---

## Executive Summary

---

DS Consultants Ltd. (DS) was retained by Argo Development Corporation to complete a Phase One Environmental Site Assessment (ESA) of the Property identified as “Parcel 1”, located at 14275 The Gore Road, Bolton, Ontario, which is herein referred to as the “Phase One Property” or “Site”. It is DS’s understanding that this Phase One ESA has been requested for due diligence purposes associated with the future redevelopment of the Site.

The Phase One ESA was completed in general accordance with the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objectives of the Phase One ESA is to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling or testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

The Phase One Property is an irregular shaped parcel of land approximately 39.2 hectare (96.8 acres) in area, and is situated within a rural neighbourhood in the Town of Bolton, Ontario. The Phase One Property is located approximately 620 m north of the intersection of The Gore Road and King Street and was occupied by the Henry family at the time of this investigation. For the purposes of this report, King Street is assumed to be aligned in an east-west orientation, and The Gore Road in a north-south orientation. A Plan of Survey for the Phase One Property was not available during this investigation.

At the time of this assessment the majority of the Site was comprised of agricultural fields. The western portion of Site included a two-storey residential building (Site Building A), a barn (Site Building B), a workshop building (Site Building C), and a small shed (Site Building D).

Based on the findings of the Phase One ESA, DS presents the following findings:

- ◆ The topography of the Phase One Property is generally rolling, sloped to the east/southeast, with surface elevation varying from 281 metres above sea level (masl) in the western portion to 275 masl in the eastern portion. The topography within the Phase One Study Area generally slopes to the east/southeast, towards the Humber River, located approximately 1.8 km east of the Phase One Property. The nearest body of water is a tributary of Lindsay Creek located at the south corner of the Property. The Lindsay Creek drains south towards the West Humber River, which is located approximately 3.2km to the south of the Phase One Property. Based on a review of the MECP well records, the depth to groundwater in the vicinity of the Phase One Property is approximately 4 m to 7 m. The shallow groundwater flow direction within the Phase One Study Area is inferred to be east towards the West Humber River

- 
- ◆ The Site is situated within a drumlinized till plain physiographic region. The surficial geology in the vicinity of the Site is described as “glaciolacustrine deposits or shale, which may include clay to silt-textured till”. The underlying bedrock within the area generally consists of shale, limestone, dolostone, and siltstone of the Queenston Formation. The bedrock in the vicinity of the Site is anticipated at depths greater than 90 mbgs, based on available well records and previous ESAs completed for the Site.
  - ◆ The Phase One Property has been used for agricultural purposes since 1880. An orchard was identified on the Phase One Property in the 1880 County Atlas, it is possible that environmentally persistent pesticides/herbicides were used in association with the cultivation of the historical orchard. Furthermore, the current tenant of the Property indicated that Pesticides are currently utilized on Site as part of the agricultural activities.
  - ◆ Two (2) fuel oil tanks were identified in the basement of the Site Building A, each with a capacity of 1000 L.
  - ◆ The Phase One Property was identified as a waste generator for light fuels associated with the farming wholesaler and distributor.
  - ◆ Fill material was previously identified during the 2014 SPL Phase One Investigation and confirmed in the concurrent geotechnical investigation.
  - ◆ The neighbouring properties within the Phase One Study Area appear to have been used for agricultural and residential purposes since prior to 1880s.

Based on a review of the information available at this time it is concluded that five (5) PCAs were identified on the Phase One Property and within the Phase One Study Area which are considered to be contributing to four (4) APECs in, on, or under the Phase One Property. The PCAs identified are considered by the Qualified Person (QP) to be contributing to Areas of Potential Environmental Concern on the Phase One Property. The Contaminants of Potential Concern (COPCs) identified by the QP include PHCs, VOCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, EC, Cr (VI), Hg, low or high pH, SAR, PAHs and OC Pesticides. Based on the findings of this Phase One ESA, it is concluded that a Phase Two ESA would be required in order to investigate the aforementioned APECs and to assess the environmental soil and groundwater conditions on the Phase One Property. A Record of Site Condition cannot be filed based on the findings of the Phase One ESA.

## 1.0 Introduction

DS Consultants Ltd. (DS) was retained by Argo Development Corporation to complete a Phase One Environmental Site Assessment (ESA) of the Property identified as “Parcel 1”, located at 14275 The Gore Road, Bolton, Ontario, which is herein referred to as the “Phase One Property” or “Site”. It is DS’s understanding that this Phase One ESA has been requested for due diligence purposes associated with the future redevelopment of the Site.

The intended future property use is not considered to be a more sensitive property use as defined under O.Reg. 153/04 (as amended) than the current residential use; therefore the filing of a Record of Site Condition (RSC) with the Ontario Ministry of Environment, Conservation and Parks (MECP) is not mandated under O.Reg. 153/04.

The Phase One ESA was completed in general accordance with the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objectives of the Phase One ESA are to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling or testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

### 1.1 Phase One Property Information

The information for the Phase One Property is provided in the following Table.

**Table 1-1: Phase One Property Information**

Criteria	Information	Source
Legal Description	Part of Lot 12, Concession 4, Albion as in VS172840 (Secondly) Except Parts 1 & 2 43R1538 and Part 43R2952 Caledon	Client
Municipal Address	14725 The Gore Road, Bolton, Ontario	Client
Property Owner	Argo Development Corporation	Client
Property Owner Contact Information	Argo Development Corporation 4900 Palladium Way, Suite 105 Burlington, Ontario - L7M 0W7 Mobile: 416.991.5988 Email: aaron@argoland.com	Client

Criteria	Information	Source
Current Site Occupants	Beth Henry's son and family	Phase One Questionnaire
Site Area	39.2 hectares (96.8 acres)	Google Earth

## 1.2 Site Description

The Phase One Property is an irregular shaped parcel of land approximately 39.2 hectares (96.8 acres) in area which is situated within a rural neighbourhood in the Town of Bolton, Ontario. The Phase One Property is located approximately 620 m north of the intersection of The Gore Road and King Street and was occupied by the Henry Family at the time of this investigation. A Site Location Plan is provided in Figure 1.

For the purposes of this report, King Street is assumed to be aligned in an east-west orientation, and The Gore Road in a north-south orientation. A Plan of Survey for the Phase One Property was not provided by the Client.

At the time of this assessment the majority of the Site was comprised of agricultural fields. The western portion of Site included a two-storey residential building (Site Building A), a barn (Site Building B), a workshop building (Site Building C), and a small shed (Site Building D). A Site Plan depicting the orientation of the buildings on-site is provided in Figure 2.

