UPDATED CULTURAL HERITAGE REPORT ADDENDUM: COMMENTS RECEIVED FROM TOWN OF CALEDON HERITAGE PLANNING STAFF

1 INTRODUCTION

Golder Associates Ltd. (Golder), amalgamated under WSP Canada Inc. (WSP) in January 2023, was retained by CBM Aggregates (CBM), a division of St. Marys Cement Inc. (Canada), to complete a Cultural Heritage Report: Existing Conditions and Impact Assessment (Cultural Heritage Report) for the proposed CBM Caledon Pit / Quarry site (the Project). As part of the Project, CBM proposes to develop approximately 261.2 hectares licenced under the *Aggregate Resources Act* and designated / zoned under the *Planning Act* to permit the proposed CBM Caledon Pit / Quarry. Applications under the *Planning Act* (POPA 2022-0006 and RZ 2022-0010) and *Aggregate Resources Act* (Class A Licence #626600) are underway.

WSP submitted the Cultural Heritage Report to the Town of Caledon in 2023. Heritage Planning staff provided comments on March 18, 2025 and December 21, 2025. This technical memorandum serves to address comments from Heritage Planning staff and should be appended to the Cultural Heritage Report (dated 21 July 2023).

2 CULTURAL HERITAGE REPORT UPDATES

Table 1 outlines comments received from the Town of Caledon and provides additional information to support the Cultural Heritage Report.

Table 1: Comment and response table

Town of Caledon Comment	Updated Information
1. The Town acknowledges the WSP cover letter, dated August 21, 2023, stating that the technical recommendations of the revised Cultural Heritage Report (revised July 2023) are superseded by the recommendations of the property specific Heritage Impact Assessments (HIAs).	n/a
2. Accordingly, the Town limits its comments on the Cultural Heritage Report to the following, which may be addressed by an Addendum Letter: a. change in heritage status of the properties at 18473 Main Street and 1626 Charleston Sideroad, now designated under Part IV of the <i>Ontario Heritage Act</i> .	-18473 Main Street was designated under Part IV, Section 29, of the <i>Ontario Heritage Act</i> on November 26, 2024 (By-law 2024-094). -1626 Charleston Sideroad was designated under Part IV, Section 29, of the <i>Ontario Heritage Act</i> on November 26, 2024 (By-law 2024-096).
b. Rationale for 50 m no-go construction buffer	Historical structures, particularly those built using masonry, are susceptible to accidental damage from vehicles, heavy equipment operation, or other activities of the mineral aggregate operation in the immediate vicinity. The buffers established reflect research (Carman <i>et al.</i> 2012 and Randl 2001) and consultation with WSP vibration specialists, which determined a 50 m buffer adequate for capturing potential impacts to physical heritage attributes such as built structures. The recommendations of the blast impact assessment (WSP 2022) should be implemented to ensure the structural integrity of the built heritage resources potentially impacted by the Project are maintained.
c. Rationale for 60 m vibration buffer	This buffer reflects research (e.g., Carman <i>et al.</i> 2012) that identified 60 m as a common buffer distance for screening construction vibration effects on heritage structures. Consultation with WSP vibration specialists refined this to a 50 m no-go construction buffer since the Project will involve blasting.

Town of Caledon Comment	Updated Information
d. Rationale for determining fugitive dust impacts	WSP Cultural Heritage Specialists followed guidance provided by WSP Environmental Engineers. The application has been designed to meet provincial blasting limits and air quality guidelines. CBM has conducted air quality monitoring in the vicinity of the site. Overall, the air quality is consistently below provincial guidelines, taking into account the existing aggregate operations and the existing truck traffic in the area. With the addition of the proposed CBM Caledon Pit / Quarry operations, including emissions from aggregate trucks accessing the site, the air quality is still predicted to be below provincial guidelines at surrounding residences. To support the continued conservation effort of cultural heritage resources impacted by the Project, the recommendations of the Air Quality Impact Assessment (WSP 2023), Best Management Practices Plan for the Control of Fugitive Dust (WSP 2024), and forthcoming Air Quality Monitoring Plan (WSP 2025) should be implemented.
e. Explanation of blast impact assessment	This information is contained in the Blast Impact Assessment for the Project. The recommendations of the blast impact assessment (WSP 2022) should be implemented to ensure the structural integrity of the built heritage resources potentially impacted by the Project are maintained.

Table 2 provides an update to the heritage status of properties identified in the Cultural Heritage Report in the time since the revised report was submitted in July 2023 and Table 3 lists additional properties on the heritage register within the community of Cataract. The updates to these properties are reflected in Figure 1.
