Way (East-West)	Two-Way (North-South)
Span	Winston Churchill Blvd to Albion Vaughan Rd	Olde Base Line Rd to Mayfield Rd
Jurisdiction	Region of Peel	Town of Caledon
Number of Travel Lanes	Two Lanes	Two Lanes
Pedestrian Facilities	None	None
Cycling Facilities	None	None

1.3 Future Transportation Context

Capital road network improvements are planned near the Mayfield West V Draft Plan Lands to support future traffic growth. In addition, a collector road network is proposed to service the Alloa Secondary Plan Area, with some road located within the Mayfield West V Draft Plan.

Table 2 outlines the future transportation improvements, relevant to the Mayfield West IV Draft Plan.

Table 2: Future Transportation Improvements

Roadway	Improvement	Improvement Type
Mayfield Road	Widening to Six Lanes	Capital Work
Chinguacousy Road	Widening to Four Lanes	Capital Work
Highway 413	New Highway	Capital Work
Alexander Gillespie Avenue (Street D in Tertiary Plan)	New Collector Road	Alloa Secondary Plan Collector Road Network

Further details regarding these improvements are included within the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024).

Attachment 1 includes excerpts from the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024).

2.0 Development Proposal

The Mayfield West V Draft Plan proposes low density residential units. **Table 3** summarizes the Development Proposal. In this general area, the Tertiary Plan assumed a 3.24 ha Elementary School Block, of which 1.88 ha (60% of the school) were located within the subject Draft Plan. However, since the Tertiary Plan submission, the School Block has been converted into approximately 48 additional residential dwelling units.

Table 3: Development Proposal (Comparison)

Plan	Land Use		Statistic	Area
Tertiary Plan¹	Residential	Low Density	45 units	1.60 ha
		Medium Density	71 units	1.00 ha
	Institutional	Elementary School	30 jobs (60% of School Block)	1.88 ha
	Total ²			6.17 ha
Draft Plan	Residential	Low Density	71 units	1.85 ha
		Medium Density	93 units	1.23 ha
	Institutional	Elementary School	0 jobs (no school)	0.00 ha
	Total ²			6.17 ha

Note 1: Mayfield West V Draft Plan represents Zones AB and AD of the Alloa Phase 1 Tertiary Plan.

Note 2: Total area includes road widening, collector and local road rights-of-way areas that are not displayed in this land use table. Areas from the Tertiary Plan are approximated from Tertiary Plan measurements.

Attachment 2 includes the Draft Plan prepared by Glen Schnarr & Associates Inc. and dated December 3, 2024.

3.0 Site Generated Traffic Review

For comparative purposes, trip generation rates were calculated based on the Alloa Phase 1 Tertiary Plan trip generation and development yield, as outlined in the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024), given the non-linear nature of the trip generation rates outlined in the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition (September 2021).

Table 4 outlines the trip generation rates based on the Alloa Phase 1 Tertiary Plan trip generation and development yield.

Table 4: Trip Generation Rates

Land Use		Statistic	A.M.		P.M.	
			In	Out	In	Out
Commercial ¹		52,003 m ²	0.35/100 m ²	0.26/100 m ²	0.86/100 m ²	0.89/100 m ²
Residential	Low Density	2,171 units	0.10/unit	0.32/unit	0.40/unit	0.24/unit
	Medium Density	2,565 units	0.05/unit	0.18/unit	0.21/unit	0.13/unit
	Medium-High Density ¹	4,429 units	0.07/unit	0.26/unit	0.18/unit	0.11/unit
Elementary School		150 jobs	1.25/job	1.05/job	0.26/job	0.31/job

Note 1: Includes mixed use development yield.

Table 5 outlines the trip generation for the Mayfield West V Draft Plan.

Table 5: Trip Generation

Land Use	Statistic	A.M. Trips ¹			P.M. Trips ¹		
		In	Out	Total	In	Out	Total
Low Density Residential (LUC 210)	71 units	7	23	30	29	17	46
Medium Density Residential (LUC 220)	93 units	5	17	22	20	12	32
Alloa Phase 1 Internal Trips ²	-	6	5	11	4	4	8
Total		18	45	63	53	33	86

Note 1: Rounding may cause the appearance of discrepancies.

Note 2: The internal trips are scaled based on the new development yield of the Draft Plan, but based on forecasts from the Tertiary Plan.

The Mayfield West V Draft Plan is expected to generate 63 and 86 two-way vehicle trips during the weekday a.m. and p.m. peak hours, respectively.

3.1 Tertiary Plan Comparison

The Alloa Phase 1 Tertiary Plan was split into zones for the purpose of trip distribution and assignment. The total Tertiary Plan trip generation was also divided into these zones, based on the proportional area of each zone in comparison to the total area for each land use. The Mayfield West V Draft Plan is representative of the Zones AB and AD, as outlined in the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024).

Table 6 outlines the trip generation for the Mayfield West V Lands based on the Mayfield West V Draft Plan and the zonal approximation of the Alloa Phase 1 Tertiary Plan.

Table 6: Trip Generation (Comparison)

Plan	Land Use	Statistic	A.M. Trips ¹			P.M. Trips ¹		
			In	Out	Total	In	Out	Total
Tertiary Plan Assumption	Low Density Residential (LUC 210)	45 units	4	15	19	18	11	29
	Medium Density Residential (LUC 220)	71 units	4	13	17	15	9	24
	Elementary School (LUC 520)	30 jobs ³	38	32	69	8	9	17
	Alloa Phase 1 Internal Trips ²	-	12	10	22	3	4	7
	Total		58	69	127	45	33	78
Draft Plan	Low Density Residential (LUC 210)	71 units (+26 units)	7	23	30	29	17	46
	Medium Density Residential (LUC 220)	93 units (+22 units)	5	17	22	20	12	32
	Elementary School (LUC 520)	0 jobs (-30 jobs)	0	0	0	0	0	0
	Alloa Phase 1 Internal Trips ²	-	6	5	11	4	4	8
	Total		18	45	63	53	33	86
Net Change			-40	-24	-64	+8	+0	+8

Note 1: Rounding may cause the appearance of discrepancies.