## 2.0 Scope of Investigation

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04, as amended (Phase One ESA requirements). This included:

- ◆ A review of reasonably ascertainable records and reports regarding historical and current use, regulatory information, occupancy, and activities for the Phase One Property, including:
  - Physical setting information such as aerial photographs, topographic mapping, available historical maps, and drawings;
  - Company records (e.g., site plans, building plans, permit records, production and maintenance records, asbestos surveys, site utility drawings, emergency response and contingency plans, spill reporting plans and records, inventories of chemicals and their usage (e.g. WHMIS), environmental monitoring data, waste management records, inventory of underground and aboveground tanks, environmental audit reports) provided to DS;
  - Geological and hydrogeological information in published government maps and/or reports;
  - A review of information on file with EcoLog Environmental Risk Information Services Ltd. (ERIS), a commercial database that provides information from numerous private, provincial, and federal environmental databases/registries;

- Review of fire insurance plans, municipal directory documentation and available environmental reports that are pertinent to the Phase One Property;
- Regulatory Information, including such as Permits or Certificates of Approval (pertaining to activities that may impact the condition of the property, orders, control orders, or complaints related to environmental compliance that may impact the condition of the property, and violations of environmental statutes, regulations, by-laws, and permits that may impact the condition of the property;
- Environmental source information including published and online records from Ministry of Environment, Conservation and Parks (MECP), Environment Canada, Technical Standards and Safety Authority (TSSA), and the City of Toronto; and
- The Ontario Ministry of Natural Resources (MNR) Natural Heritage Information Centre database and the Conservation Authority website for information specific to natural areas, such as locations of environmentally sensitive areas or species.
- ◆ Interviews with available individuals having knowledge of current and/or past site activities;
- ◆ An inspection of the Phase One Property, and the activities on the adjacent properties, including and assessment of the following:
  - The site operations, processes, and waste management currently carried out on the Phase One Property.
  - The neighbouring land uses (i.e. identification of environmentally sensitive neighbours, as well as an assessment of potential off-site sources of contamination);
  - The source of potable water for the Phase One Property and properties within the Phase One Study Area;
  - The potential presence of existing or former above-ground or underground fuel storage tanks (ASTs or USTs);
  - Possible cut and fill operations that may resulted in the importation of fill material of unknown quality;
  - The presence/absence of floor cracks, hydraulic hoists, elevators, sumps, and drains;
  - Areas suspected to contain evidence of surficial and sub-surface impacts (e.g. areas of staining);
  - The potential presence of various Designated Substances and building materials including:
    - Friable and non-friable asbestos
    - Urea formaldehyde foam insulation (UFFI)
    - Chlorofluorocarbons (CFCs) in air conditioning and refrigeration equipment
    - PCB-containing materials and electrical equipment
    - Lead-based paint
    - Mould
  - The presence/absence of wells, pits and lagoons, drainage sumps and floor drains, sewage, and wastewater disposal pipelines; and

- General site conditions, including topography and drainage, standing water, right-of-ways, presence of underground utilities, evidence of stained or odorous soils, and stressed vegetation.
- ◆ Evaluation of the information and documentation of the results in the form of a Phase One ESA Report.

The objectives of the Phase One ESA are:

1. To assess the environmental condition of the Phase One Property to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property;
2. To identify potentially contaminating activities within the Study Area (i.e., areas within 250 m of the Property), and to assess if Areas of Potential Environmental Concern (APECs) exist on the Phase One Property;
3. To identify the Potential Contaminants of Concern associated with the PCAs identified; and
4. To provide a basis for subsequent investigation, if required, based on the findings of the Phase One ESA.

## **3.0 Records Review**

### **3.1 General**

---

#### **3.1.1 Phase One Study Area Determination**

---

Based on a review of the available historical records and the observations made during the Phase One Site Reconnaissance, no heavy industrial properties or other relevant potentially contaminating activities were observed which were considered to merit expanding the Phase One Study Area. As such the Phase One Study Area was defined by a 250 metre radius around the Phase One Property boundary, in accordance with O.Reg. 153/04 (as amended).

The properties within 250 m of the Phase One Property generally consist of residential and agricultural land uses. An assessment of the historical and current use of all properties within the Phase One Study Area was conducted in order to assess for the presence/absence of potentially contaminating activities. A summary of the potentially contaminating activities identified within the Phase One Study Area is provided under Section 6.2. A plan depicting the Phase One Study Area limits as well as the current land uses is presented in Figure 3 and 4.

#### **3.1.2 First Developed Use Determination**

---

The first developed use of the Phase One Property is considered under O.Reg. 153/04 (as amended) to be either the first use of the Phase One Property in or after 1875 that resulted in the development of a building or structure on the property, or the first potentially contaminating use or activity on the Phase One Property.

The determination of the first developed use of the Phase One Property was based on a review of available aerial photographs, historical maps, fire insurance plans, city directories, and interviews. Based on the information obtained, the first developed use of the Phase One Property was for residential purposes and occurred prior to 1880.

### **3.1.3 Fire Insurance Plans**

---

Fire insurance plans were prepared between 1875 and 1923 and revised in some areas until the 1970s. Opta Information Intelligence (Opta) was retained to obtain copies of available FIPs for the Site and adjoining properties, as well as Property Underwriter's Reports (PURs) and Property Underwriter's Plans (PUPs) related to the Site. Opta responded on August 31, 2020, indicating that there were no records available for the Site. A copy of the Opta response is provided under Appendix C.

### **3.1.4 Chain of Title**

---

A Chain of Title search was not provided by the Client at the time of the investigation. The Chain of Title will need to be obtained prior to the submission of a Record of Site Condition, if required in the future. Information regarding the historical land use was obtained from other sources including City Directories, aerial photographs and the Phase One ESA Interview.

### **3.1.5 Environmental Reports**

---

DS reviewed the following environmental report prepared for the Property. The report was provided by the client to DS.

- ◆ *"Phase One ESA, 14275 The Gore Road, Bolton, Ontario", prepared for Argo Development Corporation, prepared by SPL Consultants Ltd., dated August 13, 2014 (2014 SPL Phase One ESA); and*
- ◆ *"Preliminary Geotechnical Investigation, 14275 The Gore Road, Town of Caledon, Ontario", prepared for Argo Development Corporation, prepared by SPL Consultants Ltd., dated August 25, 2014 (2014 SPL Geotechnical Investigation);*

These reports were reviewed in order to assess for the presence of known or suspected PCAs and APECs on the Phase One Property or on Properties within the Phase One Study Area.

### **2014 SPL Phase One ESA**

The 2014 SPL Phase One ESA report was reportedly conducted in general conformance with Ontario Regulation 153/04 (O.Reg 153/04) and its amendments and included a review of readily available historical records and reasonably ascertainable regulatory information, a Site Reconnaissance, interviews, evaluation of information, and reporting. The following pertinent information was noted by DS:

- ◆ The Phase One Property was a 39.4 hectares land and has been a residential property with active agricultural fields and an orchard since first development prior to 1878.
- ◆ Due to the age of the buildings, SPL suspected potential presence of lead paint, mercury, asbestos containing material (ACMs), and polychlorinated biphenyls (PCB)-containing ballasts and materials.
- ◆ SPL confirmed the presence of MOE registered wells and a septic system on the Phase One Property during the site reconnaissance.
- ◆ Inferred application of pesticides and herbicides for agricultural purposes was identified as a PCA contributing towards an APEC (**PCA-1**).
- ◆ The Phase One Site Reconnaissance identified two (2) fuel oil ASTs in the basement of the residential building, each with a capacity of 1000 L (**PCA-2**).
- ◆ A small pile of fill material was observed on the northwestern exterior of a storage shed. SPL identified the fill material as a PCA but was not considered to be contributing towards an APEC due to the small quantity and due to medium fine-textured soils beneath (**PCA-3**).

The 2014 SPL Phase One ESA Identified a total of four (4) PCAs. Two (2) of the PCAs were considered to be contributing to two (2) APECs on the Phase One Property.

