

January 7, 2016

Mr. Brandon Ward
Town of Caledon
6311 Old Church Road
Caledon, Ontario
L7C 1J6

Dear Mr. Ward,

RE: Proposed Limebeer Pit by Lafarge Canada Inc.
Response to Novus Environmental Air Quality Peer Review
Town Files: POPA 14-05 and RZ 14-08
OUR FILE: 9526CG

We have reviewed the peer review comments provided from Novus Environmental in their letter dated August 24, 2015, which was prepared to address the Air Quality Impact Assessment for the proposed Limebeer Pit dated April 2014.

On page 3 of the peer review the following was recommended:

The recommended dust management plan should be implemented to minimize any potential impacts offsite and this management plan should be embedded or directly referred to in the operating/site plans to be submitted to the Ontario Ministry of Natural Resources as part of the permit application for Category 1, Class A Licence under the Aggregate Resources Act.

We have no further recommendations regarding the Air Quality Impact Assessment.

As per Novus's recommendation the dust management plan is already implemented on the Operations Site Plan (page 2 of 4) dated September 10, 2014 Note 1.2.27 c) 1): states:

C) DUST: 'AIR QUALITY IMPACT ASSESSMENT LIMEBEER PIT' (SENES CONSULTANTS LIMITED, APRIL 2014)

1) DUST MITIGATION ACTIVITIES ON SITE SHALL MEET OR EXCEED THOSE SPECIFIED IN THE DUST MANAGEMENT PLAN DATED APRIL 2014, PREPARED BY SENES CONSULTANTS, OR ANY SUBSEQUENT VERSION OF THE DUST MANAGEMENT PLAN.

We trust this addresses the Town's peer review comments related to air quality. If you have any questions please do not hesitate to contact the undersigned.

Yours truly,

MHBC