Note 2: For the Tertiary Plan, the internal trips are estimated by a zonal approach. For the Draft Plan, the internal trips are scaled based on the new development yield of the Draft Plan, but based on forecasts from the Tertiary Plan.

Note 3: Full elementary school is 50 jobs, however the trip generation forecast assumes approximately 60% of the school is captured by this Draft Plan, hence 30 jobs.

In comparison to trip generation for the Proposed Development outlined in the Alloa Phase 1 Tertiary Plan Transportation Impact Study, the Draft Plan is estimated to generate -64 and +8 net two-way vehicle trips during the weekday a.m. and p.m. peak hours, respectively. Therefore, a reduction in trips is expected for the a.m. peak hour, while an increase in trips is forecast for the p.m. peak hour. However, a net increase of eight vehicle trips in the p.m. peak hour is relatively minor and is not expected to result in notable incremental traffic impacts on the surrounding roadways. As such, the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024) conclusions are considered valid, and an updated traffic operations analysis was not prepared herein.

Attachment 1 includes excerpts from the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024).

Finally, due to a planned aggressive buildout, it is expected that most of the Alloa Phase 1 collector road network will be in place prior to buildout of the subject Draft Plan. As a result, supplementary traffic analysis that considers additional phasing of this and potentially other

nearby draft plans is not required since recommended improvements for the Tertiary Plan would be implemented.

4.0 Recommendations

The Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024) outlined recommendations to support the Alloa Phase 1 Lands. The section herein reviews the multi-modal transportation network recommendations as it relates to the Mayfield West V Draft Plan.

4.1 Automobile

As part of the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024), no automobile recommendations were identified within the Mayfield West V Draft Plan.

Attachment 1 includes excerpts from the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024).

4.2 Active Transportation

Active transportation facilities, including sidewalks and pedestrian crossings, are proposed throughout the Draft Plan. Both sides of all streets (apart from the Moose Lane) are recommended to have sidewalks on both sides of streets as outlined in the Parking Plan prepared by Glen Schnarr & Associates Inc. Pedestrian crossings consistent with the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024) will be provided in this Draft Plan.

Attachment 1 includes excerpts from the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024).

4.3 Transit

The Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024) outlined a proposed transit network to service the Alloa Phase 1 Lands. The Mayfield West V Draft Plan can be serviced by the proposed new transit route that operates along Alexander Gillespie Avenue.

Error! Reference source not found.**3** includes the proposed transit network for the Alloa Phase 1 Lands.

5.0 Conclusions

The Mayfield West V Draft Plan is located within the Alloa Phase 1 Lands, for which a Transportation Impact Study (Crozier, December 2024) was prepared. Overall, there are no significant enough changes for the Subject Development between the Mayfield West V Draft Plan and the Alloa Phase 1 Tertiary Plan from a transportation perspective given the similar trip generations and aligned transportation improvements. As such, the analysis and conclusions outlined in the Alloa Phase 1 Tertiary Plan Transportation Impact Study (Crozier, December 2024) remain valid and are not updated herein.

Should you have any questions or require any further information, please do not hesitate to contact the undersigned.

1.2 Development Proposal

The Alloa Phase 1 Tertiary Plan proposes a mixed-use community comprising 26,724 population and jobs across a number of low, medium and high-density residential uses, in addition to commercial, institutional and recreational uses. As outlined in the Tertiary Plan and development statistics prepared by Glen Schnarr & Associates Inc., dated August 20, 2024, and June 3, 2024, respectively, the Alloa Phase 1 Lands consists of 7,203 residential units and 27,478 m² of commercial gross floor area, as well as mixed-use areas consisting of 1,962 residential units and 24,525 m² commercial gross floor area.

In addition to the existing road network and planned capital works by the Town of Caledon (Town), Region of Peel (Region) and Ontario Ministry of Transportation (MTO), the Tertiary Plan also proposes an internal network of collector and local roads, intended to support multimodal connectivity within the Secondary Plan area and to the external study road network.

Table 1 summarizes the Development Proposal.

Table 1: Development Proposal

Land Use	Type	Statistic ¹	Area ¹	Jobs/Population ¹
Commercial		27,478 m ²	12.49 ha	550 jobs
Mixed Use		24,525 m ²	9.81 ha	491 jobs
		1,962 units		4,061 people
Residential	Low Density	2,171 units	72.35 ha	7,901 people
	Medium Density	2,565 units	42.75 ha	8,465 people
	Medium-High Density	2,467 units	16.44 ha	5,106 people
Elementary School		3 schools	8.91 ha	150 jobs
Parks		-	15.52 ha	-

Note 1: Alloa Phase 1 statistics based on the latest Alloa Secondary Plan Development Statistics, dated June 3, 2024, from Glen Schnarr & Associates Inc.

Figure 2 illustrates the Alloa Phase 1 Tertiary Plan. Appendix A includes the Alloa Phase 1 Tertiary Plan as well as the proposed statistics.

Appendix H outlines the relevant excerpts from the Town of Caledon MMTMP (June 2024).