### **2014 SPL Geotechnical Investigation**

The preliminary geotechnical investigation involved obtaining of preliminary information on the subsurface conditions by means of a limited number of boreholes to provide the preliminary geotechnical recommendations for due diligence purpose as well as for the planning and preliminary design of residential houses at the site. The following pertinent information was noted by DS:

- ◆ Topsoil approximately 300 mm in thickness was encountered in all the boreholes.
- ◆ Below the topsoil, a shallow layer of reworked till or localized fill materials in one borehole (BH14-07) were encountered in all the boreholes (**PCA-3**).
- ◆ The native soils encountered at the site were predominantly glacial tills of both clayey and sandy texture underlain by native cohesionless soils (i.e. sand and silt to sandy silt and silt).
- ◆ Groundwater was encountered in the boreholes during drilling at depths varying from 5.7 to 8 mbgs.

### **3.1.6 City Directories**

---

Due to government mandated closures associated with the COVID-19 pandemic the applicable City Directories were not accessible at the time of this assessment as a result of the closure of public libraries. Additionally, information pertaining to the Phase One Property was not housed in the internal City Directory database maintained by ERIS. However, a copy of the City Directory Search completed by SPL Consultants Ltd. was reviewed, and can be found in Appendix B. The SPL City

Directory Search identified that there were no listing for the Phase One Property between 1958 and 2001. Similarly, there were no listings for 7610 to 7584 King Street, and 14236 to 14100 Humber Station Road. Residential listings for were identified for 14200 The Gore Road and 14258 The Gore Road for the years 2001 and 1998, respectively.

A supplementary City Directory search will be conducted once the municipal archives are safely accessible and the client will be notified of any pertinent results.

## 3.2 Environmental Source Information

### 3.2.1 Ecolog Eris Report

EcoLog Environmental Risk Information Services Ltd. (ERIS) is an organization that maintains and searches various government and private databases for property-related environmental information.

DS contacted Ecolog ERIS to request a search of government and private records for information pertaining to the Phase One Property and Phase One Study Area. ERIS searched 15 Federal databases, 37 Provincial databases and 10 private databases. A summary of the databases provide by ERIS is provided in the Table below:

**Table 3-1: Summary of Environmental Databases Reviewed**

Federal Government Source Databases	Private Source Databases
Contaminated Sites on Federal Land; Environmental Effects Monitoring; Environmental Issues Inventory System; Federal Convictions; Fisheries & Oceans Fuel Tanks; Indian & Northern Affairs Fuel Tanks; National Analysis of Trends in Emergencies System (NATES); National Defense & Canadian Forces Fuel Tanks; National Defense & Canadian Forces Spills; National Defense & Canadian Forces Waste Disposal Sites; National Environmental Emergencies System (NEES); National PCB Inventory; National Pollutant Release Inventory; Parks Canada Fuel Storage Tanks; and Transport Canada Fuel Storage Tanks.	Anderson's Storage Tanks; Anderson's Waste Disposal Sites; Automobile Wrecking & Supplies; Canadian Mine Locations; Canadian Pulp and Paper; Chemical Register; ERIS Historical Searches; Oil and Gas Wells; Retail Fuel Storage Tanks; and Scott's Manufacturing Directory.
Provincial Government Source Databases	
Abandoned Aggregate Inventory; Abandoned Mine Information System; Aggregate Inventory; Borehole; Certificates of Approval; Certificates of Property Use; Commercial Fuel Oil Tanks;	Inventory of PCB Storage Sites; Landfill Inventory Management Ontario; List of TSSA Expired Facilities; Mineral Occurrences; Non-Compliance Reports; Ontario Oil and Gas Wells;

Compliance and Convictions; Drill Hole Database; Environmental Activity and Sector Registry; Environmental Compliance Approval; Environmental Registry; Fuel Storage Tank; Fuel Storage Tank – Historic; Inventory of Coal Gasification Plants and Coal Tar Sites; TSSA Historic Incidents; TSSA Incidents; TSSA Pipeline Incidents; TSSA Variances for Abandonment of Underground Storage Tanks;	Ontario Regulation 347 waste Generators Summary; Ontario Regulation 347 Waste Receivers Summary; Ontario Spills; Orders; Permit to Take Water; Pesticide Register; Private and Retail Fuel Storage Tanks; Record of Site Condition; Waste Disposal Sites – MECP 1991 Historical Approval Inventory; Waste Disposal Sites – MECP CA Inventory; Wastewater Discharger Registration Database; and Water Well Information System
--	--

The ERIS report indicated that there were seven (7) listings for the Phase One Property, and ten (10) listings for the remaining properties within the Phase One Study Area. A copy of the ERIS report has been provided under Appendix C. A summary of the potentially contaminating activities identified in the ERIS report and other pertinent information is provided in the Table below:

**Table 3-2: Summary of ERIS Report Findings on Phase One Property**

Database/Date	Entry Details	PCA ID No.
Borehole (BORE)	One (1) result was identified on the Phase One Property. Additional detail regarding the borehole depth, lithology encountered, etc. is included in the ERIS report provided under Appendix C.	No PCA
ERIS Historical Searches (EHS)	One (1) result was identified on the Phase One Property in 2012	No PCA
Ontario Regulation 347 Waste Generator Summary (GEN)	One (1) result was identified for Pat Watson, Farm Wholesaler-Distributors, located at 14275 Gore Road for generation of light fuel wastes in 2006	PCA-4
Water Well Information System (WWIS)	Four (4) results were identified corresponding to domestic wells on the Phase One Property. Additional detail regarding the well construction, lithology encountered, and well purpose is included in the ERIS report provided under Appendix C.	No PCA

**Table 3-3: Summary of ERIS Report Findings within Phase One Study Area**

Database/Date	Entry Details	PCA ID No.
Water Well Information System (WWIS)	Ten (10) results were identified corresponding to domestic wells on within the Phase One Study Area. Additional detail regarding the well construction, lithology encountered, and well purpose is included in the ERIS report provided under Appendix C.	No PCA

### 3.2.2 Ministry of the Environment- Freedom of Information

A request was submitted to the MECP Freedom of Information and Protection of Privacy Office (Appendix D) to determine if there were any environmental incidents or violations associated with

the Phase One Property; whether any Control Orders have been issued; whether there have been any other environmental concerns associated with the property such as complaints, inspections, etc.; whether any environmental investigations have been carried out regarding the subject property; and, to determine if the Ministry's Spills Action Centre's (SAC's) files contain any reported spills that had occurred in the site vicinity. Note that the SAC's database dates back only to 1988 and many of the occurrences on file have only been reported voluntarily. In addition, the MECP was requested to search their files (all years) regarding the following parameters: air emissions, water, sewage, wastewater, and pesticides.

Files pertinent to this investigation would include, though are not limited to: regulatory permits, records; material safety data sheets; underground utility drawings; inventories of chemicals, chemical usage and chemical storage areas; inventory of aboveground storage tanks and underground storage tanks; monitoring data, including that done at the request of the MECP; historical and current waste management, receiver and generator records; process, production and maintenance documents related to areas of potential environmental concern; spills/discharge records; emergency and contingency plans; environmental audit reports; site plan of facility showing areas of production and manufacturing.

A response has not yet been received from the MECP. The client will be made aware of any records identified by the MECP file search when a response is received from the Ministry.

