RE: Peer Review of AIA – CBM Caledon Quarry
18722 Main Street
Part of Lots 15-18, Concession 4 WSCR
Part of Lot 16, Concession 3 WSCR
Town of Caledon, Region of Peel

Dear Ms. Scott:

Stovel and Associates Inc. (SAI) reviewed the August 10, 2026 response prepared by Colville Consulting Inc. regarding SAI's outstanding peer review comments on the Agricultural Impact Assessment for the CBM Caledon Quarry. SAI acknowledges the additional information provided regarding the soil budget and soil management measures. SAI is largely satisfied with the response.

SAI provides the following comments:

1. Soil Budget by Area: Thank you for the soil budget information. Could you clarify the volume of subsoil that could be available for rehabilitation?
2. Agricultural Rehabilitation Maximized in Remaining Areas: SAI is of the view that through proper soil management procedures, agricultural rehabilitation could be maximized in tableland areas and yet still planted with woodland or meadow land species. Please comment on this approach and identify what changes to the soil management procedures (such as separate stripping, stockpiling and re-application of subsoil) would be required. Also please identify the areas where this could be accomplished. The woodland area in the Main Area would represent a candidate area where the soil could be managed to achieve an agricultural condition but reforested to provide for the desired ecological enhancement.

Should you have any questions or concerns, please do not hesitate to contact me.

Yours truly,

Robert Stovel