4.1.5 Town of Caledon Active Transportation Plan

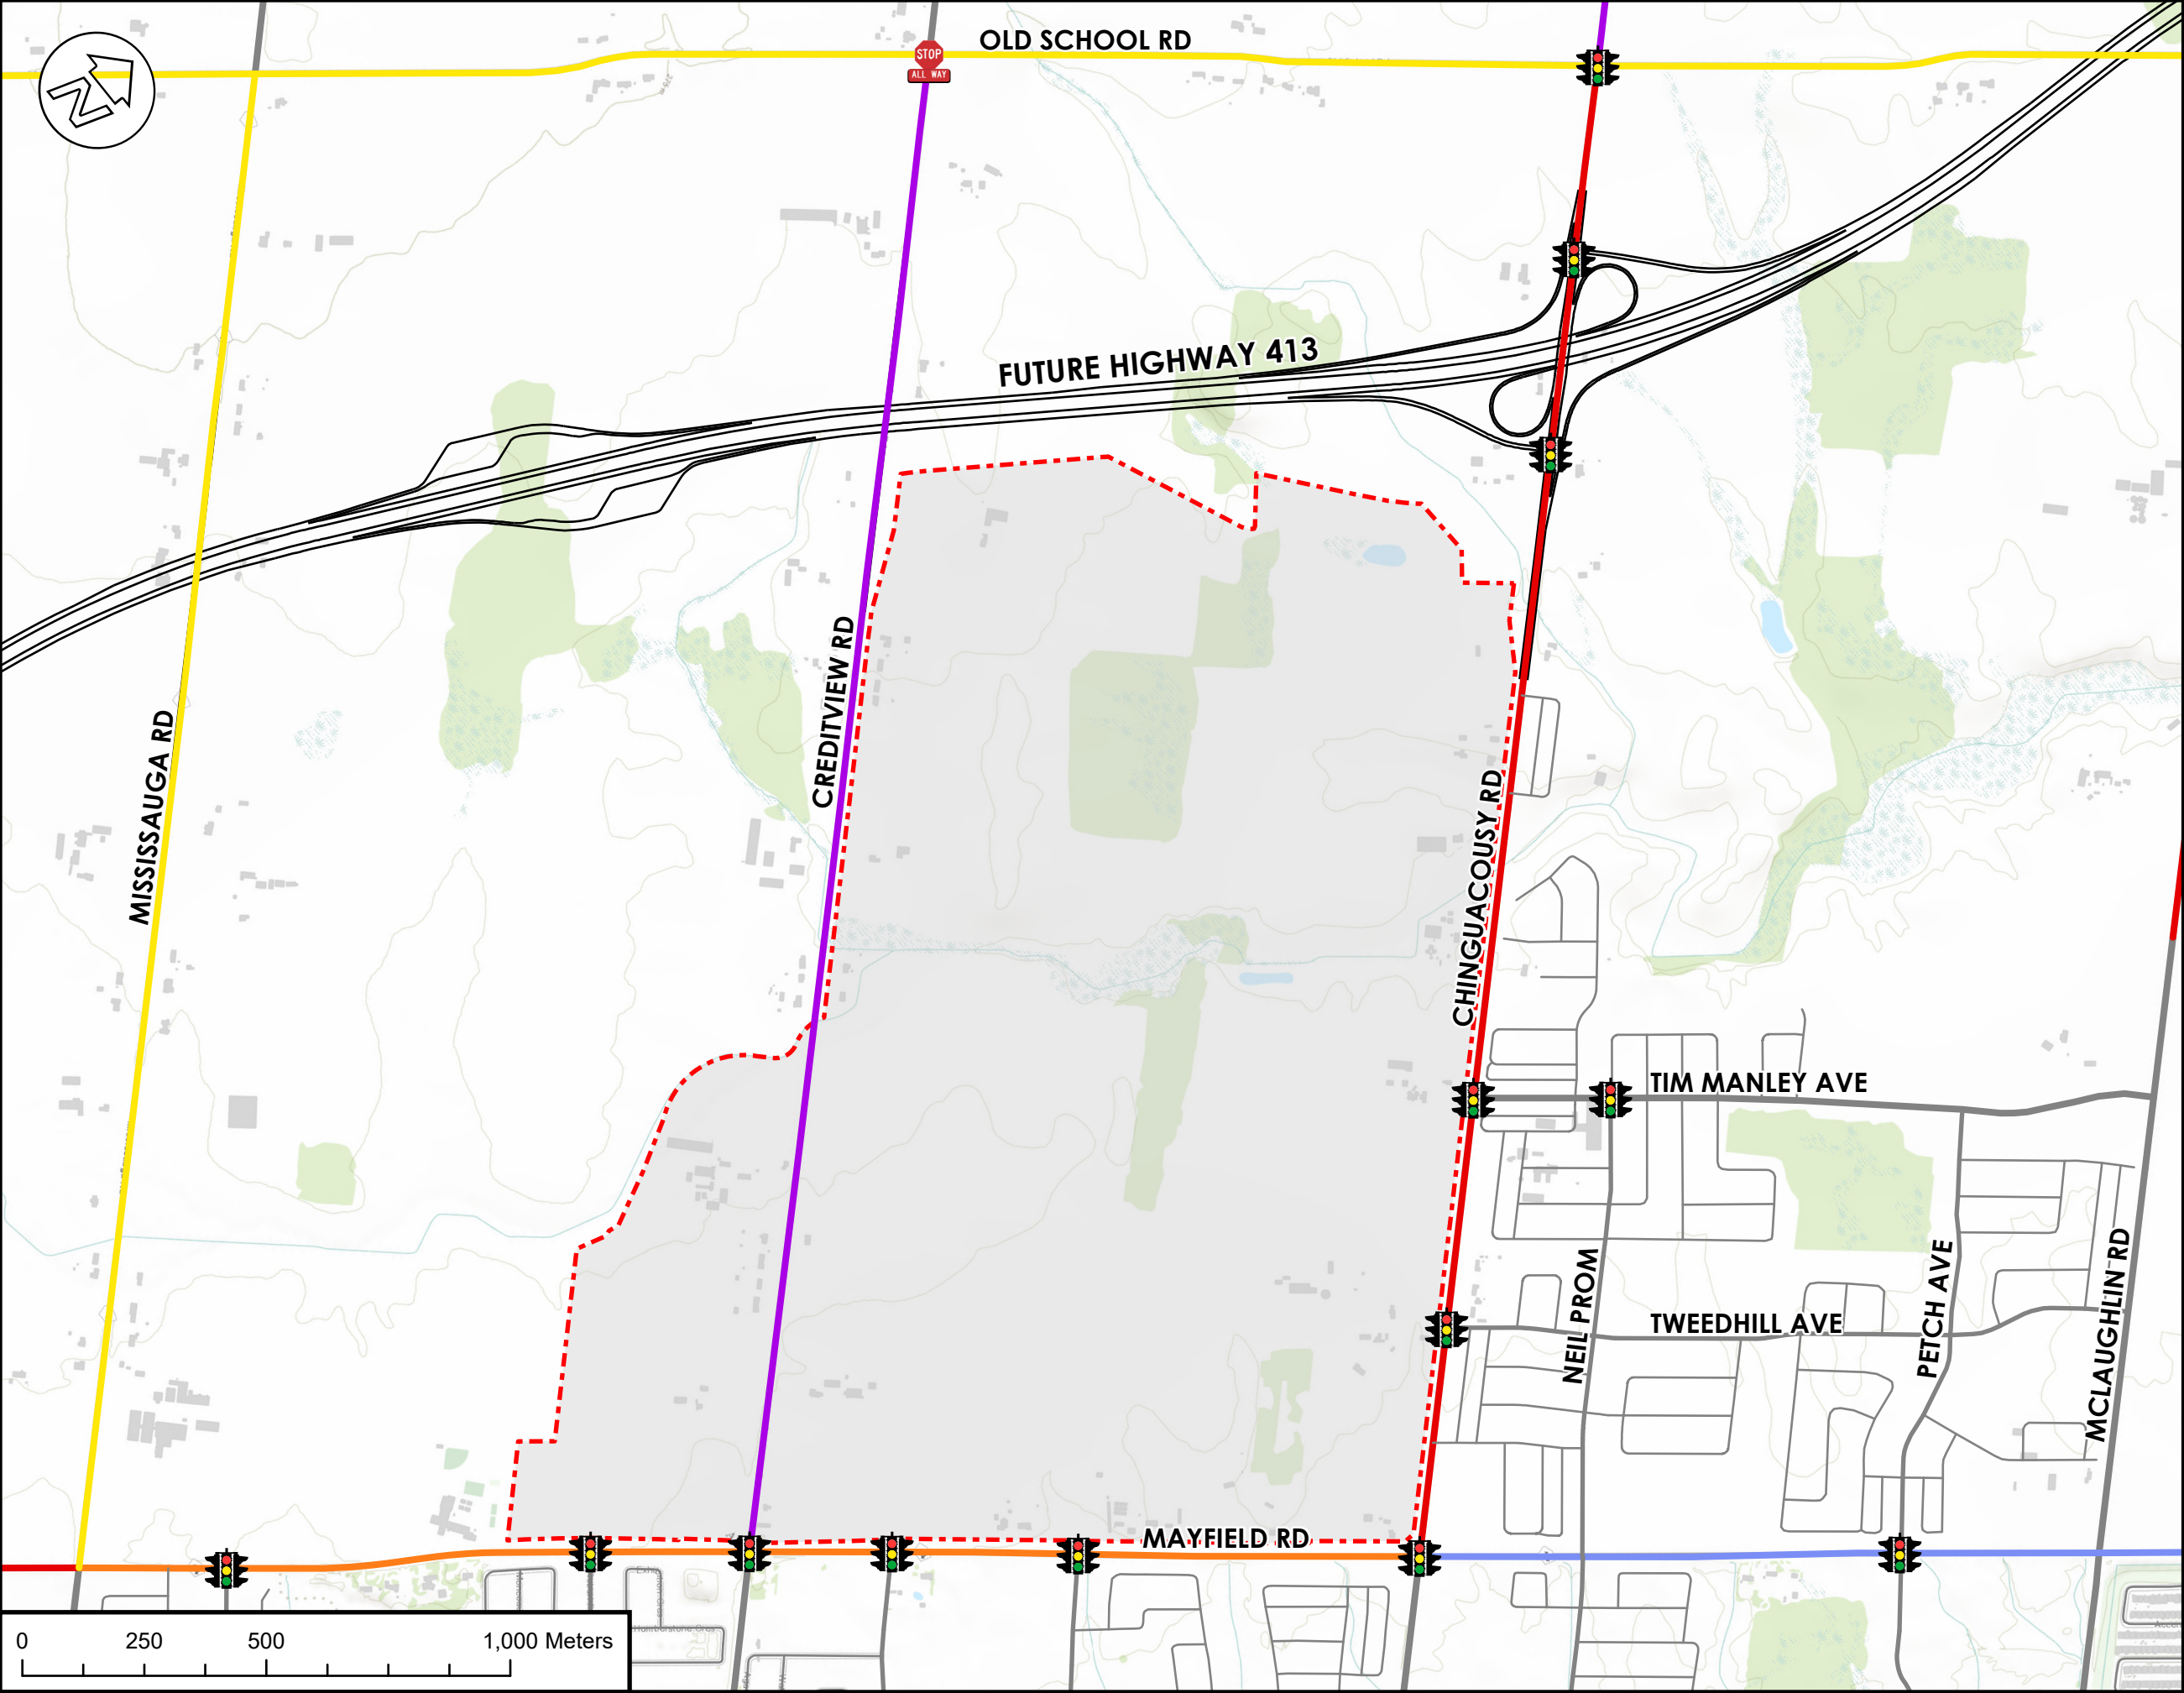

The Town of Caledon recently completed the Active Transportation Master Plan (June 2024), which supplements the Town's Multi-Modal Transportation Master Plan (Town of Caledon, June 2024) by providing more details and policies objectives concerning sidewalks, dedicated cycling facilities and trails. Notably, the plan identifies preferred design cross-sections for multi-use trails connecting neighbourhoods and as walking trails and provides a recommended active transportation network for on-road and off-road facilities. In addition, a sidewalk policy framework which identifies where sidewalks should be implemented, on one or both sides, was identified and has also been developed as part of this plan.

Appendix H outlines the relevant excerpts from the Town of Caledon Active Transportation Master Plan (June 2024).

4.2 Future Transportation Network

In the vicinity of the Alloa Phase 1 Lands, there are many planned transportation network improvements. Many of these improvements were identified in the relevant planning documents outlined in **Section 4.1**. This section herein reviews the relevant future background improvements.

Figure 6 summarizes the future road improvements and timings of these improvements within the study area.

Appendix H includes the relevant Tim Manley Avenue excerpts.

4.2.6 Brampton Transit Expansion

There are transit expansion plans, as detailed in the Brampton Transit Public Information Session for the Annual Transit Service Plan (Brampton Transit, March 2024), that are of relevance to the study area. The following changes to existing transit operations in **Section 2.2** are detailed in the plan and are expected to be implemented in the near future:

- Route 25 (Edenbrook): While this proposed change does not directly impact the Subject Lands, a transit route option to service the completed elements of the adjacent Mayfield West Phase 2 community is outlined and is expected to be implemented in the future.