### **3.2.3 Technical Standards and Safety Authority**

---

The Technical Standards and Safety Authority (TSSA) maintain records related to storage tanks for petroleum related products. The TSSA was contacted to review records related to the Property and Study Area. According to the response received on September 23, 2020 from Ms. Roxana of TSSA, no records for the Phase One Property and properties located in the Study Area at following inquired addresses:

- |                             |                             |
|-----------------------------|-----------------------------|
| • 14200 The Gore Road       | • 14361 Humber Station Road |
| • 14334 The Gore Road       | • 14305 Humber Station Road |
| • 14348 The Gore Road       | • 14287 Humber Station Road |
| • 14211 The Gore Road       | • 14275 Humber Station Road |
| • 14275 The Gore Road       | • 14226 Humber Station Road |
| • 14389 The Gore Road       | • 14206 Humber Station Road |
| • 14438 Humber Station Road | • 14166 Humber Station Road |
| • 14411 Humber Station Road | • 14091 Humber Station Road |
| • 14384 Humber Station Road | • 14100 Humber Station Road |
| • 14396 Humber Station Road |                             |

A copy of the correspondence with the TSSA has been appended under Appendix D.

### 3.2.4 Areas of Natural and Scientific Interest

The Natural Heritage Areas database published by the Ministry of Natural Resources (MNR) was reviewed in order to identify the presence/absence of areas of natural significance including provincial parks, conservation reserves, areas of natural and scientific interest, wetlands, environmentally significant areas, habitats of threatened or endangered species, and wilderness areas. The regional and municipal Official Plans (Town of Caledon Official Plans and Toronto Region Conservation Authority) were also reviewed as part of this assessment.

No areas of natural or scientific interest were identified within the Phase One Study Area.

### 3.2.5 Toronto Region and Conservation Authority (TRCA)

According to the TRCA online mapping system, a small portion of land at the south of the Phase One Property is considered a TRCA Conceptual Regulated Area due to a tributary of the Lindsay Creek, which drains to the south towards the West Humber River. The Property is located in the Humber River watershed.

## 3.3 Physical Setting Sources

### 3.3.1 Aerial Photographs and Historical Mapping

Aerial Photographs for the years 1946, 1964, 1974, and 1988 were obtained from Ecolog ERIS and reviewed as part of this assessment. The County Atlas of Peel Region was reviewed in order to provide a more historical image from the year 1880. Google Earth was used to review satellite imagery from the years 2004 and 2015. A summary of pertinent information obtained from the aerial photographs reviewed is presented in the Table below. The supporting documents have been appended under Appendix E.

**Table 3-4: Summary of Aerial Photographs**

Location	Observations	PCA ID No.
<b>1880</b>		
Phase One Property	According to the Peel County Atlas from 1880, the Phase One Property was owned by J.H.R.W & T.T.T Newlove.  The Phase One Property appears to have been part of a large agricultural plot of land and appears to have contained a residential dwelling which was surrounded by an orchard. It is possible that environmentally persistent pesticides/herbicides were used for the cultivation of the orchard.	PCA-1
North of the Site	The north neighbouring properties appears to have been used for agricultural purposes. Two (2) orchards were located on the north adjacent property, however they appear to be greater than 250m from the Phase One Property.	No PCA
South of the Site	The south neighbouring properties appears to have been used for agricultural purposes. An orchard was located on the south of the	No PCA

Location	Observations	PCA ID No.
	south adjacent property, however it appears to be greater than 250m from the Phase One Property.	
East of the Site	The east neighbouring properties appears to have been used for agricultural purposes.	No PCA
West of the Site	The west neighbouring properties appears to have been used for agricultural purposes. An orchard was located on the eastern portion of the west adjacent property.	PCA-5
<b>1946</b>		
Phase One Property	The property appeared to be used for agricultural purposes. A residential building, a barn, and a shed can be seen on the western portion of the site. The orchard depicted in the 1880 County Atlas does not appear to be present.	No PCA
North, South, East, of the Site	The surrounding area appeared to be used for agricultural purposes. Several rural residential houses were observed on the neighbouring properties.	No PCA
West of the Site	The west neighbouring property appears to have a residential dwelling as well as the orchard (agricultural purposes).	PCA-5
<b>1964</b>		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
<b>1974</b>		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
<b>1988</b>		
Phase One Property	No significant changes.	No PCA
North of the Site	There appears to be a rural homestead constructed to the northwest of the Phase One Property.	No PCA
South of the Site	There appears to be a structure, possibly residential developed to the southwest of the Phase One Property. Several commercial like structures appear to have been constructed southeast of the Phase One Property, outside of the Study Area.	No PCA
East of the Site	No significant changes.	No PCA
West of the Site	Additional residential structures appear to have been developed west of the Phase One Property.	No PCA
<b>2004</b>		
Phase One Property	Two (2) new sheds appeared to have been constructed east and west of the existing shed, and one (1) new shed east of the barn.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
<b>2015</b>		
Phase One Property	The old shed appeared to have been demolished.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA

### 3.3.2 Topography, Hydrology, Geology

The topography of the Phase One Property is generally rolling, sloped to the east/southeast, with surface elevation varying from 281 metres above sea level (masl) in the western portion to 275 masl in the eastern portion. The topography within the Phase One Study Area generally slopes to the

east/southeast, towards the Humber River, located approximately 1.8 km east of the Phase One Property. The nearest body of water is a tributary of Lindsay Creek located at the south corner of the Property. The Lindsay Creek drains south towards the West Humber River, which is located approximately 3.2km to the south of the Phase One Property. Based on a review of the MECP well records, the depth to groundwater in the vicinity of the Phase One Property is approximately 4 m to 7 m. The shallow groundwater flow direction within the Phase One Study Area is inferred to be east towards the West Humber River.

The Site is situated within a drumlinized till plain physiographic region. The surficial geology in the vicinity of the Site is described as “glaciolacustrine deposits or shale, which may include clay to silt-textured till”. The underlying bedrock within the area generally consists of shale, limestone, dolostone, and siltstone of the Queenston Formation. The bedrock in the vicinity of the Site is anticipated at depths greater than 90 mbgs, based on available well records and previous ESAs completed for the Site.

### **3.3.3 Fill Materials**

---

The 2014 SPL Geotechnical Investigation indicated fill material in one (1) borehole advanced on the property, located near the area of the structures on-site. The 2014 SPL Phase One ESA also identified the presence of a pile of fill material on-Site. The environmental quality of the fill material is unknown (PCA-3).

### **3.3.4 Water Bodies and Areas of Natural Significance**

---

During the site visit, standing water was not observed on the Property. The nearest body of water is a tributary of Lindsay Creek located at the south corner of the Property. The Lindsay Creek drains south towards the West Humber River, which is located approximately 3.2km to the south of the Phase One Property. Environmentally Significant Areas are natural areas that have been identified as significant and worthy of protection on three criteria – ecology, hydrology and geology. Municipalities has developed policies to protect natural heritage features. The Region uses Environmentally Significant Areas as a means to protect natural areas like wetlands, fish habitat, woodlands, habitat of rare species, groundwater recharge and discharge areas, and Areas of Natural and Scientific Interest.

The Property includes no Areas of Natural Significance. Additional details are provided in Section 3.2.4 above.

### **3.3.5 Well Records**

---

Water well records were also searched as part of the EcoLog ERIS database query. Four (4) domestic wells were identified on the Phase One Property and ten (10) domestic wells were identified in the Phase One Study Area.

Additional detail regarding the well construction, lithology encountered, and well purpose is included in the ERIS report provided under Appendix C.

### 3.4 Site Operating Records

The Property has mainly been used for agricultural purposes. No operating records were available.

## 4.0 Interviews

### 4.1 Personnel Interviewed

The following persons with the knowledge of the Property were interviewed or provided the required information.

