Re: 8186 King Street, Bolton

Dear Kristine Campbell,

In your email of April 10, 2017 you requested information regarding the above location.

Species at risk recorded in the vicinity include Butternut (endangered), Barn Swallow (threatened), Bobolink (threatened), Eastern Meadowlark (threatened) and Snapping Turtle (special concern).

Absence of information provided by MNRF for a given geographic area, or lack of current information for a given area or element, does not categorically mean the absence of sensitive species or features. Many areas in Ontario have never been surveyed and new plant and animal species records are still being discovered for many localities.

Appropriate inventory work is needed depending on the undertakings proposed. Approval from MNRF may be required if work you are proposing could cause harm to any species that receive protection under the *Endangered Species Act 2007*.

Species at risk information is highly sensitive and is not intended for any person or project unrelated to this undertaking. Please do not include any specific sensitive information in reports that will be available for public record. As you complete your fieldwork in these areas, please report all information related to any species at risk to our office. This will assist with updating our database and facilitate early consultation regarding your project.

If you have any questions or comments, please do not hesitate to contact ESA.aurora@ontario.ca or Bohdan.Kowalyk@Ontario.ca.

Sincerely,

A handwritten signature in black ink that reads "B. Kowalyk".

Bohdan Kowalyk, R.P.F.