- NEW Route 504 (Züm Chinguacousy): Brampton Transit is planning to implement a Chinguacousy Züm service between 2024 and 2026. This new express transit route will operate Sandalwood Parkway and Steeles Avenue along Chinguacousy Road. The route is planned to continue east on Steeles Avenue, connecting at Sheridan College, Brampton Gateway, and at Bramalea GO, where the line terminates. The implementation of this service would result in several transit network changes, including the following:
 - Route 4/4A (Chinguacousy): The route will continue to operate local service, with realignment planned. Route 4 will operate along Sandalwood Parkway, Brisdale Road and Wanless Drive, and Route 4A will service Mount Pleasant GO Station via Bovaird Drive.
 - Route 104 (Chinguacousy Express): The current Route 104 will be replaced by the proposed Züm express transit route.
 - NEW Brisdale Drive Transit Route: A new transit route is planned along Brisdale Drive from and to Mount Pleasant GO Station, with the routing reaching and looping at Mayfield Road. This route will replace the current Route 4 service along Brisdale Drive.

The public information session also outlines long-term transit service concepts, including potential extensions and new transit routes into the Town of Caledon and the Alloa Community. These potential extensions and new transit routes are expected to be implemented in the future, and may be refined at a later stage.

Appendix H outlines the relevant future transit excerpts.

4.2.7 Natural Heritage System Multi-Use Trails

To support the creation of sustainable communities in the Town, the Town of Caledon's Active Transportation Master Plan (ATMP) outlines various active transportation improvements. In addition to the planned improvements outlined in **Section 4.2.1** to **Section 4.2.6**, the ATMP (Town of Caledon, June 2024) identifies multi-use trails, the Settlement Area Boundary Expansion Concept Trails, proposed along the natural heritage system near the Subject Site.