**Table 4-1: Summary of Personnel Interviewed**

Date	Name	Affiliation	Method of Interview
October 16, 2020	Ms. Beth Henry	Previous Owner and Current Tenant	Email Questionnaire

### 4.2 Interviewee Rationale

Ms. Beth Henry and family is the current tenant of the Phase One Property. Ms. Henry is considered to be the most knowledgeable person regarding the historical site operations. The Phase One Interview was conducted by Mr. Drew Doak, B.Sc.E., P.Eng., QP<sub>ESA</sub>.

### 4.3 Results of Interview

The following summarizes the information that was provided by the site representative, based on their knowledge of site activities.

- The Phase One Property was previously owned by Mr. Henry and he sold the property to Argo Development Corporation. The Lovejoy's were the first owners of the Property who purchased from Crown. The Watson's were the second owners and the Henry's were the third owners.
- Mr. Henry's son and his family currently live on the Property as tenants.
- The Phase One Property is currently used to grow Corn and Soy, and for dairy farming.
- According to Mr. Henry, the property was formerly used for cattle farming and cultivation of soy and corn.
- Ms. Henry confirmed the application of pesticides/herbicides on the Phase One Property for cropping purposes. **(PCA-1)**

DS compared the information obtained through the Phase One Interview with the information obtained from the historical records for the Site. The information provided by the interviewee was

corroborated by the historical records, as such DS has no concern regarding the accuracy of the information provided.

## 5.0 Site Reconnaissance

### 5.1 General Requirements

**Table 5-1: Site Reconnaissance Notes**

Information	Details
Date of Investigation:	September 25, 2020
Time of Investigation:	9AM
Weather Conditions:	Sunny
Duration of Investigation:	2 Hours
Facility Operation:	Farmland
Name and Qualification of Person(s) conducting the assessment	Dorothy Garda, M.Sc. under the supervision of Drew Doak, B.Sc.E., P.Eng., QP <sub>ESA</sub>
Limitations	Access to the site buildings was not granted at the time of the investigation due to health and safety concerns associated with the Covid-19 pandemic.

### 5.2 Specific Observations at Phase One Property

The Site Reconnaissance involved a visual assessment of the Phase One Property for the purpose of identifying potential PCAs, and associated APECs. Photographs of the Phase One Property were taken at the time of the Site Reconnaissance, and have been included under Appendix F.

**Table 5-2: Summary of Site Reconnaissance Observations**

General		
i.	Description of structures and other improvements, including the number and age of buildings	A two-storey residential building (Site Building A), a barn (Site Building B), a workshop building (Site Building C), and a small shed (Site Building D) were observed in the western portion of the site.
ii.	Description of the number, age and depth of below-ground structures	None Observed
iii.	Details of all tanks, above and below ground at the Phase One Property, including the material and method of construction of the tank, tank age, tank contents, tank volume, and whether in use or not	Two (2) propane ASTs were observed west of the Site Building C. The tanks appeared to be in good condition. One (1) propane AST was observed north of Site Building A. The previous 2014 SPL Phase One report identified the presence of two (2) ASTs located in the basement of the residential house. Due to the safety concerns during the Covid-19 pandemic, access to the house was restricted, thus presence of the ASTs could not be confirmed.

iv.	Potable and non-potable water sources	A domestic well was observed east of the Site Building A.
<b>Underground Utilities and Corridors</b>		
i.	Type and location of underground utility and service corridors, such as sewer, water, electrical or gas lines located on, in or under the Phase One Property.	Overhead electrical cables were observed and a pole-mount transformer was observed to the south-west of Site Building B. No underground utilities were observed.
<b>Features of Structures and Buildings at the Phase One Property</b>		
i.	Entry and exit points	Entry and exit points were located east, south and west of the Site Building A.
ii.	Details of existing and former heating systems, including type and fuel source	A boiler was observed to the west of the Site Building B.
iii.	Details of cooling systems, including type and fuel source, if any	None Observed
iv.	Details of any drains, pits and sumps, including their current use, if any, and former use	None Observed
v.	Details of any unidentified substances	None Observed.
vi.	Details, including locations of stains or corrosion on floors other than from water, where located near a drain, pit, sump, crack or other potential discharge location	Localized drip oil stains were observed south of the Site Building B on an asphalt paved surface where cars and farm equipment would be parked. Due to the asphalt barrier and localized nature of the oil drips, this is not considered a PCA.
vii.	Details, including locations, of current and former wells, including all wells described or defined in or under the <i>Ontario Water Resources Act</i> and the <i>Oil, Gas and Salt Resources Act</i>	A domestic well was observed, in good condition, to the east of site building A.
viii.	Details of sewage works, including their location	None Observed
ix.	Details of ground surface, including type of ground cover, such as grass, gravel, soil or pavement	The majority of the Property was covered with farmland and grass. Asphalt pavement was observed around the site buildings in the western portion of the Property.
x.	Details of current or former railway lines or spurs and their locations	None Observed
xi.	Areas of stained soil, vegetation or pavement	None Observed
xii.	Stressed vegetation	None Observed
xiii.	Areas where fill and debris materials appear to have been placed or graded	None Observed
xiv.	Potentially contaminating activity	It was confirmed during the interview that pesticides were applied to the crops on-site. <b>(PCA-1)</b> The inferred presence of the two (2) ASTs in the basement of the house are considered a PCA. <b>(PCA-2)</b>
xv.	Details of any unidentified substances found at the Phase One Property	None Observed
<b>Enhanced Investigation Property</b>		

<p>Where subsection 13(3) applies to the Phase One Property, provide the documentation referred to in subsection 13(3)</p>	<p>In order to be classified as an enhanced investigation property, the Phase One Property must be used or have been used in whole or in part for any of the following uses:</p> <ul style="list-style-type: none"> <li>◆ Any industrial use</li> <li>◆ As a garage</li> <li>◆ As a bulk liquid dispensing facility, including a gasoline outlet</li> <li>◆ For the operation of dry cleaning equipment</li> </ul> <p>There is no indication in the historical records of the Phase One Property being used for any of the aforementioned uses, and as such the Phase One Property is not considered an enhanced investigation property.</p>
<p><b>Hazardous Materials</b></p>	
<p>i. Asbestos containing materials</p>	<p>Asbestos and asbestos-containing materials were used as insulation and construction materials until being phased out in the late 1970s. Based on the age of the site building, which was constructed prior to 1970s, there is a potential for asbestos insulation and asbestos-containing construction materials to be present in the site building.</p>
<p>ii. Lead containing materials</p>	<p>The use of lead as a base in paints and plumbing solder was phased out in the late 1970s. Based on the age of the building prior to 1970s, there is a potential for lead solder and paint to be present in the site building.</p>
<p>iii. PCB materials and equipment</p>	<p>Prior to the mid- to late-1970s, PCBs were used in the manufacture of electrical equipment, including fluorescent light ballasts. Some of the site buildings were constructed prior 1970s.</p>
<p>iv. Urea Formaldehyde Foam Insulation (UFFI)</p>	<p>Urea-Formaldehyde Foam Insulation (UFFI) was introduced in Canada during the 1970s and was banned in 1980. No record of UFFI was available for the subject building. No older foam insulation was noted in the building; therefore, the potential for UFFI to be present on the property is considered to be low.</p>
<p>v. Ozone Depleting Substances (ODS)</p>	<p>None Observed</p>
<p>vi. Herbicides and Pesticides</p>	<p>During the site inspection large scale storage of herbicides or pesticides was not observed. However, during the interview it was confirmed that pesticides are used on the site for the crops.</p>
<p>vii. Mould</p>	<p>Mould may be present in the basement of the residential structure due to the age of the building. However, the investigation did not include inspection of the interior of the buildings, or mould testing.</p>
<p>viii. Mercury</p>	<p>Based on the age of the building, there is potential for mercury to be present in fluorescent lights observed in the building. Mercury with small quantity could be present inside the electrical switches or thermostats observed in the units of the building.</p>

