1.0 GPS COORDINATES FOR ARCHAEOLOGICAL SITES DOCUMENTED WITHIN THE SUBJECT PROPERTY

Each site location was recorded using a Global Positioning System (Trimble GeoExplorer) with an accuracy of better than 1 m. A coordinate reading was taken at the location of each isolated findspot, or at the limits of the site in each cardinal direction and a centre point for sites larger than 10 m by 10 m. The position of the datum stake was recorded. The position of fixed reference landmarks were also recorded. The sites are located within Universal Transverse Mercator Zone 17. North American Datum 1983 was used. No method of correction was used.

Table 1: GPS Coordinates for Sites

SITE	LOCATION OF READING (WAYPOINT)	GPS COORDINATES		
		EASTING	NORTHING	ELEVATION (Metres)