It is anticipated that these trail improvements will be completed in coordination with the Town to support surrounding developments, including the Proposed Development. As 2 of the planned multi-use trails are located within the Subject Lands, the neighbourhood connector and/or walking trail cross-sections are anticipated to be required to accommodate the natural heritage system trails.

Figure 14 outlines the neighbourhood connector and walk trail cross-section proposed in the Alloa Secondary Plan Transportation Needs Assessment (Crozier, July 2024).

Figure 14: Natural Heritage System Trails - Cross-Section Options (Crozier)

We noted that these sections generally conform with the standard cross-section outlined in the Town of Caledon ATMP (Town of Caledon, June 2024), with the exception of the proposed 0.5 m clear zone, instead of 0.6 m.

Appendix H contains the relevant excerpts regarding the multi-use trails planned near and within the Subject Lands as highlighted in the Town of Caledon's ATMP (June 2024).

4.2.8 Summary

Table 13 summarizes the future roadway improvements in the study area.

Table 13: Planned Improvements in Study Area

Roadway	Improvement	Segment	Year	Source

Note 2: **Appendix H** includes the relevant Active Transportation Master Plan (Town of Caledon, June 2024) excerpts that outline the natural heritage system multi-use trail locations.

5.0 Future Background Network Review

This section reviews the future operations of the surrounding transportation network, in a similar approach that was applied to the existing conditions in **Section 3.0**. Consistent with the Existing Mobility Network Review, the automobile operations were reviewed using Synchro software and evaluated based on the Highway Capacity Manual methodology, while active transportation level of service was assigned based on criteria from the York Region Transportation Mobility Plan Guidelines (November 2016).