ix.	acrylonitrile, arsenic, benzene, coke oven emissions, ethylene oxide, isocyanates, silica, vinyl chloride	These items were not observed at the Property. The presence of the special attention items in building/construction materials were investigated through observations made by DS and does not necessarily imply adverse impact to the environmental condition of the property.
x.	Pits and Lagoons	None Observed
xi.	Air Emissions	None Observed
xii.	Radioactive Materials & Radon Gas	Based on local geological formations in the area, it is unlikely the site is exposed to natural sources of radiation such as radon or uranium. Manmade sources of radioactive materials were not observed during the site inspection. A radiometric survey was not conducted during this investigation.

### 5.3 Written Description of Investigation

The site reconnaissance included a visual inspection of the Phase One Property to confirm current conditions and identify any current land uses or activities, which may have or may cause environmental impacts. The adjoining and neighbouring properties were observed from the Phase One Property and publicly accessible areas.

At the time of the Site Reconnaissance the land use within the Phase One Study Area was primarily residential and agricultural purposes as described in the table below:

**Table 5-3: Summary of Site Reconnaissance Observations within Phase One Study Area**

Observation	Details
Phase One Property	The major portion of the Phase One Property was a farmland. The western portion of the Property consisted of a two-storey residential building (Site Building A), a barn (Site Building B), a workshop building (Site Building C), and a small shed (Site Building D).
North Adjacent Property	The north adjacent Property was occupied by farmland at the time of the site reconnaissance.
East Adjacent Property	The east adjacent Property was occupied by farmland at the time of the site reconnaissance.
South Adjacent Property	The south adjacent Properties were occupied by farmland and residential buildings at the time of the site reconnaissance.
West Adjacent Property	The west adjacent Properties were occupied by farmland, residential buildings, and sheds at the time of the site reconnaissance.
Water Bodies	None Observed.
Areas of Natural Significance	None Observed.

Photographs illustrating the Phase One Property and adjacent properties are provided under Appendix F. A summary of the potentially contaminating activities observed is provided in Section

6.2. A visual depiction of the PCAs identified within the Phase One Study Area is provided under Figure 4.

## 6.0 Review and Evaluation of Information

### 6.1 Current and Past Uses

Current and past uses of the Phase One Property have been inferred based on the information provided in the aerial photographs, chain of title, city directories and conversations with the site representative. Summary of Current and Past Uses of the Phase One Property is presented in the Appendix G.

### 6.2 Potentially Contaminating Activity

According to the Table 2, Schedule D, O. Reg. 153/04 as amended, potentially contaminating activities are activities that may be contributing to areas of potential environmental concern on the Phase One Property. The PCAs identified on the Phase One Property and within the Phase One Study Area are summarized in the table below and are illustrated on Figure 4.

**Table 6-1: Summary of PCAs**

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-1	#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Inferred large scale application of pesticides for agricultural purposes on the Phase One Property.	Yes – APEC-1
PCA-2	#28 – Gasoline and associated products storage in fixed tanks	The SPL Phase One Site Reconnaissance identified two (2) fuel oil ASTs in the basement of the residential building, each with a capacity of 1000 L.	Yes – APEC-2
PCA-3	#30 – Importation of Fill Material of Unknown Quality	Fill material was identified in the 2014 SPL Geotechnical Investigation in one (1) borehole. Fill material may have been used during construction of the structures on-site.	Yes – APEC-3
PCA-4	#27 – Garages, and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	The ERIS report identified the site as a light fuel waste generator for Pat Watson, Farm Wholesaler-Distributors	Yes – APEC-4
PCA-5	#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Inferred large scale application of pesticides on a historical orchard identified on the eastern portion of the west adjacent property.	No – due to the location of the PCA and t immobility of the COPC

### 6.3 Areas of Potential Environmental Concern

The table of APECs presented in the form as approved by the Director is provided below, in accordance with clause 16(2)(a), Schedule D, O.Reg. 153/04.

**Table 6-2: Summary of APECs**

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, soil and/or sediment)
APEC-1	Entire Property	PCA-1: #40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications - Inferred large scale application of pesticides for agricultural purposes on the Phase One Property.	On-Site	OCPs, metals, As, Sb, Se, CN-	Soil
APEC-2	Western portion of the Property, surrounding the residential house.	PCA-2: #28 – Gasoline and associated products storage in fixed tanks -The SPL Phase One Site Reconnaissance identified two (2) fuel oil ASTs in the basement of the residential building, each with a capacity of 1000 L.	On-Site	PHCs, BTEX, PAHs	Soil and ground water
APEC-3	Western portion of the Property, surrounding all structures on-site.	PCA-3: #30 – Importation of Fill Material of Unknown Quality - Fill material was identified in the 2014 SPL Geotechnical Investigation in one (1) borehole. Fill material may have been used during construction of the structures on-site.	On-Site	Metals, As, Sb, Se, B-HWS, CN-, EC, Cr (VI), Hg, SAR, PAHs	Soil
APEC-4	Western portion of the Property, surrounding the barn	PCA-4: #27 – Garages, and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles.	On Site	PHCs, VOCs, PAHs	Soil and ground water

The rationale used by the QP in assessing the information obtained through the course of this investigation to determine whether PCAs exist and/or are contributing to an APEC on the Phase One Property has been provided in the proceeding sections. In general, the potential for a PCA to be contributing to an APEC on the Phase One Property was assessed using the likelihood of the source to contaminate the Phase One Property, the possibility of the contaminants to migrate to the Phase One Property based on the hydraulic and geologic conditions, and the inherent properties of the contaminants of concern.

The contaminants of potential concern were determined based on the professional experience of the QP, common industry standards, literature reviews, and the inherent properties of the contaminant.

This investigation was conducted based on the assumption that all information provided to DS was factual and accurate. DS is not aware of any uncertainty factors which would affect the conclusions of this investigation.