5.1 Pedestrian Network

The pedestrian level of service (LOS) was reviewed for future background conditions based on the York Region guidelines. **Appendix E** outlines the York Region pedestrian LOS definitions.

Table 14 and **Table 15** summarizes the 2031 and 2041 future background pedestrian LOS, respectively.

6.0 Alloa Secondary Plan Mobility Context

The Alloa Secondary Plan Transportation Needs Assessment (Crozier, July 2024) outlines a recommended mobility network for the Alloa Secondary Plan area. The section herein reviews the Alloa Secondary Plan transportation network as well as the key considerations specifically for the Alloa Phase 1 Tertiary Plan area.

Appendix N outlines the relevant excerpts from the Alloa Secondary Plan Transportation Needs Assessment (Crozier, July 2024).

6.1 Mobility Framework

The Alloa Secondary Plan transportation network includes an internal collector road network, active transportation network, including a cycling and trail network, and transit network, comprised of potential routes and bus stop locations. This transportation network is reflected in the Alloa Phase 1 Tertiary Plan.

A preliminary transit network was recommended in Section 11.3 of the Alloa Secondary Plan Transportation Needs Assessment (Crozier, July 2024). The conceptual transit network proposed for the Alloa Secondary Plan was developed based on a review of a number of transit plans for the surrounding area and the existing transit operations, similar to those highlighted in **Section 2.2**, and a target to maximize transit stop coverage. The transit planning documents outlining future transit service patterns for the areas in proximity to the Subject Lands include:

- Brampton Transit Public Information Session for the Annual Transit Service Plan (March 2024)
- Town of Caledon Transit Feasibility Study (April 2019)
- Town of Caledon Multi-Modal Transportation Master Plan (June 2024)
- Highway 413 Transportation Corridor – Public Information Session #4 (MTO, October 2023)

This transit plan continues to be recommended upon full buildout of the Secondary Plan. However, these documents were reviewed to determine an interim future transit plan for Alloa Phase 1, which is detailed in **Section 11.0**.

Figure 23, **Figure 24**, and **Figure 25** illustrate the Alloa Secondary Plan's proposed road, active transportation and transit network, respectively.

CROZIER

Drawn: D.M	Design: M.L.	Project No. 2448-7006	
Date: 2024-10-04	GCS: NAD 1983	Scale: 1:16,000	Dwg. Fig.23

Table 41: External Primary Vehicle Trip Generation

Land Use	Statistic	A.M. Trips ¹			P.M. Trips ¹		
		In	Out	Total	In	Out	Total
Major Commercial	295,773 ft ²	95	72	167	238	245	483
Mixed Use	263,987 ft ²	85	64	149	212	219	431
	1,962 units	134	504	638	362	217	579
Low Density Residential	2,171 units	209	701	910	876	525	1,402
Medium Density Residential	2,565 units	133	474	607	549	329	878
Medium-High Density Residential	2,467 units	169	633	802	455	273	728
Elementary School	150 employees	188	158	346	39	47	86
Total		1,014	2,606	3,620	2,732	1,856	4,588

Note 1: Rounding may cause the appearance of discrepancies.

The Alloa Phase 1 Lands are expected to generate 3,620 and 4,588 two-way external primary vehicle trips during the weekday a.m. and p.m. peak hours. As noted in **Section 7.1.3**, a total of 398 and 408 two-way internal trips are also forecast for the Alloa Phase 1 Lands in the weekday a.m. and p.m. peak hours.

7.2 Zonal Disaggregation

Given the scale of the Alloa Phase 1 lands and the intent for consistency with future Draft Plan and Site Plan applications, the Subject Lands were divided into zones to better distribute traffic volumes. The zones are generally bound by the external arterial roads, internal collector road and/or other major features, such as the natural heritage system, Highway 413 corridor or the Alloa Phase 1 limits. However, property lines were also considered in the establishment of the zones to more easily compare the Tertiary Plan study to future Draft Plan applications for consistency.

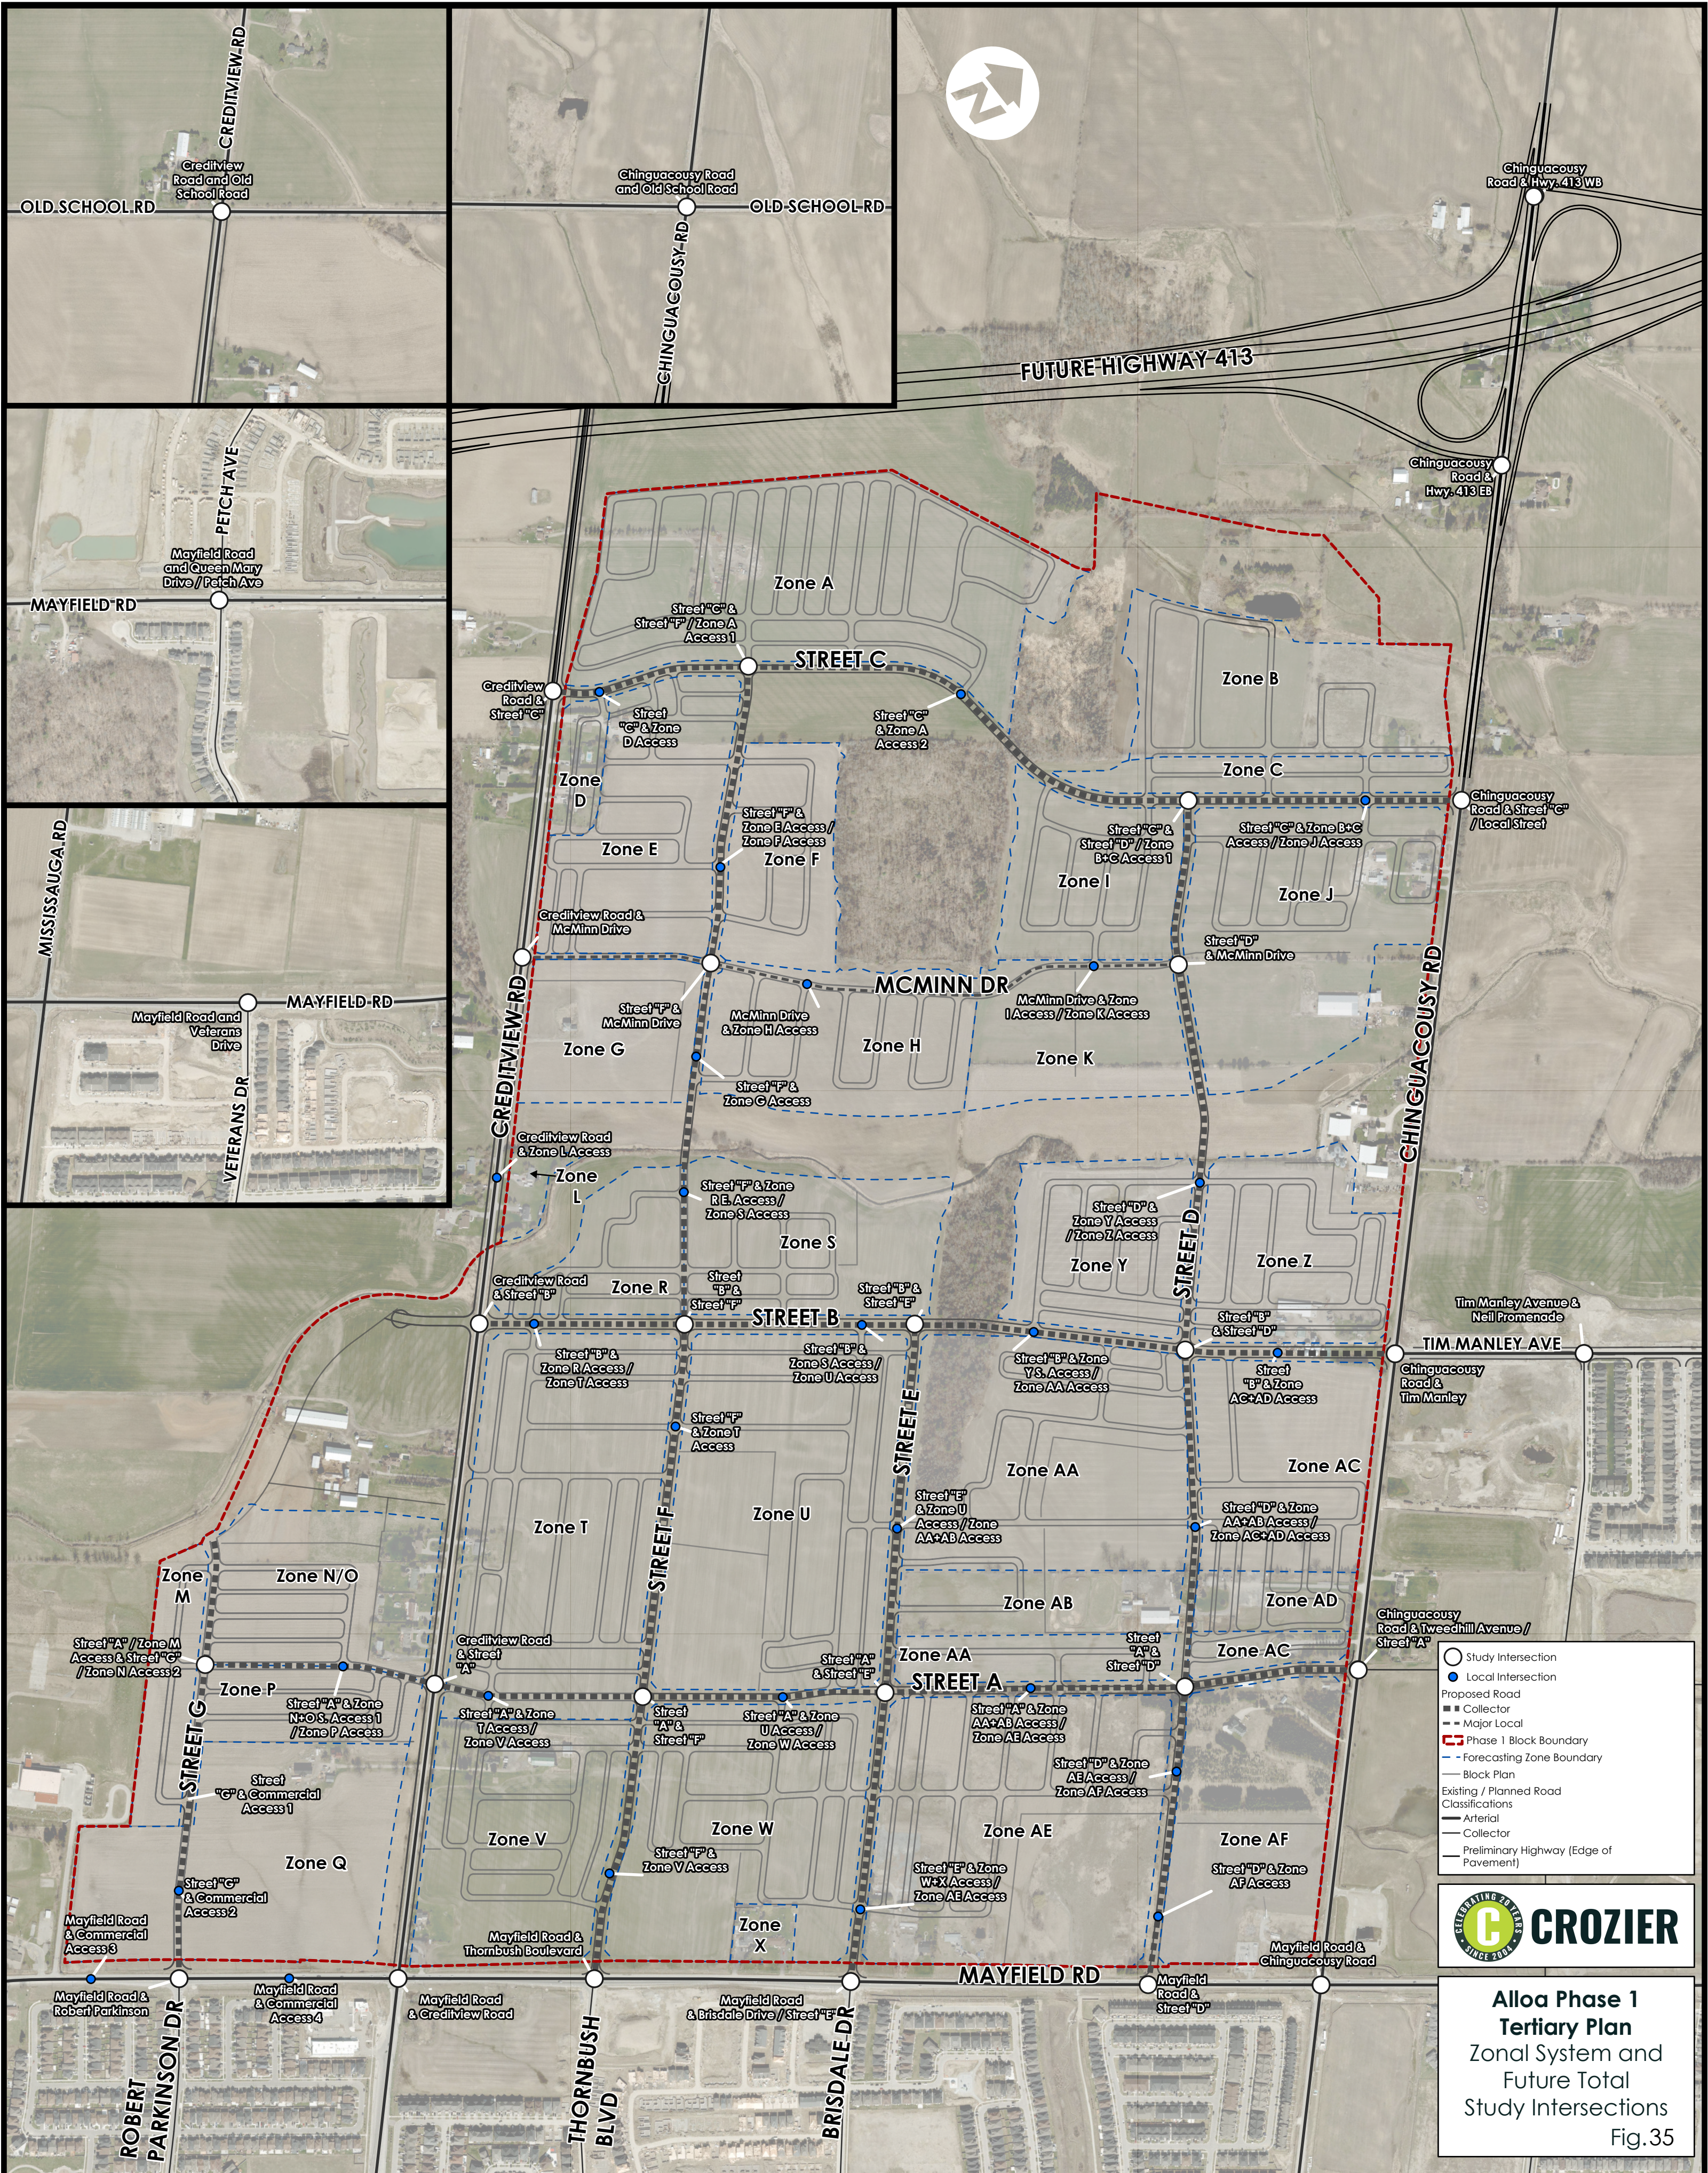

The Subject Lands were split into 32 zones, lettered A to AF. The site generated trips for each zone were determined based on the proportion of units, GFA or area of land uses in each zone relative to the overall Phase 1 Trip generation.

For the purpose of modelling, local road connections to each zone were assumed reflect a consolidation of several multiple minor local accesses in some cases. This approach was adopted for simplicity, to avoid modelling of an excessive number of accesses or local road connections.

As the property limits for future Draft Plan applications were factored into delineating the zones, in practice traffic within some zones may use a local road connection of an adjacent zone due network orientation and local street design. However, for the purpose of the analysis herein, the

trips associated with a particular zone were assigned to the local road connection within that zone. This approach allows for an easier comparison between trip assignment forecasts with the Tertiary Plan study and future reports prepared in support of Draft Plan application.

Figure 35 illustrates the zonal system and future total study intersections for the trip assignment.