#### 6.4 Phase One Conceptual Site Model

A Conceptual Site Model was developed for the Phase One Property, located at 14275 The Gore Road, Parcel 1, Bolton, Ontario. The Phase One Conceptual Site Model is presented in Drawings 2 to 5 and visually depict the following:

- ◆ Any existing buildings and structures
- ◆ Water bodies located in whole, or in part, on the Phase One Study Area
- ◆ Areas of natural significance located in whole, or in part, on the Phase One Study Area
- ◆ Water wells at the Phase One Property or within the Phase One Study Area
- ◆ Roads, including names, within the Phase One Study Area
- ◆ Uses of properties adjacent to the Phase One Property
- ◆ Areas where any PCAs have occurred, including location of any tanks
- ◆ Areas of Potential Environmental Concern

##### 6.4.1 Potentially Contaminating Activity Affecting the Phase One Property

All PCAs identified within the Phase One Study Area are presented on Figure 4 and discussed in Section 6.2 above. The PCAs which are considered to contribute to APECs on, in or under the Phase One Property are summarized in the table below:

**Table 6-3: Summary of PCAs Contributing to APECs**

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-1	#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Inferred large scale application of pesticides for agricultural purposes on the Phase One Property.	Yes – APEC-1

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-2	#28 – Gasoline and associated products storage in fixed tanks	The SPL Phase One Site Reconnaissance identified two (2) fuel oil ASTs in the basement of the residential building, each with a capacity of 1000 L.	Yes – APEC-2
PCA-3	#30 – Importation of Fill Material of Unknown Quality	Fill material was identified in the 2014 SPL Geotechnical Investigation in one (1) borehole. Fill material may have been used during construction of the structures on-site.	Yes – APEC-3
PCA-4	#27 – Garages, and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	The ERIS report identified the site as a light fuel waste generator for Pat Watson, Farm Wholesaler-Distributors	Yes – APEC-4

#### 6.4.2 Contaminants of Potential Concern

A summary of the contaminants of potential concern identified for each respective APEC is presented in Table 6-3 above. The following contaminants of potential concern were identified for the Phase One Property: PHCs, VOCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, EC, Cr (VI), Hg, low or high pH, SAR, PAHs, and OC Pesticides.

#### 6.4.3 Underground Utilities and Contaminant Distribution and Transport

Underground utilities can affect contaminant distribution and transport. Trenches excavated to install utility services, and the associated granular backfill may provide preferential pathways for horizontal contaminant migration in the shallow subsurface.

Underground utilities were identified at the Phase One Property, including water, natural gas, and sewer services to the existing Site Building. Plans were not available to confirm the depths of these utilities, however they are estimated to be installed at depths ranging from 2 to 3 metres below ground surface.

The depth to groundwater at the Phase One Property is inferred to be approximately 4 to 7 metres below ground surface, therefore the utility corridors are expected to be well above the water table and would not act as preferential pathways for contaminant distribution and transport in the event that shallow subsurface contaminants exist at the Phase One Property.

#### 6.4.4 Geological and Hydrogeological Information

The topography of the Phase One Property is generally rolling, sloped to the east/southeast, with surface elevation varying from 281 metres above sea level (masl) in the western portion to 275 masl in the eastern portion. The topography within the Phase One Study Area generally slopes to the east/southeast, towards the Humber River, located approximately 1.8 km east of the Phase One

Property. The nearest body of water is a tributary of Lindsay Creek located at the south corner of the Property. The Lindsay Creek drains south towards the West Humber River, which is located approximately 3.2km to the south of the Phase One Property. Based on a review of the MECP well records, the depth to groundwater in the vicinity of the Phase One Property is approximately 4 m to 7 m. The shallow groundwater flow direction within the Phase One Study Area is inferred to be east towards the West Humber River

The Site is situated within a drumlinized till plain physiographic region. The surficial geology in the vicinity of the Site is described as “glaciolacustrine deposits or shale, which may include clay to silt-textured till”. The underlying bedrock within the area generally consists of shale, limestone, dolostone, and siltstone of the Queenston Formation. The bedrock in the vicinity of the Site is anticipated at depths greater than 90 mbgs, based on available well records and previous ESAs completed for the Site.

#### **6.4.5 Uncertainty and Absence of Information**

---

DS has relied upon information obtained from federal, provincial, municipal, and private databases, in addition to records and summaries provided by EcoLog ERIS. All information obtained was reviewed and assessed for consistency, however the conclusions drawn by DS are subject to the nature and accuracy of the records reviewed.

All reasonable inquiries were made to obtain reasonably accessible information, as mandated by O.Reg.153/04 (as amended). All responses to database requests were received prior to completion of this report, with the exception of the MECP FOI request and the City Directory Search. If the MECP FOI request produces information which may alter the conclusions of this report, an addendum will be provided to the Client. Similarly, the City Directory search could not be completed due to the closure of library services in response to the Covid-19 pandemic. Once City Directories are available for review, the client will be updated and an addendum will be provided. This report reflects the best judgement of DS based on the information available at the time of the investigation.

Information used in this report was evaluated based on proximity to the Phase One Property, anticipated direction of local groundwater flow, and the potential environmental impact on the Phase One Property as a result of potentially contaminating activities.

The QP has determined that the uncertainty does not affect the validity of the Phase One ESA Conceptual Site Model or the conclusions of this report.

## **7.0 Conclusions**

---

DS conducted a Phase One ESA for the property located at 14275 The Gore Road, Parcel 1, Bolton, Ontario. The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objectives of the Phase One ESA was to identify the presence or absence of potentially contaminating

activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property.

Based on the information obtained as part of this investigation, it is concluded that five (5) PCAs were identified within the Phase One Study Area which are considered to be contributing to four (4) APECs on, in or under the Phase One Property.

### **7.1 Phase Two Environmental Site Assessment Requirement**

---

Further investigation in the form of a Phase Two ESA will be required in order to meet the requirements of O.Reg.153/04 (as amended).

### **7.2 RSC Based on Phase One Environmental Site Assessment**

---

Record of Site condition cannot be filed on the basis of the Phase One ESA due to the identification of Areas of Potential Environmental Concern on the Phase One Property.

### **7.3 Limitations**

---

This report was prepared for the sole use of Argo Development Corporation and is intended to provide an assessment of the environmental condition on the property located at 14275 The Gore Road, Parcel 1, Bolton, Ontario. The information presented in this report is based on information collected during the completion of the Phase One Environmental Site Assessment by DS Consultants Ltd. The material in this report reflects DS' judgment in light of the information available at the time of report preparation. This report may not be relied upon by any other person or entity without the written authorization of DS Consultants Ltd. The scope of services performed in the execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this documents or findings, conclusions and recommendations represented herein, is at the sole risk of said users.

The information and conclusions presented in this report are professional opinions in accordance with generally accepted engineering and scientific practices based on a cursory historical search, visual observations and limited information provided by persons knowledgeable about past and current activities on this site. The work completed as per the scope of work is considered sufficient in detail to form a reasonable basis for the findings presented in this report. As such, DS Consultants Ltd. cannot be held responsible for environmental conditions at the site that was not apparent from the available information.

## **7.4 Qualifications of the Assessors**

---

### **Sarth Sheth, M.Sc., EIT**

Mr. Sheth is an Engineer-in-Training (EIT) with DS Consultants Ltd. Sarth holds a Master's Degree in Water Security from the University of Saskatchewan and has several years of experience working in the environmental industry. Sarth has experience in conducting Phase One and Phase Two Environmental Site Assessments, soil and groundwater remediation, and has supported several risk assessment projects.

### **Mr. Patrick (Rick) Fioravanti, B.Sc., P.Geo., QP<sub>ESA</sub>**

Mr. Fioravanti is the Manager of Environmental Services with DS Consultants Limited. Patrick holds an Honours Bachelor of Science with distinction in Toxicology from the University of Guelph and is a practicing member of the Association of Professional Geoscientists of Ontario (APGO). Patrick has over nine years of environmental consulting experience and has conducted and/or managed hundreds of projects in his professional experience. Patrick has extensive experience conducting Phase One and Phase Two Environmental Site Assessments in support of brownfields redevelopment in urban settings, and been involved in numerous remediation projects, supported many risk assessments, and successfully filed Records of Site Condition with the Ministry of Environment, Conservation and Parks. He has conducted work across southern and eastern Ontario, and Quebec in his professional experience. Patrick is considered a Qualified Person to conduct Environmental Site Assessments as defined by Ontario Regulation 153/04 (as amended).

### **Drew Doak, B.Sc.E., P.Eng., QP<sub>ESA</sub>**

Mr. Doak is an Environmental Project Manager with DS Consultants Limited. Drew holds a Bachelor of Science in Engineering from Queen's University and is a practicing member of the Professional Engineers of Ontario (PEO). Drew has five years of environmental consulting experience and has conducted and/or managed a multitude of projects in his professional experience. Drew has extensive experience conducting Phase One and Phase Two Environmental Site Assessments in support of brownfields redevelopment in urban settings, and been involved in numerous remediation projects, and supported many risk assessments and Records of Site Conditions with the Ministry of Environment, Conservation and Parks. He has also conducted a variety of Hydrogeological investigations within the GTA. Drew is considered a Qualified Person to conduct Environmental Site Assessments as defined by Ontario Regulation 153/04 (as amended).

## 7.5 Signatures

---

This Phase One ESA was conducted under the supervision of Mr. Patrick (Rick) Fioravanti, B.Sc., P.Geo., QP<sub>ESA</sub> in accordance with the requirements of O.Reg. 153/04 (as amended). The findings and conclusions presented have been determined based on the information obtained at the time of the investigation, and on an assessment of the conditions of the Site at this time.

We trust this report meets with your requirements. Should you have any questions regarding the information presented, please do not hesitate to contact our office.

Yours truly,

### DS Consultants Ltd

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Executive Summary: Summary By Data Source

### **BORE - Borehole**

A search of the BORE database, dated 1875-Jul 2018 has found that there are 4 BORE site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
	ON	0.0	<a href="#"><u>19</u></a>
	ON	0.0	<a href="#"><u>24</u></a>
	ON	15.5	<a href="#"><u>33</u></a>
	ON	35.2	<a href="#"><u>38</u></a>

### **CA - Certificates of Approval**

A search of the CA database, dated 1985-Oct 30, 2011\* has found that there are 2 CA site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
GEORBON TRANSPORTATION SERVICES INC.	14091 HUMBER STA. RD., BOLTON CALEDON TOWN ON	48.4	<a href="#"><u>43</u></a>
Caledon Propane Inc.	1 Betomat Court Caledon ON	249.7	<a href="#"><u>85</u></a>

### **CFOT - Commercial Fuel Oil Tanks**

A search of the CFOT database, dated Jul 31, 2020 has found that there are 1 CFOT site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
CARLO LANDOLFI	14196 HUMBER STATION RD BOLTON L7E 5S1 ON CA ON	0.0	<a href="#"><u>3</u></a>

### **EBR - Environmental Registry**

A search of the EBR database, dated 1994-Jul 31, 2020 has found that there are 4 EBR site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Lafarge Canada Inc.	13975 Humber Station Road Caledon, Regional Municipality of Peel L7E 0Y4 TOWN OF CALEDON ON	75.5	<a href="#"><u>54</u></a>

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2019**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jan 31, 2020**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Register:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Jun 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Dec 2019**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Jul 31, 2020**

**Delisted Fuel Tanks:**

Provincial DELISTED TANK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2019**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011-Aug 31, 2020**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Jul 31, 2020**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Aug 31, 2020**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2020**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

[EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2019

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Jul 31, 2020

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Apr 2020

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** May 31, 2018

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Jul 31, 2020

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date:** Pre-Jan 2010\*

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Apr 30, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2017**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Mar 31, 2020**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2020**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Jul 31, 2020**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011-Aug 31, 2020**

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness. The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Jul 31, 2020**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2020**

**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jan 31, 2020**

**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial

SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Nov 2019**

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\*****Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018****Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020****Waste Disposal Sites - MOE CA Inventory:**

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Aug 31, 2020****Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\*****Water Well Information System:**

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

---

Municipal Address / Lot, Concession, Geographic Township ( <b>Municipal address essential for cities, towns or regions</b> )	
14275 The Gore Road, Bolton, ON	
Part of Lot 12, Concession 4, Albion as in VS172840 (Secondly) Except Parts 1 & 2 43R1538 and Part 43R2952 Caledon	
Present Property Owner(s) and Date(s) of Ownership	
Argo Development Corporation	
Previous Property Owner(s) and Date(s) of Ownership	
Present/Previous Tenant(s), (if applicable)	

Search Parameters	Specify Year(s) Requested
Files older than 2 years may require \$60.00 retrieval cost. There is no guarantee that records responsive to your request will be located.	
Environmental concerns (General correspondence, occurrence reports, abatement)	All Years
Orders	All Years
Spills	All Years
Investigations/prosecutions ▶ Owner <b>AND</b> tenant information must be provided	All Years
Waste Generator number/classes	All Years

### Certificates of Approval ▶ Proponent information must be provided

1985 and prior records are searched manually. **Search fees in excess of \$300.00** could be incurred, depending on the types and years to be searched. Specify Certificates of Approval number (s) (if known). **If supporting documents are also required, mark SD box** and specify type e.g. maps, plans, reports, etc.

	SD	Specify Year(s) Requested
air - emissions		1986- present
water - mains, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster)		1986- present
sewage - sanitary, storm, treatment, stormwater, leachate & leachate treatment & sewage pump stations		1986- present
waste water - industrial discharge		1986- present
waste sites - disposal, landfill sites, transfer stations, processing sites, incinerator sites		1986- present
waste systems - PCB destruction, mobile waste processing units, haulers, sewage, non-hazardous & hazardous waste		1986- present
pesticides - licenses		1986- present

A \$5.00 non-refundable application fee, payable to the Minister of Finance, is mandatory. The cost of locating on-site and/or preparing any record is \$30.00/hour and 20 cents/page for photocopying and you will be contacted for approval for fees in excess of \$30.00.

Subject: RE: UST/AST search Bolton, ON

Hello. Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at <https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?mid=392> and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

**Please refrain from sending documents to head office and only submit your requests electronically via email** along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

Kind regards,

Roxana

# Appendix G

**"Table of current and past uses of the phase one property"**  
**(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)**

Year	Name of owner	Description of property use	Property use	Other observations from aerial photographs, fire insurance plans, etc.
1878 – 1946	Newlove Family	Residential property with orchard, livestock feed crops and dairy operations	Residential/ Agricultural	Historical atlas depicts the Phase One Property as an agricultural land with historical orchards and buildings.
1946 – 1964	Newlove Family	Residential property without orchard, livestock feed crops and dairy operations	Residential/ Agricultural	Aerial photos depict the Phase One Property as a residential property with agricultural fields; Properties in the Phase One Study Area consist of residential
1964 – 1985	Watson Family (since 1965)			
1985 – Present	Watson Family Henry Family (since 2006) Argo Development Corporation	Residential property, livestock feed crops and dairy operations (ceased in the mid 1990s)	Residential/ Agricultural	Aerial photographs and satellite images indicate that the Phase One Property and properties within the Phase One Study Area are essentially unchanged since 1946; An interview with the current owner confirmed that dairy operations on the Property have ceased around the mid 1990s.

*Notes:*

1 - For each owner, specify one of the following types of property use (as defined in O. Reg. 153/04) that

applies: Agriculture or other use  
Commercial use  
Community use  
Industrial use  
Institutional use  
Parkland use  
Residential use

2 - When submitting a record of site condition for filing, a copy of this table must be attached
